Semiconductor

Optimize Performance at the Lowest Power

National's PowerWise[®] Solutions Help Engineers Design Energy Efficient Systems

PowerWise products are analog and mixed-signal semiconductors that balance higher performance with lower power consumption.

PowerWise subsystems are architectural innovations designed to enable energy-efficient systems.

PowerWise Metrics Help Designers Compare Analog Components

PowerWise metrics are formulas and thresholds that distinguish energy efficient components from those that are less efficient. National has developed PowerWise metrics for 25 product categories and selected the best-in-class energy efficient products in each of these categories. Each PowerWise product has a PowerWise label and rating which summarizes its key specifications.

PowerWise[®] Efficiency Ratings (4 out of 25 categories shown)

Product Family	Metric	Threshold	Units
Switching Regulators	Peak Efficiency	≥ 95	%
High-Speed ADCs	$\frac{P}{2^{\text{ENOB}} \cdot F_s \cdot \text{ch}}$	≤ 2.5	pJ/conversion
Equalizers	$\frac{P}{T_r \cdot \text{ch}}$	≤ 20	pJ/bit
Timing Solutions	$\frac{P \cdot t_j}{\text{ch}}$	≤ 55	mW•ps

PowerWise Resources Help Designers Improve System Performance to Power

Visit national.com/powerwise for white papers, app notes and design tools that help system engineers by highlighting the optimal balance between performance and power consumption at the component, subsystem and system level.

Data Converter Portfolio

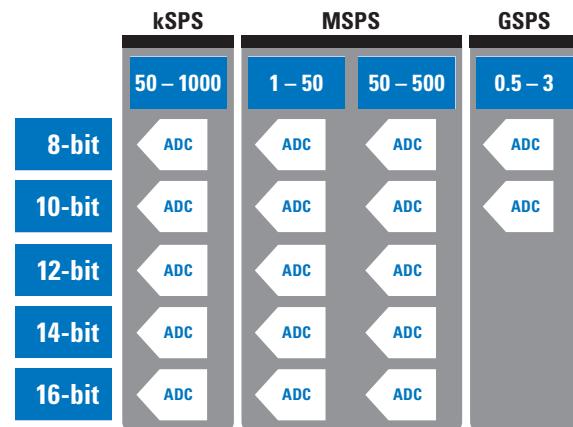

GSPS Ultra-High Speed A/D Converters

Features

- 10-bit ADCs up to 2 GSPS and 8-bit ADCs up to 3 GSPS sampling rate
- Key features:
 - Best-in-class performance vs. power
 - Energy-efficient PowerWise® products
 - Full-power bandwidth beyond 3 GHz (ADC083000)

Applications:

Ideal for use in test and measurement, military and communication systems

MSPS High-Speed A/D Converters

Features

- 8- to 16-bit ADCs
- Key features:
 - High-input bandwidth
 - Energy-efficient PowerWise products
 - Outputs available: CMOS, Parallel LVDS, and Serial LVDS

Applications:

Ideal for use in medical and industrial imaging, wireless communications, infrastructure, test and measurement, and portable instrumentation

kSPS Low-Power A/D Converters and D/A Converters

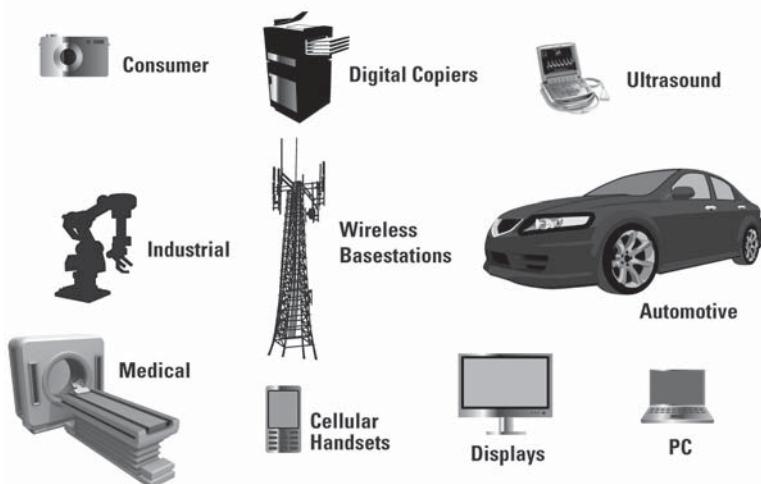

Features

- 8- to 14-bit ADCs up to 1 MSPS sampling rate
- Key features:
 - Low-power, energy-efficient PowerWise products
 - Pin-and-function compatibility for easy selection/upgrade
 - ADCs guaranteed over sample rate
 - Small packaging

Applications:

Ideal for use in industrial, medical, consumer, automotive, and portable systems

Data Conversion Applications

GSPS Ultra-High Speed A/D Converters

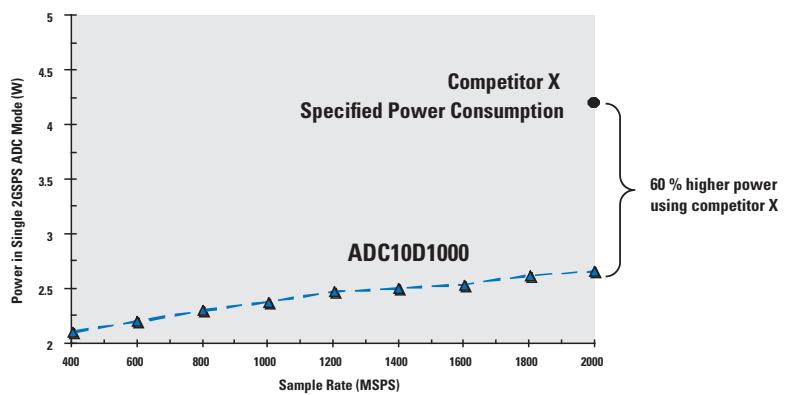

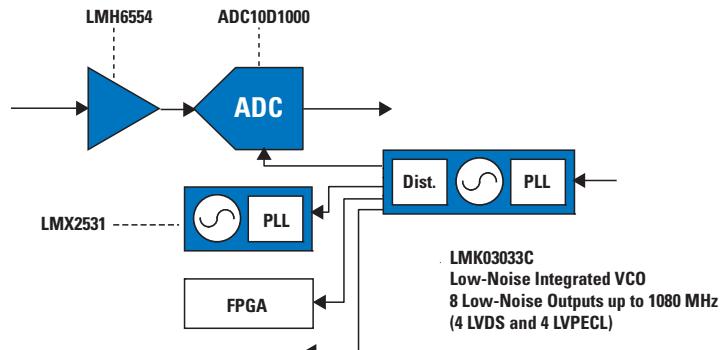

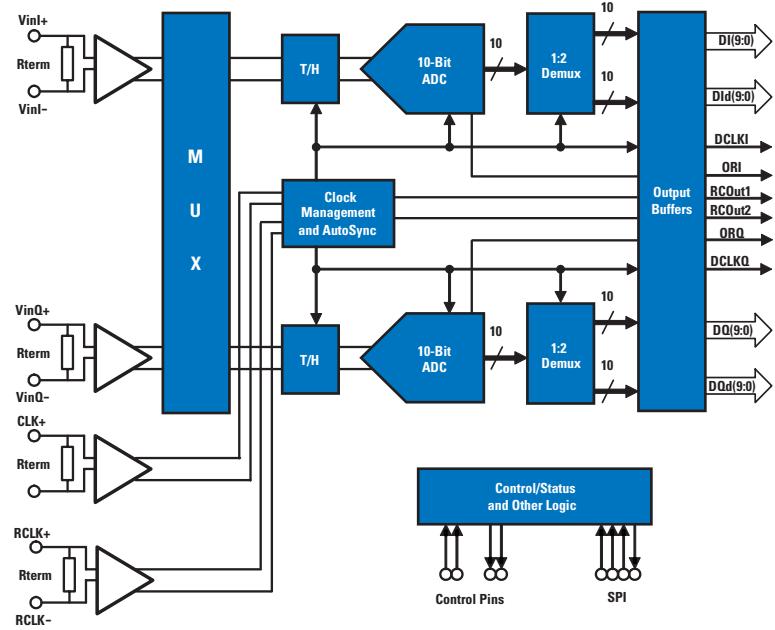

ADC10D1000 – Low-Power, 10-Bit, Dual 1.0 GSPS or Single 2.0 GSPS A/D Converter

Features

- World-class accuracy and dynamic performance
- Lowest available power consumption
- Internally terminated, buffered, differential analog inputs
- Selectable dual-edge sampling mode; the I- and Q-channels sample one input at twice the sampling clock rate
- Test patterns at output for system debug
- 1:1 non-demuxed or 1:2 demuxed LVDS outputs
- AutoSync feature for multi-chip systems
- Integrated tuneable L-C filter on the clock input to filter wideband clock jitter
- Single 1.9V power supply

Performance

- ENOB: 9.1 bits (typ)
- SNR: 57 dBc (typ)
- SFDR: 66 dBc (typ)
- Full Power bandwidth: 2.8 GHz (typ)
- DNL: ± 0.2 LSB (typ)
- INL: ± 0.7 LSB (typ)
- Power consumption
 - Single-channel enabled: 1.6W (typ)
 - Dual-channel enabled: 2.8W (typ)
 - Power-down mode: 60 mW (typ)

ADC083000 – PowerWise® 8-Bit, 3 GSPS ADC Delivers Unsurpassed Performance without Heat Sinks

ADC083000 Features

- Interleaving capability enables up to 6 GSPS operation
- Adjustable sampling clock phase
- Multiple ADC synchronization capability
- Choice of single or dual data rate output clocking
- Serial interface for extended control (including gain and offset)
- Full speed test patterns for system testing and debugging
- ADC08B3000 4k byte on-chip FIFO memory
- Reference board available with LMX2531 clock conditioner and LMH6555 high-speed amplifier, for inputs between DC and 750 MHz

GSPS Family Performance (typical)

- Energy-efficient PowerWise® products
- High 7.2 to 7.5 Effective Number of Bits (ENOB)
- Full power bandwidth beyond 3 GHz (ADC083000)
- Up to 3 GSPS sampling speed
- DNL ± 0.20 LSB
- Operating power between 0.8W and 1.9W (*No heat sink required*)
- Power down mode: under 25 mW

Applications:

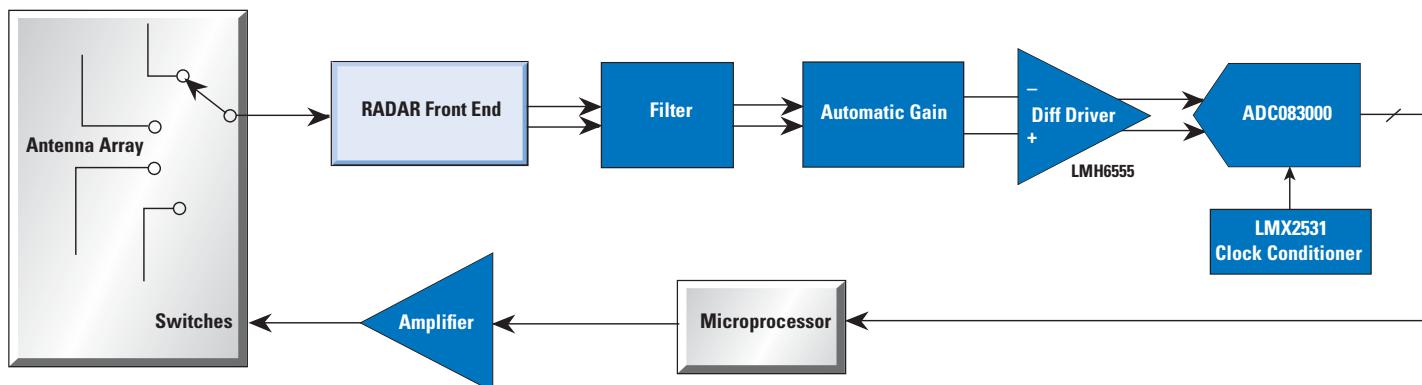

Ideal for use in direct RF down conversion, digital oscilloscopes, communications transceivers, test instrumentation, and ranging applications such as LIDAR and RADAR

8-Bit GSPS A/D Converters

Product ID	Description
ADC081000	1 GSPS
ADC08D1000	Dual, 1 GSPS (2 GSPS in interleave mode)
ADC08D1020	Dual, 1 GSPS (2 GSPS in interleave mode), includes test pattern and clock phase adjustment
ADC081500	1.5 GSPS
ADC08D1500	Dual, 1.5 GSPS (3 GSPS in interleave mode)
ADC08D1520	Dual, 1.5 GSPS (3 GSPS in interleave mode), includes test pattern and clock phase adjustment
ADC083000	3 GSPS
ADC08B3000	3 GSPS, on-chip buffer

 PowerWise product

RADAR System

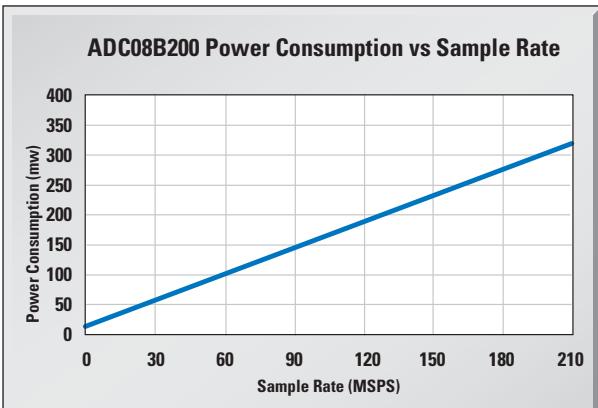

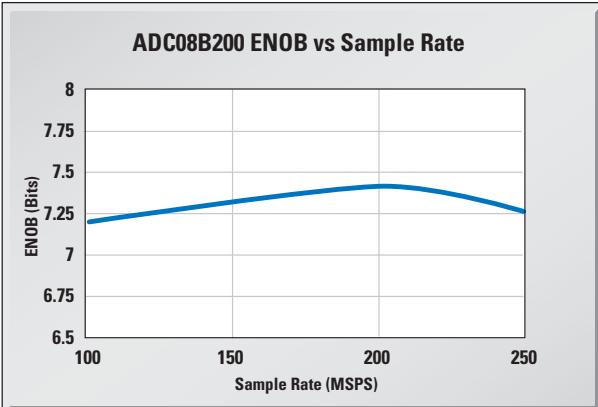

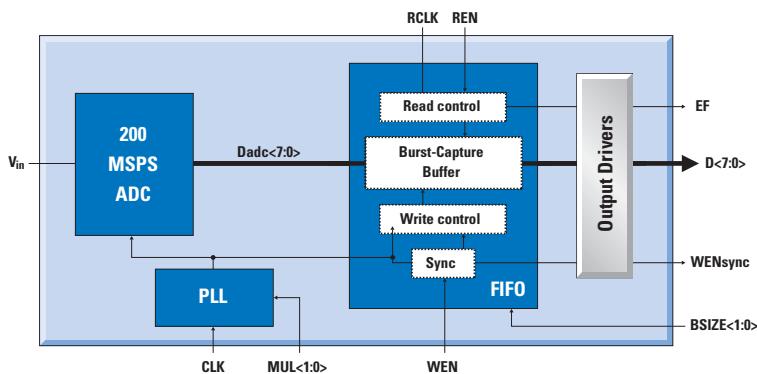

MSPS High-Speed A/D Converters

ADC08B200 – 8-Bit, 200 MSPS ADC with 1K Capture Buffer

Features

- Variable-size FIFO eliminates the need for FPGA resources
- On-chip PLL provides option to multiply input clock signal frequency by 2, 4, or 8 times, allowing for slower on-board clock
- Direct access to internal reference ladder allows for flexibility in input voltage ranges
- Power consumption scales linearly with sampling rate
- FPGA training pattern simplifies high-speed data capture

ADC08B200 On-Chip FIFO and PLL Greatly Simplify Digital Interface and Sampling Clock Generation

Applications:

Ideal for use in laser ranging, RADAR, pulse capturing, flat panel displays, projection systems, set-top boxes, battery-powered instruments, communications, medical scan converters, x-ray imaging, astronomy systems, high-speed Viterbi decoders, and astronomy applications

8-Bit MSPS A/D Converters

Product ID	Sampling Rate (MSPS)	Power	ENOB (Bits)	SNR (dB)	SFDR (dB)	THD (dBc)	Packaging
ADC08060	20 to 60	1.3 mW/MSPS	7.5	44.6	64	-57	TSSOP-24
ADC08L060	10 to 60	0.65 mW/MSPS	7.6	48	59.1	-57	TSSOP-24

 PowerWise® product

MSPS High-Speed A/D Converters

ADC16V130 – PowerWise® 16-bit, 130-MSPS ADC for High-IF, High-Dynamic Performance Applications

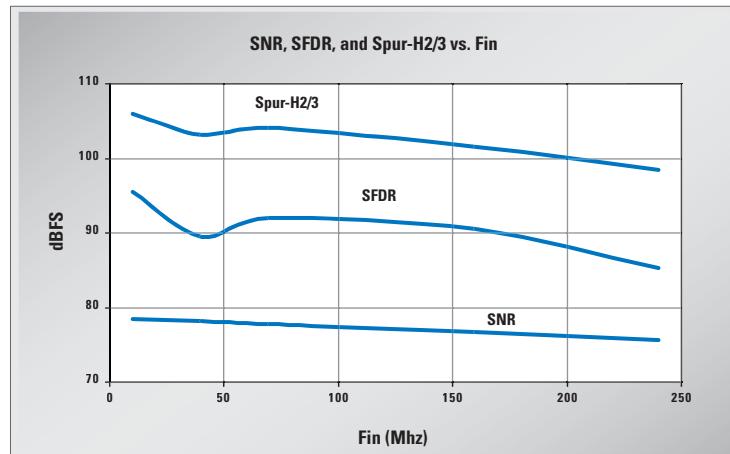

Features:

- 1.4 GHz full power bandwidth
- Industry's best performance:
 - 90.6 dBFS SFDR at $f_{IN} = 160$ MHz
 - 76.7 dBFS SNR at $f_{IN} = 160$ MHz
 - 101.5 dBFS worst harmonic or spur (except H2 and H3) at $f_{IN} = 160$ MHz
- Industry's lowest power: 755 mW
- Dual 3V/1.8V supply operation
- Parallel LVDS outputs
- Available in LLP-64 packaging (9 mm x 9 mm)
- Reference board available with LMK04031B clock jitter cleaner

Applications:

- Multi-carrier/multi-standard base station receivers
 - GSM/EDGE, CDMA2000, UMTS, LTE, and WiMAX
- Repeaters
- High-IF sampling systems
- Test and measurement equipment
- Communications instrumentation
- Radar systems
- Medical imaging
- Data acquisition
- Portable instrumentation

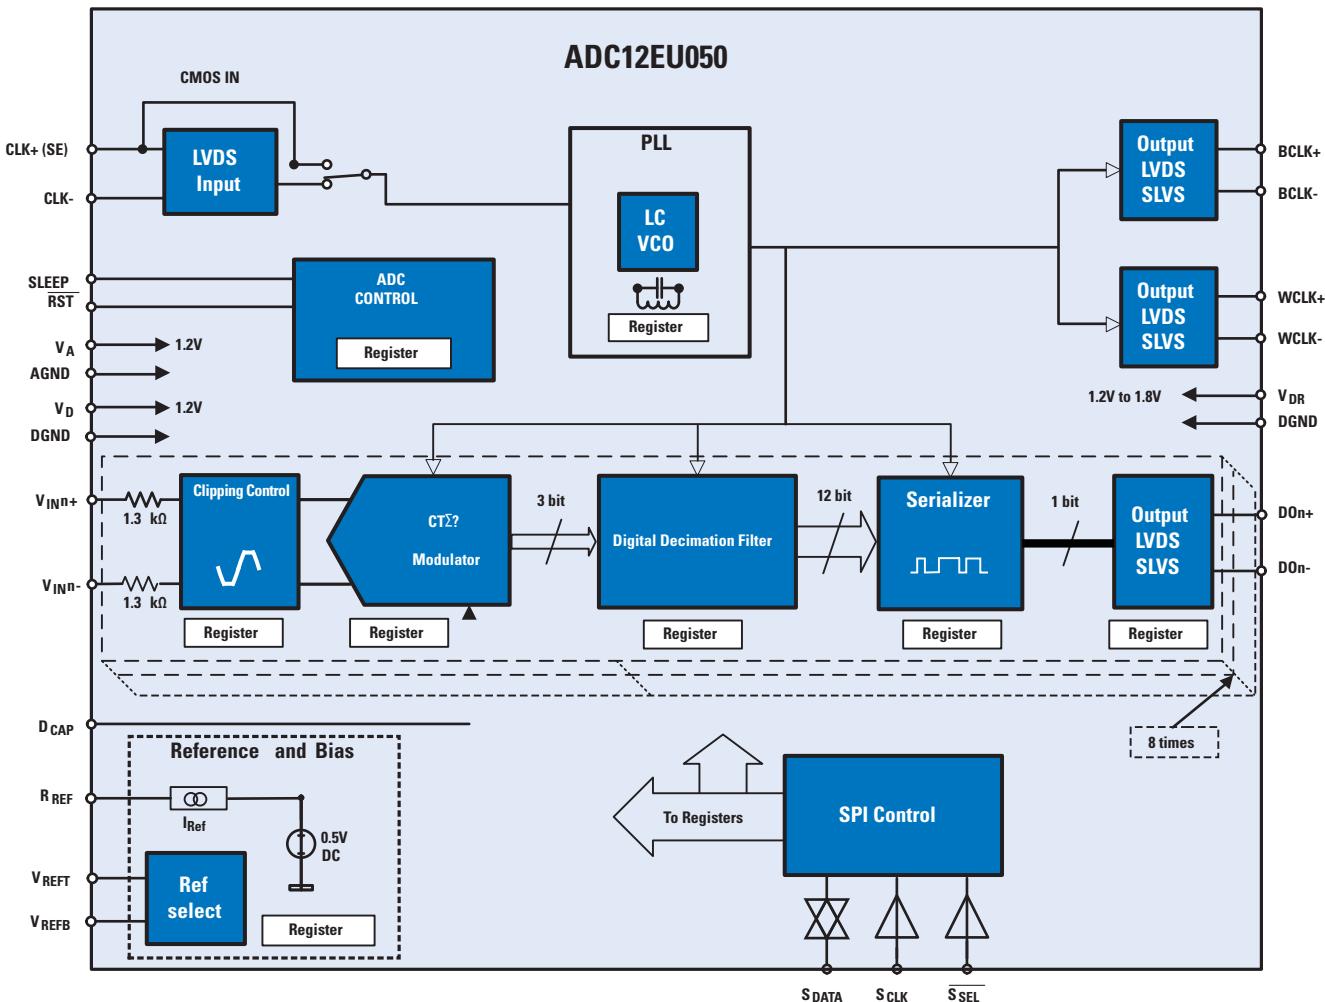

ADC12EU050 – PowerWise® High-Speed Continuous-Time Sigma-Delta ADC

Features

- 8-channel, 12-bit, 50 MSPS ADC
- Ultra-low power consumption: 384 mW
- Consumes 48 mW/channel at 50 MSPS
- Alias-free sample bandwidth up to 25 MHz
- On-chip PLL+VCO
- -76.6 dB Total Harmonic Distortion (THD)
- 69.3 dBFS Signal-to-Noise Ratio (SNR)
- Instant Overload Recovery (IOR)
- Available in LLP-68 packaging

Applications:

Medical imaging, industrial imaging, communication, test and measurement, and portable systems

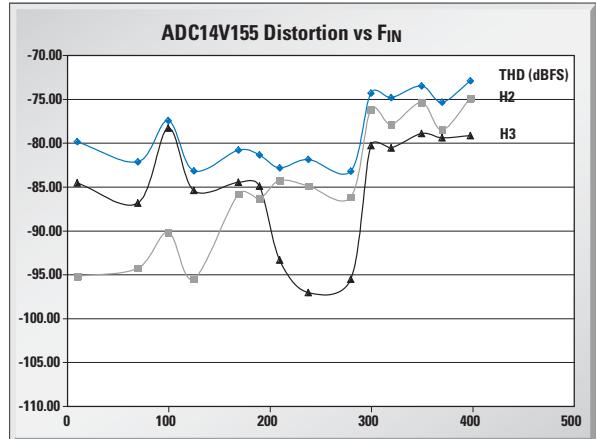

MSPS High-Speed A/D Converters

ADC14V155 – PowerWise® 14-bit, 155 MSPS ADC for High IF Sampling

Features

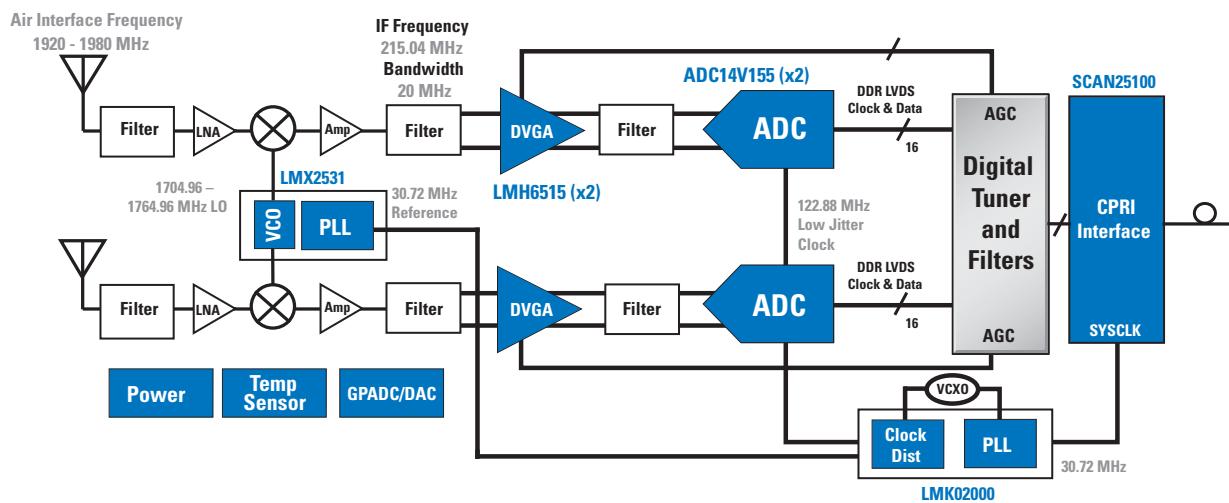

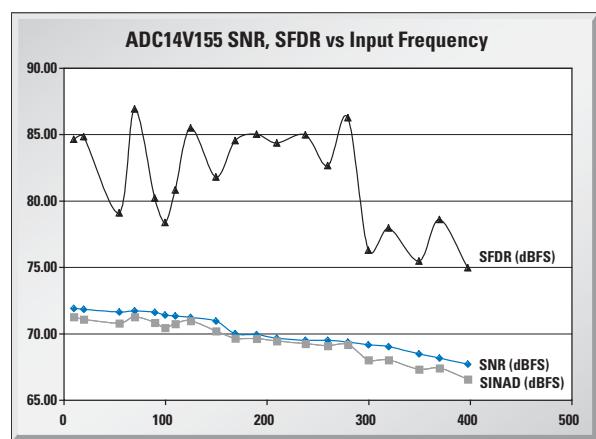

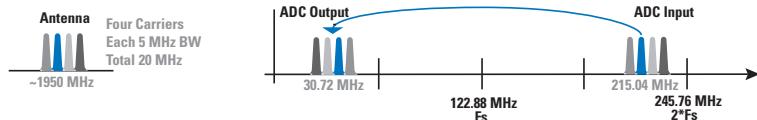

- 1.1 GHz full power bandwidth
- 69.5 dBFS SNR at 238 MHz input
- 85 dBFS SFDR at 238 MHz input
- -81.9 dBFS THD at 238 MHz input
- Dual 3.3V, 1.8V supply operation
- Power consumption: 951 mW
- Parallel LVDS outputs
- Available with CMOS outputs (ADC14155)
- Available in LLP-48 packaging (7 x 7 x 0.8 mm)
- Reference board available with LMH6515 high-speed amplifier and LMK03001 clock conditioner

Applications:

Ideal for use in wireless basestation transceivers, WiMAX, power amplifier linearization, high IF sampling receivers, multi-carrier, multi-mode receivers, cable modem termination systems, communications instrumentation, spectrum analyzers, digitizers, and RADAR systems

UMTS Diversity Receiver IF-Sampled, Four Carrier Using ADC14V155

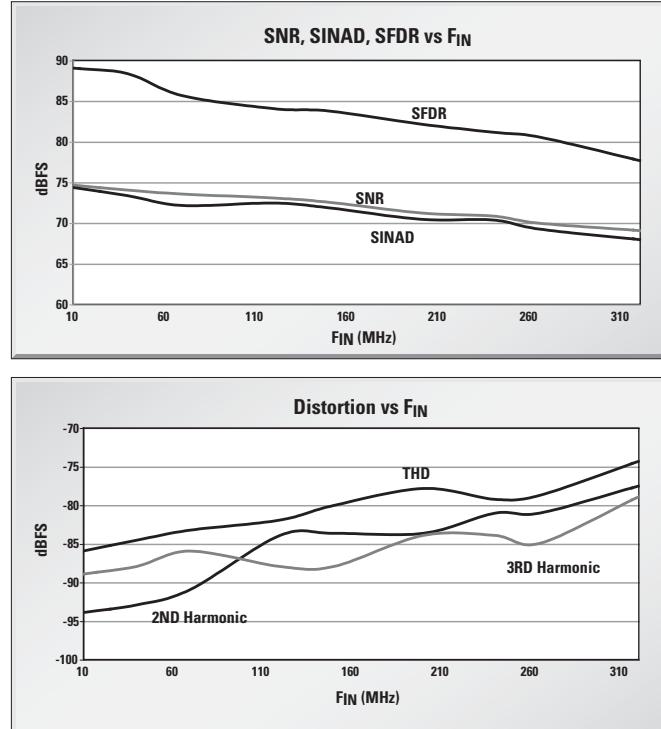

ADC14C105 – PowerWise® 14-bit, 105/95 MSPS ADC for High IF Sampling

Features

- 1 GHz full power bandwidth
- 72 dBFS SNR at 240 MHz input
- 82 dBFS SFDR at 240 MHz input
- -79.3 dBFS THD at 240 MHz input
- Power consumption: 400 mW
- Single 3.3V supply operation
- Available in LLP-32 packaging (5 x 5 x 0.8 mm)
- 12-bit, 105/95 MSPS ADC (ADC12C105)
- 12-bit, 80/65 MSPS ADC (ADC12C080)
- 14-bit, 80/65 MSPS ADC (ADC14C080)

Applications:

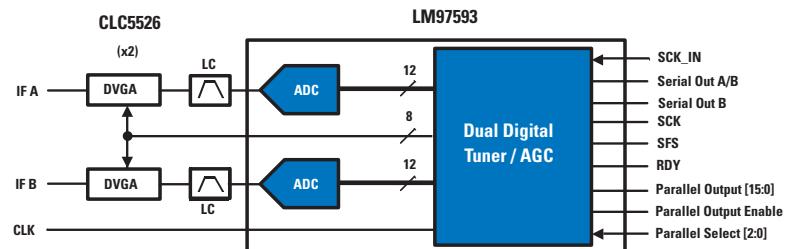

Ideal for use in 3G wireless basestation receivers, WiMAX, power amplifier linearization, high IF sampling receivers, multi-carrier, multi-mode receivers, test and measurement equipment, communications test equipment, and RADAR systems

LM97593 – Integrated Dual ADC with Digital Downconverter and Automatic Gain Control for Communications Applications

Features

- 2-channel, 12-bit A/D converter
- 123 dB dynamic range with CLC5526 DVGA (200 kHz)
- 650 MHz input bandwidth allows direct IF sampling of inputs up to 300 MHz
- 83 dBFS SNR at f_{IN}=250 MHz, 200 kHz bandwidth
- 62 dBFS SNR at f_{IN}=250 MHz, Nyquist bandwidth
- 68 dBFS SFDR at f_{IN}=250 MHz, Nyquist bandwidth
- Digital downconverter composed of
 - 4-stage CIC filter with programmable 8 to 2048 decimation ratio
 - 21-tap symmetric FIR filter providing decimation by 2
 - 63-tap symmetric FIR filter providing decimation by 2 or 4
- Integrated automatic gain control allows seamless integration with external DVGA
- Power consumption: 560 mW at 65 MSPS
- 3.3V analog supply, 1.8V digital
- Available in PQFP-128 packaging

Applications:

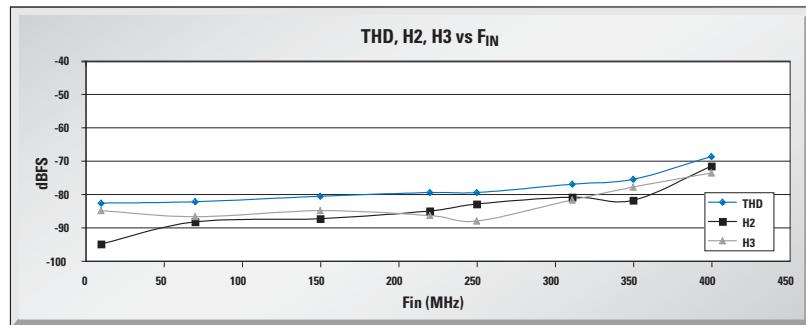

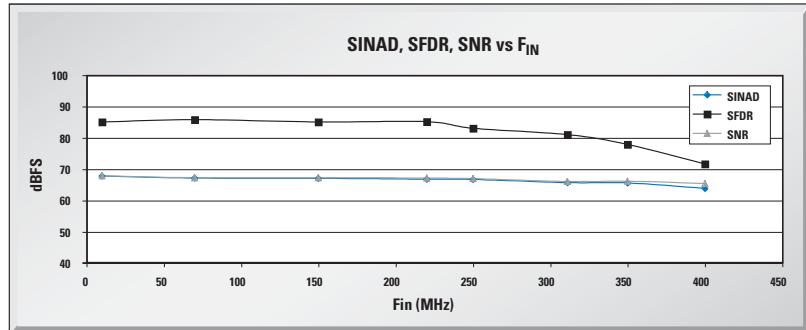

Ideal for use in cellular basestations including GSM / GPRS / EDGE / GSM Phase 2 receivers, satellite receivers, wireless local loop receivers, digital communications, and wireless microphone mainframes

MSPS High-Speed A/D Converters

ADC12V170 – PowerWise® 12-Bit, 170 MSPS ADC for High IF Sampling

Features

- 1.1 GHz full power bandwidth
- 66.3 dBFS SNR at 250 MHz input
- 82.1 dBFS SFDR at 250 MHz input
- -79.6 dBFS THD at 250 MHz input
- Dual 3.3V, 1.8V supply operation
- Power consumption: 781 mW
- Parallel LVDS outputs
- Available with CMOS outputs (ADC12C170)
- Available in LLP-48 packaging (7 x 7 x 0.8 mm)

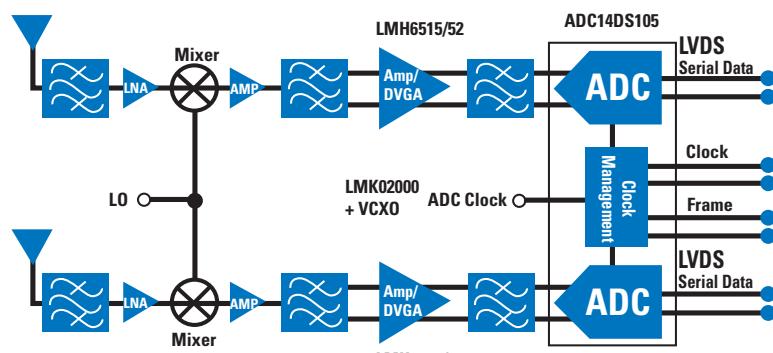

Applications:

Ideal for use in 3G wireless basestation receivers, WiMAX, power amplifier linearization, high IF sampling receivers, multi-carrier, multi-mode receivers, test and measurement equipment, communications test equipment, and RADAR systems

ADC14DS105 – PowerWise® 14-Bit, Dual, 105/95 MSPS ADC with Serial LVDS Outputs

Features

- 1 GHz full power bandwidth
- 83 dBFS SFDR at 240 MHz input
- 70.5 dBFS SNR at 240 MHz input
- -80 dBFS THD at 240 MHz input
- Power consumption: 1000 mW
- Serial LVDS outputs
- Single +3.3V supply operation
- Available in LLP-60 packaging (9 x 9 x 0.8 mm, 0.5 mm pin-pitch)
- 12-bit, dual, 105/95 MSPS ADC (ADC12DS105)
- 12-bit, dual, 80/65 MSPS ADC (ADC12DS080)
- 14-bit, dual, 80/65 MSPS ADC (ADC14DS080)
- Reference board available with LMH6552 high-speed amplifier and LMK02000 clock conditioner

Applications:

Ideal for use in high IF sampling receivers, wireless basestation receivers, test and measurement equipment, communications instrumentation, and portable instrumentation

kSPS Low-Power A/D Converters

ADCs Deliver Excellent INL and ENOB in Small Pin- and Function-Compatible Packages

Single-Ended Input ADCs (1 to 8 Channels) from the PowerWise® Family

12-Bit ADC

- INL: ± 0.64 LSB
- ENOB: 11.7

10-Bit ADC

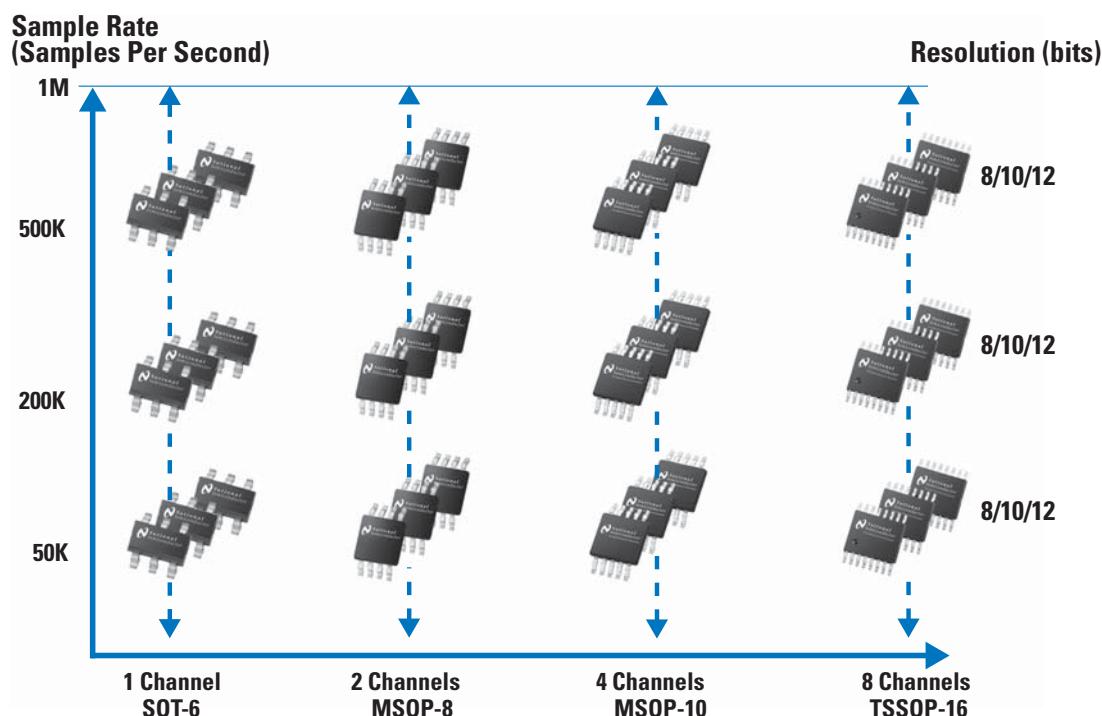

- INL: ± 0.2 LSB
- ENOB: 9.9

8-Bit ADC

- INL: ± 0.5 LSB
- ENOB: 7.8

Applications:

Ideal for use in portable systems, medical instrumentation, factory automation/automatic test equipment, consumer products, mobile communications, instrumentation, and control systems

Single-Ended Input I²C-Compatible A/D Converters

Product ID	Res (bits)	Inputs	Pin and Function Compatible	Speed Range (kSPS)	Supply Voltage Range(V)	Typ Power(mW)		Static Performance (Typ)		ENOB (bits) typ	Temp Range (°C)	Packaging

PowerWise® product

kSPS Low-Power D/A Converters

8-/10-/12-Bit D/A Converters Provide Seamless Upgradeability

Features

- Pin- and function-compatible across resolutions
- 2- and 4-channel family with smallest package outline in-class (3 mm x 3 mm)
- Rail-to-rail output swing

Applications:

Ideal for use in portable, battery-powered applications in industrial, medical, and consumer designs

Dynamic Range Optimization

Sensor Set-Point Control

Multi-Channel Output: Multiple Applications

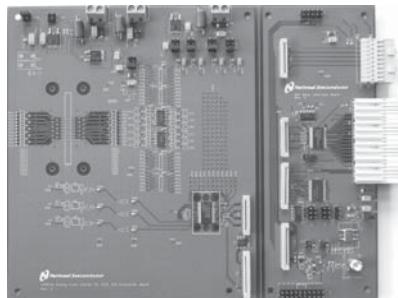

Analog Front Ends (AFE)

LM98714 – 3-Channel, 16-Bit, 45 MSPS Analog Front End with Integrated CCD/CIS Sensor Timing Generator and LVDS Output

Features

- Maximum input level selectable between 1.2V and 2.4V
- Input signal polarity selectable as + or - for use with CIS or CCD sensors
- Channel sampling rate: 15/22.5/30 MSPS in 3/2/1 channel mode
- Noise floor: -74 dB (at 0 dB PGA gain)
- INL: ± 23 LSB (typ)
- Power dissipation: 505 mW
- Integrated PGA: gain range 0.7 to 7.84x in 256 steps
- Integrated analog DAC: offset range ± 300 mV or ± 600 mV with ± 9 bit resolution
- Integrated digital DAC: offset range -1024 LSB to +1008 LSB with ± 6 bit resolution
- Operating temp: 0°C to 70°C
- Single 3.3V supply
- Available in TSSOP-48 packaging

LM98714 Eval Board and Graphical User Interface*

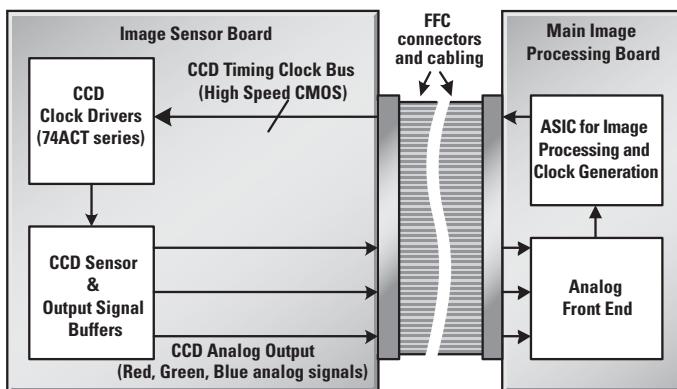

*Available for order – contact sales rep

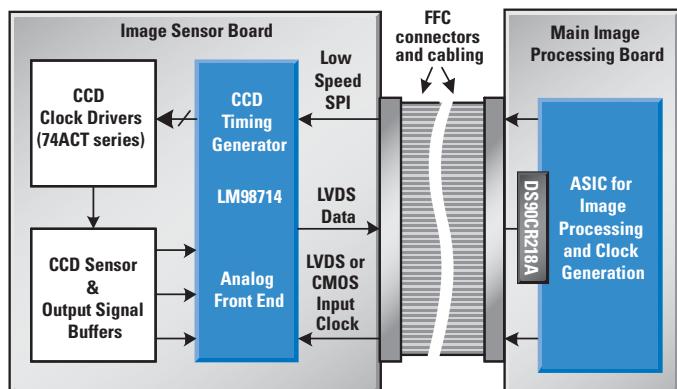

Applications:

Ideal for use in multi-function peripherals, facsimile equipment, flatbed or handheld color scanners, and high-speed document scanners

LM98519 – 6-Channel, 10-Bit, 32.5 MSPS per Channel, Analog Front End for High-Speed Linear CCD and CIS Sensors

Features

- CDS or S/H processing with negative input signal polarity
- Enhanced ESD protection on timing and control pins
- 6-channel AFE optimized for operation with 3-color, 6-output Linear CCDs
- Digital black level calibration for each channel
- Digital white level calibration for each channel
- Programmable input clamp
- Maximum input level 1.2V
- Channel sampling rate: 32.5 MSPS
- Noise floor: -68 dB (at 0 dB PGA gain)
- INL: ± 1 LSB (typ)
- Power dissipation: 1.04W
- Integrated PGA: total gain range 1x to 20x in 256 steps
- Integrated analog coarse DAC: offset range ± 277 mV with ± 4 bit resolution
- Integrated analog fine DAC: offset range ± 111 mV or ± 60 mV with ± 11 bit resolution
- Operating temperature range: 0°C to 70°C
- Single 3.3V supply
- Available in TQFP-80 packaging

PowerWise product

LMH6618/19 – 130 MHz, 1.25 mA Rail-to-Rail Input and Output Op Amp with Shutdown

Features

- Operating voltage range 2.7V to 11V
- Small signal bandwidth 130 MHz
- 1 mV max voltage offset over full temperature range
- 90 ns settling time to 0.1%, 120 ns to 0.01%
- SFDR ($f = 1$ MHz, $AV = +1$, $V_{OUT} = 2$ V_{PP}) 80 dBc
- 0.1 dB bandwidth ($AV = +2$) 15 MHz
- Industrial temperature grade -40°C to +125°C
- Low-power shutdown (LMH6618)
- Available in TSOT23-6 (LMH6618) and SOIC-8 (LMH6619) packaging

PowerWise product

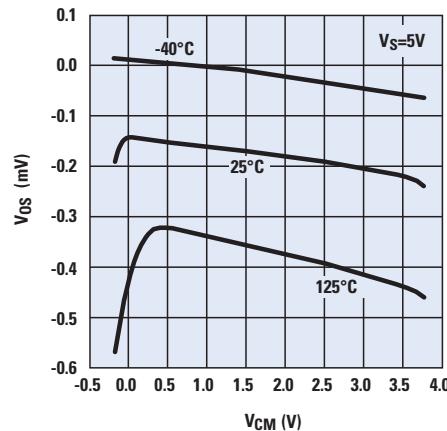

LMH6611/12 – 345 MHz Rail-to-Rail Output Single/Dual Amplifiers

Features

- 345 MHz small signal gain of 1 bandwidth
- 85 MHz large signal gain in 2 bandwidth
- 1 mV max input voltage offset over full temp on LMH6611 (1.3 mV for LMH6612)
- 102 dBc SFDR at 100 kHz
- 3.2 mA/ch supply current at $V_{CC} = 5$ V
- -40°C to +125°C operating temperature range

Applications

Ideal for use in ADC and DAC buffering, high-speed filter design, and 1080i and 720p video amps

 PowerWise product

LMH6552 – 1.5 GHz Fully Differential Amplifier

Features

- 1.5 GHz bandwidth at $A_v = 1$; 750 MHz at $A_v = 8$
- 450 MHz, 0.1 dB flatness
- -90 dB THD at 20 MHz, -74 dB THD at 70 MHz
- 3800 V/ μ s slew rate
- 10.3 dB noise figure
- 5 to 12V operation
- Available in SOIC-8 narrow and LLP-8 packaging
- Ideal match for 8/10/12/14-bit high-speed ADCs, such as the ADC14DS105
- Reference board available with LMK02000 clock conditioner and ADC14DS105

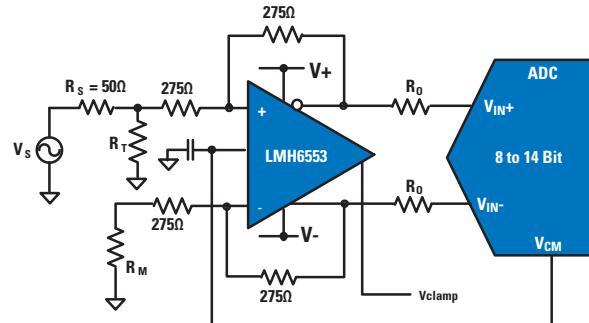

LMH6553 – 900 MHz Fully Differential Amplifier With Output Limiting Clamp

Features

- 900 MHz small signal gain of 1 bandwidth
- 670 MHz large signal gain of 1 bandwidth
- Integrated adjustable output limiting clamp protects low voltage ADC inputs from overload
- 600 ps clamp overdrive recovery time
- 10 ns settling time to 0.1%
- -79 dB THD at 20 MHz
- 4.5 to 12V operation
- Ideal match to National's 8/10/12/14-bit high-speed ADCs

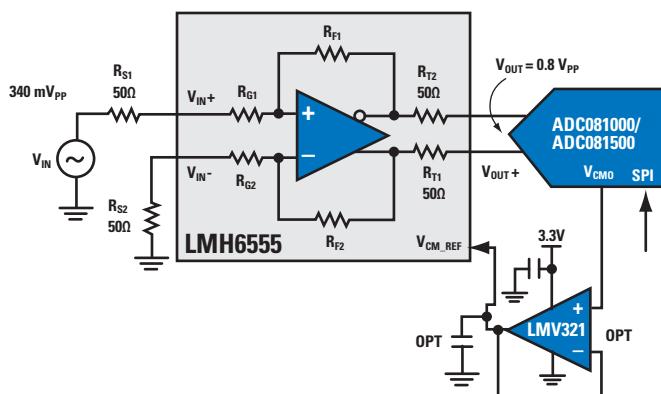

Single-Ended Input Differential Output ADC Driver

LMH6555 – 1.2 GHz Low-Distortion Differential Driver

Features

- 1.2 GHz bandwidth
- -50.5 dBc THD at 750 MHz
- 15 dB noise figure
- 13.7 dB fixed gain
- 3.3V operation
- 1300 V/ μ s slew rate
- Ideal match for 8-bit ADCs up to 3 GSPS, such as the ADC08(D)1000/1500/3000 family
- Available in LLP-16 packaging

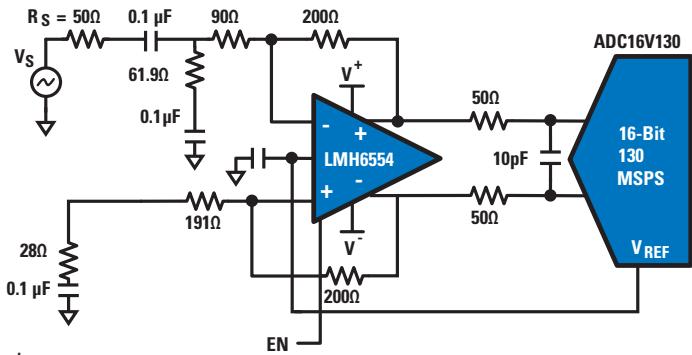

LMH6554 – 2.5 GHz Ultra Linear Fully-Differential Amplifier

Features

- 2.5 GHz small signal gain of 1 bandwidth
- 1.8 GHz large signal gain of 1 bandwidth
- 800 MHz 0.1 dB gain flatness
- -99 dBc IMD3 at f = 150 MHz
- 72 dBc SFDR at f = 250 MHz
- 0.9 nV/ $\sqrt{\text{Hz}}$ input noise voltage
- 11 pA/ $\sqrt{\text{Hz}}$ input noise current
- 6200 V/ μs slew rate
- 4.7 to 5.3V operation
- Available in quad FCOL-14 packaging
- Ideal match to National's new ADC10D1000 1 GSPS dual ADC and ADC16V130 130 MSPS 16-bit ADC

AC Coupled, Single to Differential ADC Driver

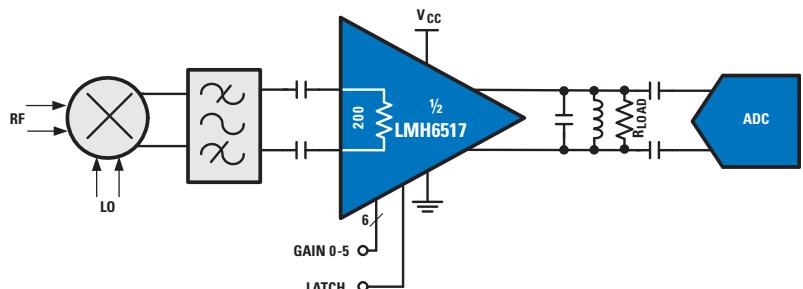

Applications:

Ideal for use in IF/RF gain blocks, DC-coupled wideband amplifiers, saw filter buffer/drivers, single-ended to differential and differential-to-differential amplifiers, and 8- to 16-bit high-speed differential-input ADC drivers

LMH6517 – Low-Power, High-Linearity IF and Baseband Dual 16-bit ADC Driver with Digitally-Controlled Gain

Features

- Differential 200Ω input
- 45 dBm OIP3 at 200 MHz
- 6 dB noise figure
- 1.2 GHz bandwidth
- Digital attenuator: 0 to 31.5 dB, 0.5 dB steps
- 22 dB maximum gain
- Differential output
- Serial and Parallel Interface (SPI)
- Dual channel
- 80 mA/ch I_{CC} at 5V supply
- 3.15V to 5.25V operation

Applications:

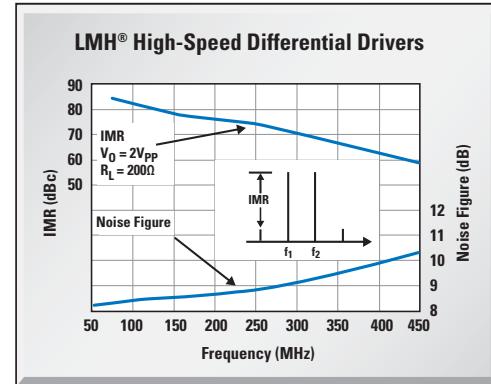

Ideal for use in multi-carrier cellular basestations, IF sampling receivers, instrumentation, and modems

High-Speed Variable Gain Amplifiers

LMH6515 – High-Speed Differential Driver Increases Dynamic Range Performance

Features

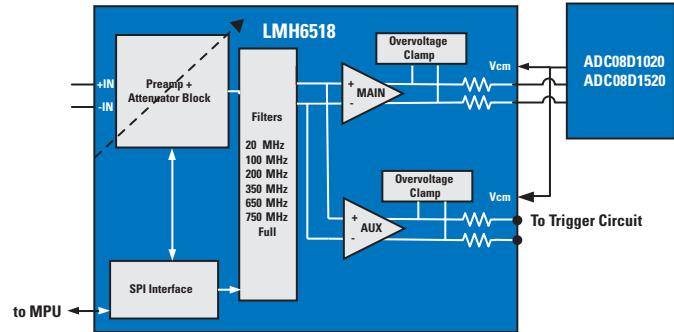

- 8.3 dB noise figure, 40 dBm OIP3
- 500 mW power dissipation
- 26 dB maximum gain, $R_L = 200$
- 31 dB gain range in precise 1 dB steps
- Gain step error < 0.05 dB at $F = 100$ MHz
- Differential-to-differential and single-to-differential
- Available in small LLP-16 packaging (4 mm x 4 mm)
- Ideal match for 12/14-bit high-speed ADCs up to 300 MHz, such as the ADC14V155 and ADC14DS105
- Reference board available with LMK03001 clock conditioner and ADC14V155

LMH6518 – 900 MHz DVGA with 40 dB Adjustment Gain and 8.5 mdB Effective Gain-Step Resolution

Features

- Integrated bandwidth filters
- Auxiliary output for trigger path
- Gain range 40 dB
- Gain step size 2 dB
- Gain step size with ADC 8.5 mdB
- SNR ($V_{IN} \geq 25$ mVpp FS, 200 MHz BW) 52dBFS
- HD2/HD3 at 100 MHz -50 dBc/-53 dBc
- Input referred noise (max gain) 0.98 nV/ $\sqrt{\text{Hz}}$
- Power consumption 1.1W/0.75W

PowerWise product

Comparators

LMH7322/24 – Dual/Quad 700 ps Comparators with LVDS/RSPECL Outputs

Features

- 700 ps propagation delay
- Overdrive dispersion:
 - 20 ps (LMH7324)
 - 75 ps (LMH7322)
- 4 Gbps toggle rate with 150 ps rise/ fall times
- Wide input range includes negative rail V_{CC1} -1.5V to V_{EE} -0.2V
- Supply range
 - 2.7V to 12V (LMH7322)
 - 5 to 12V (LMH7324)
- Dual supplies and wide supply range for level translation applications
- Low supply current
- Available in small LLP-24 (LMH7322) and LLP-32 (LMH7324) packaging

Applications:

Ideal for use in oscilloscopes, digitizers, mass spectrometers, logic analyzers, network/ spectrum analyzers, automated test equipment, RADAR, and PET scanners

High-Speed Comparators

Product ID	Channels	Response Time (μs)	Offset Voltage max, 25°C (mV)	Supply Voltage Range (V)	Supply Current Per Channel (mA)	Input Bias Current (μA)	Output Compatibility	Temperature Range (°C)	Packaging

RF Detectors and Clock Buffers

LMV221/LMH2100 – 50 MHz to 4 GHz 40 dB Logarithmic Power Detector for CDMA and WCDMA

Features

- 40 dB linear in dB power detection range
- Output voltage range 0.3 to 2V
- Shutdown pin
- Multi-band operation from 50 MHz to 3.5 GHz
- 0.5 dB accurate temperature compensation
- External configurable output filter bandwidth
- Available in LLP-6 packaging, 2.2 x 2.5 x 0.8 mm (LMV221)
- Available in micro SMD packaging, 0.85 x 1.25 x 0.6 mm (LMH2100)

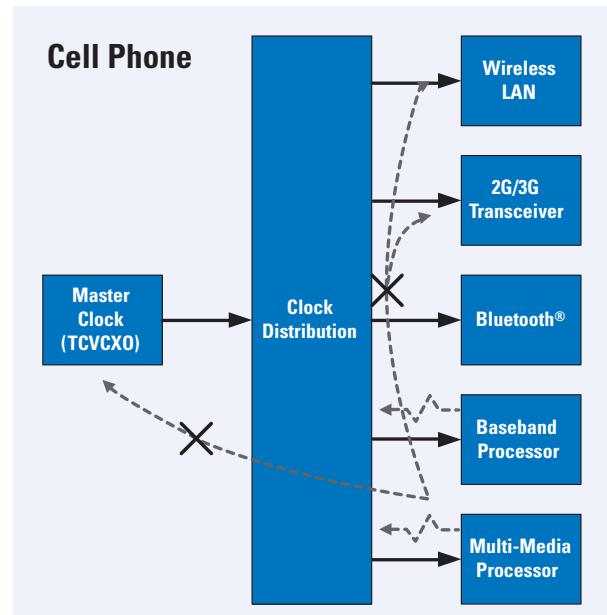

RF Detectors

Product ID	Application	Channels	Supply Voltage Range (V)	Dynamic Range (dB)	Frequency Range (MHz)	Packaging
LMV221	CDMA, WCDMA, GSM, GPRS	1	2.7 to 3.3	40	50 to 3500	LLP-6
LMV225	CDMA, WCDMA, GSM, EDGE, GPRS, TDMA	1	2.7 to 5	>30	450 to 2000	micro SMD-4, LLP-6
LMV226	CDMA, WCDMA, GSM, EDGE, GPRS, TDMA	1	2.7 to 5	>30	450 to 2000	micro SMD-4
LMV228	CDMA, WCDMA, GSM, EDGE, GPRS, TDMA	1	2.7 to 5	>30	450 to 2000	micro SMD-4

LMV243	GSM, GPRS, TDMA, LAN	1	2.7 to 3.3	50	450 to 2000	micro SMD-8

Master Clock Distribution in Cell Phones; Optimized Clock Distribution Solution

Features

- Proper clock distribution circuitry prevents increased bit error rate
- Isolates master clock from switching noise in digital modules
- Isolates sensitive modules from noise in other modules
- Preserves clock amplitude; high drive capability, minimal clock loading
- Prevents frequency pulling; constant clock load impedance under all conditions
- Preserves clock accuracy: low additive phase noise
- Low power consumption
- Tiny footprint

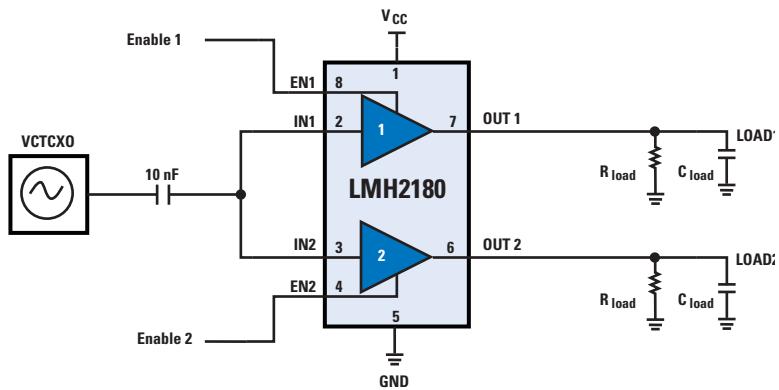

Clock Buffers

LMH2180 – 75 MHz Dual Analog Clock Buffer

Features

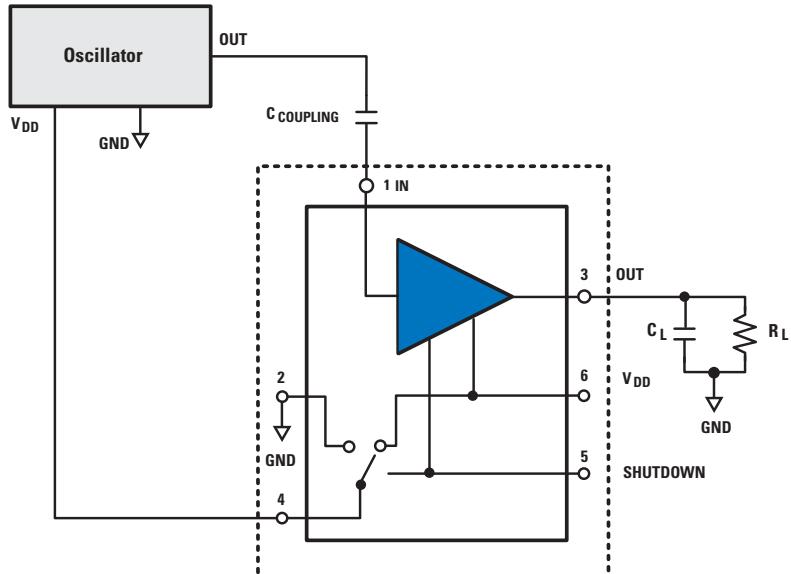

- Large signal -3dB BW at 1 V_{PP}: 60 MHz
- Slew rate: 106 V/μs
- Reverse isolation: 84 dB at 1 MHz, 50Ω source
- Channel isolation: >41 dB up to 100 MHz, 30 kΩ/10 pF load
- >20 mA output drive
- Phase noise (38.4 kHz, 1 Vpp input): -132 dBc/Hz at 10 kHz offset
- 1.2 mA/15 μA at 2.7V per channel
- Individual selectable shutdown
- Available in LLP-8 (3 mm x3 mm) and 8-bump micro SMD (1.25 mm x 1.25 mm)

LMV115 – 30 MHz Analog Clock Buffer

Features

- 30 MHz (<0.5 Vpp) VCTCXO buffer
- Shutdown feature for VCTCXO
- Slew rate 18V/μs
- 2.5V to 3.3V V_{CC}
- 300 μA I_{CC} at 2.8V, no load
- -40°C to +85°C operating range
- Available in SC70-6 packaging (2 mm x 2mm)

Product ID	Bandwidth	Channels	I _{sup}	Phase Noise	Slew Rate	Shutdown	Package
LMH2180	75 MHz	2	2.3 mA	-132 dBc/Hz, 10 kHz offset	106 V/μs	✓	LLP-8 micro SMD-8 (1.25 mm x 1.25 mm)
LMV112	40 MHz	2	1.6 mA	-116 dBc/Hz, 10 kHz offset	110 V/μs	✓	LLP-8
LMV115	30 MHz	1	0.3 mA	n/a	18 V/μs	✓	SC70-6
LMV116	45 MHz	1	0.6 mA	n/a	40 V/μs	—	SOT23-5
LMV118	45 MHz	1	0.6 mA	n/a	40 V/μs	✓	SOT23-6

LMH1980 – Auto-Detecting SD/HD/PC Video Sync Separator

Features

- Sync separation for NTSC, PAL, SECAM, 480i/P, 576i/P, 720P, 1080i/P, and VESA-compatible timing
- Composite Video (CVBS), S-Video (Y/C), Component Video (YPBPR/GBR) and PC Graphics (RGsB) Compatibility
- Bi-level and tri-level sync compatible
- HD detect output flag
- Automatic video format detection
- Fixed-level sync slicing of 0.5 V_{P-P} to 2 V_{P-P} video inputs
- 3.3V to 5V supply operation
- Available in tiny MSOP-10 packaging

Applications:

Ideal for use in consumer, professional, automotive and industrial video, video capture, editing and processing, genlock circuits, surveillance and security video systems, Set-Top Boxes (STB) and Digital Video Recorders (DVR), LCD / plasma displays and video projectors, machine vision and inspection systems, and video trigger oscilloscopes and waveform monitors

LMH1981 Lowest Jitter Sync Separator for High-Definition Video Formats Featuring 50% Sync Slicing

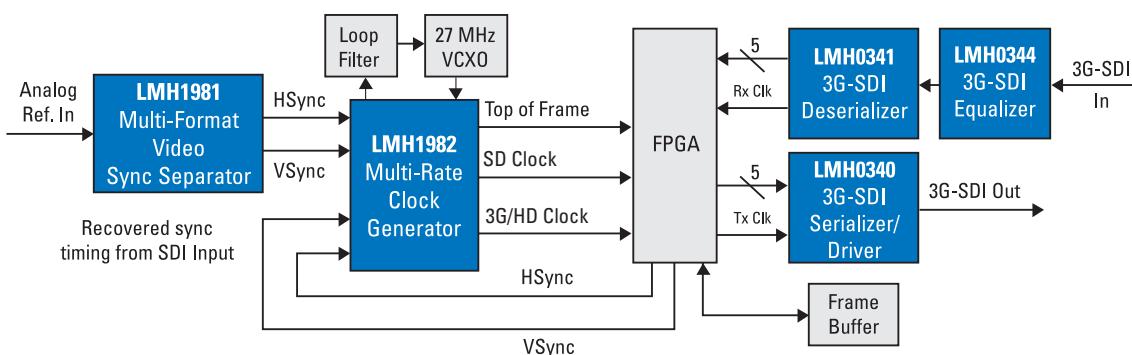

Features

- 50% sync slicing
- Low-jitter horizontal sync outputs
- Supports NTSC, PAL, SECAM, 480i/p, 576i/p, 720p, 1080i/p
- Accepts video signals from 0.5 V_{P-P} to 2.0 V_{P-P}
- No external programming with µC required
- Horizontal sync output propagation delay < 50 ns
- 3.3V or 5V single supply operation
- 31 mW typical power dissipation

LMH1982 – 3G/HD/SD Video Clock Generator with Genlock

Features

- Two reference ports for genlocking the outputs
 - H and V sync inputs for NTSC/525i, PAL/625i, 525p, 625p, 720p, 1080i, 1080p video timing
- Simultaneous SD and 3G/HD LVDS compatible clock outputs
- Achieves low jitter output clocks capable of directly driving FPGA serializers with no additional clock cleansing required
- Genlock or free run mode operation
- Programmable output top-of-frame pulse
- Supports cross locking

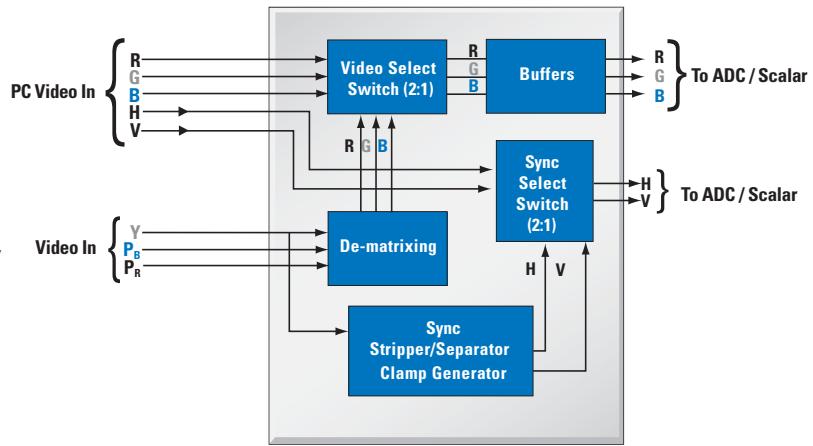

Analog Video Products

LMH1251 – Analog Video Converter for Converting HD Video to RGB Composite Video

Features

- YPBPR to RGBHV conversion within 1% accuracy
- YPBPR path: 70 MHz, -3 dB bandwidth
- RGB path: 400 MHz, -3 dB bandwidth
- Sync separator and processor
- Supports PC video display resolutions up to UXGA (1600 x 1200 at 75 Hz)
- Smart video format detection for 480i, 480p, 576i, 576p, 720p, 1080i, and 1080p
- Power-save mode
- Integrated 2:1 mux
- Available in TSSOP-24 packaging

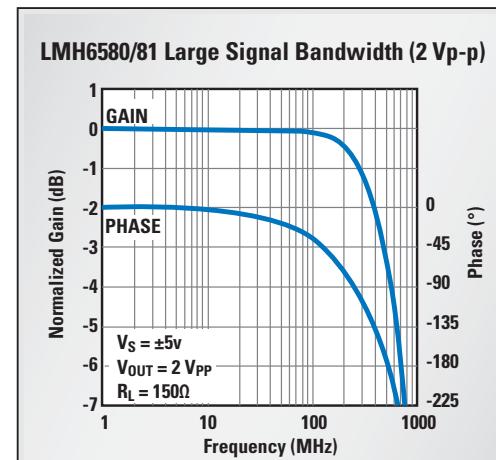

Applications:

Ideal for use in TFT LCD monitors, set-top boxes, projectors, video format conversion systems, video editing and broadcast equipment, and CRT displays

LMH6580/81 – 8 x 4, 500 MHz Analog Crosspoint Switch, Gain of 1, Gain of 2

Features

- 8 inputs and 4 outputs
- 500 MHz -3 dB bandwidth
- 1700 V/μs slew rate
- -70/-52 dBc channel-to-channel crosstalk (10/100 MHz)
- -55/-45 dBc all hostile crosstalk (10/100 MHz)
- Easy to use 4-wire serial programming
- Flexible programming modes: serial and addressed mode
- Symmetrical pinout facilitates expansion
- Two gain options: $A_V = 1$ or $A_V = 2$
- Available in TQFP-48 packaging

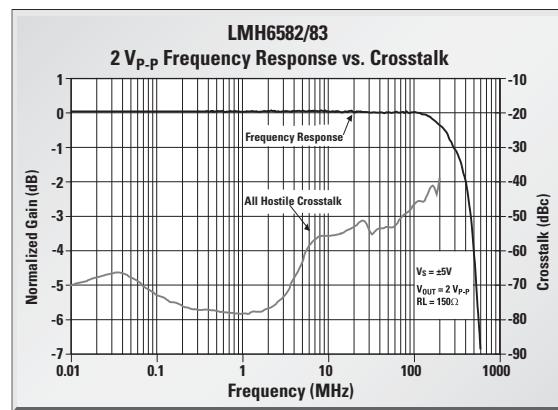

Applications:

Ideal for use in studio monitoring/production video systems, conference room multimedia video systems, KVM (keyboard video mouse) systems, security/surveillance systems, multi antenna diversity radio, video test equipment, medical imaging, and wide-band routers and switches

LMH6582/83 – 550 MHz, 16 x 8 Crosspoint Switches

Features

- 16 inputs, 8 outputs
- 550 MHz, -3 dB bandwidth
- Fast slew rate: 1900 V/ μ s
- 100 MHz, 0.1 dB gain flatness
- All hostile crosstalk
 - -64 dBc at 5 MHz
 - -46 dBc at 100 MHz
- $A_v = +1/+2$
- Ease of control: 4-pin serial interface
- Available in TQFP-64 exposed pad packaging

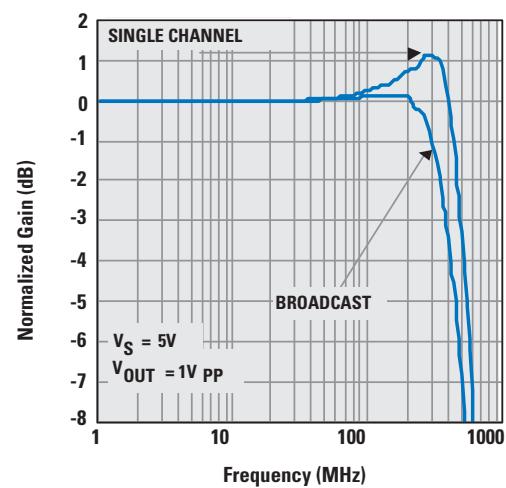

LMH6584/85 – 400 MHz, 32 x 16 Crosspoint Switches

A_v1 and A_v2

Features

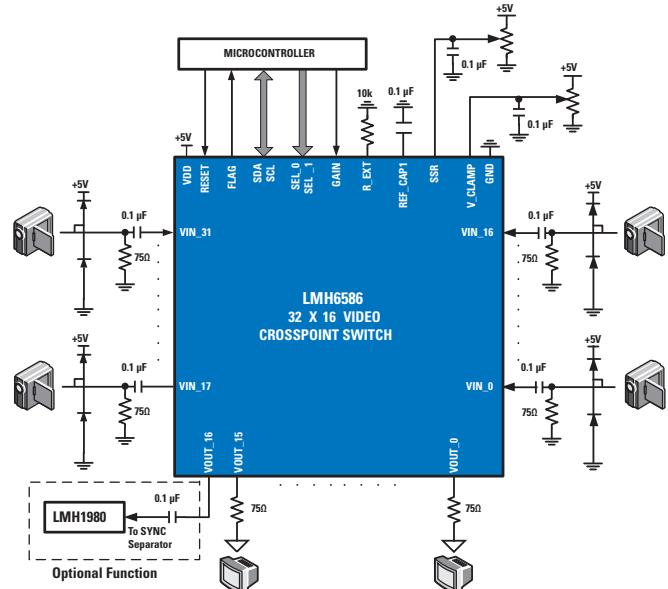

- 32 inputs, 16 outputs
- 400 MHz, -3 dB bandwidth
- Fast slew rate; 1200 V/ μ s
- All hostile crosstalk
 - -52 dBc at 10 MHz
 - -46 dBc at 100 MHz
- Available in LQFP-144 packaging

LMH6586 32 x 16 Video Crosspoint Switch

Features

- 32 x 16 non-blocking switch with buffered inputs and outputs
- Video detect with 8 adjustable programmable threshold levels
- Input video clamp
- Sync detect with adjustable programmable threshold level
- Extra video output for external sync separator (OUT16)
- Selectable output buffer gain (+1V/V or +2V/V)
- Individually addressable outputs
- I²C-compatible interface with 2-bit programmable slave address
- -3 dB bandwidth = 66 MHz
- DG = 0.05%, DP = 0.05° at $R_L = 150\Omega$
- -70 dB off-isolation at 6 MHz
- Single +5V supply operation
- Input and output amp power shutdowns

Analog Video Products

LMH6733/34 – Single Supply, Ultra High-Speed Triple Op Amps

Features

- Energy-efficient PowerWise® product (LMH6733)
- 1 GHz –3 dB small signal bandwidth ($A_V = +1$, $V_S = \pm 5V$)
- 650 MHz –3 dB small signal bandwidth ($A_V = +2$, $V_S = 5V$)
- 3750 V/ μ s slew rate
- Low supply current (5.5 mA per op amp, $V_S = 5V$)
- 70 mA linear output current
- 2.1 nV/ $\sqrt{\text{Hz}}$ input noise voltage
- CMIR and output swing to 1V from each supply rail
- Selectable gain buffer integrates gain setting resistors, $A_V = -1, +1, +2 \text{ V/V}$ (LMH6734)
- Supply range 3 to 12V single supply

Applications:

Ideal for use in HDTV component video driver, high resolution projectors, flash A/D driver, D/A transimpedance buffer, wide dynamic range IF amp, RADAR/communication receivers, DDS post-amps, wide-band inverting summer, and line driver applications

 PowerWise product

3:1 UXGA Mux Using Three LMH6733 Devices

LMP2021/22 – Single/Dual, Zero-Drift, Low-Noise, EMI-Hardened Op Amp

Features

- Low guaranteed VOS over temperature 5 µV
- TCVOS guaranteed: 20 nV/°C (max)
- Low noise with no 1/f, 12 nV/ $\sqrt{\text{Hz}}$ at 1000V/V
- High CMRR (139 dB) and PSRR (130 dB)
- High AVOL 160 dB
- Wide gain bandwidth product 5 MHz
- High slew rate 2.6 V/µs
- Low supply current 1.10 mA
- Available in SOIC-8, SOT23-5, and MSOP-8 packaging

Applications:

Ideal for use in medical, industrial, test and measurement, scales and weigh stations, PC, automotive, and telecommunications

 PowerWise product

Precision Amplifiers

LMP7731/32 – Low-Noise, Precision, RRI/O Op Amps

Features

- 2.9 nV/ $\sqrt{\text{Hz}}$ input voltage noise
- Offset voltage $\pm 40 \mu\text{V}$ (max)
- CMRR 130 dB
- Open loop gain 130 dB
- Slew rate 2.4 V/ μs
- 0.001% THD at $f = 10 \text{ kHz}$, $AV = 1$, $RL = 2 \text{ k}\Omega$

Applications:

Ideal for use in thermopile amplifiers, gas analysis instruments, photometric instrumentation, and medical instrumentation

¹National's Current Sense Amplifiers are 100% Production Tested at -40 to +125° C, TcVos is guaranteed by test

LMP8601/1Q – High Common Mode, 60V, Current Sensing Precision Difference Amplifier

Features

- LMP8601Q is an automotive-grade product that is AECQ100 grade 1 qualified
- CMVR at
 - V_S = 3.3V to 4V to 27V
 - V_S = 5.0V to 20V to 60V
- Bidirectional current sense capability
- Supply voltage 3.0V to 5.5V
- Supply current 1 mA
- Input offset voltage 1 mV max
- TcVos 10 µV/°C max, by test
- CMRR 80 dB min
- Output voltage swing rail to rail
- Bandwidth 60 kHz
- Operating temperature range ambient -40°C to 125°C

High-Side Current Sensing Application

Applications:

Ideal for use in automotive fuel injection control, transmission control, accelerometers, high-side and low-side drivers, configuration current sensing, power management systems, and current loop to voltage conversion applications

Low-Voltage Amplifiers

 PowerWise product

Micropower Amplifiers

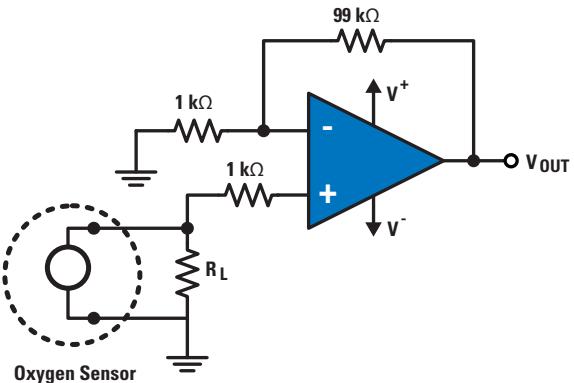

LMP2231/32/34 – Single/Dual/Quad Micropower Precision Op Amps with CMOS Inputs

Features

- Operating voltage range: 1.6V to 5.5V
- PSRR: 120 dB
- CMRR: 97 dB
- Open loop gain: 120 dB
- Gain bandwidth product: 130 kHz
- Slew rate: 58 V/ms
- 60 nV/ $\sqrt{\text{Hz}}$ input voltage noise, $f = 1 \text{ kHz}$

Applications:

Ideal for use in precision instrumentation amplifiers, battery-powered medical instrumentation, high-impedance sensors, strain gauge bridge amplifiers, and thermocouple amplifiers

Shutdown Amplifiers

LMP8100 – Programmable Gain Amplifier Delivers 0.03% Accuracy Over Temperature and Gain Settings

Features

- Unmatched gain accuracy for every gain setting enables accurate signal conditioning from -40°C to +125°C
- Gain range 1 to 16 V/V in 1 V/V steps enables flexible and fine gain adjustments
- Programmable frequency compensation increases usable bandwidth for all gain settings
- Input zero calibration switch allows output offset voltage measurement and calibration
- Glitch-free transition between programmed settings eliminates errors
- 12 nV/ $\sqrt{\text{Hz}}$ input noise voltage accurately signal conditions in near DC-sensor applications
- Ideal match for 12-bit, 1-channel ADCs up to 1 MSPS
- Available in SOIC-14 packaging

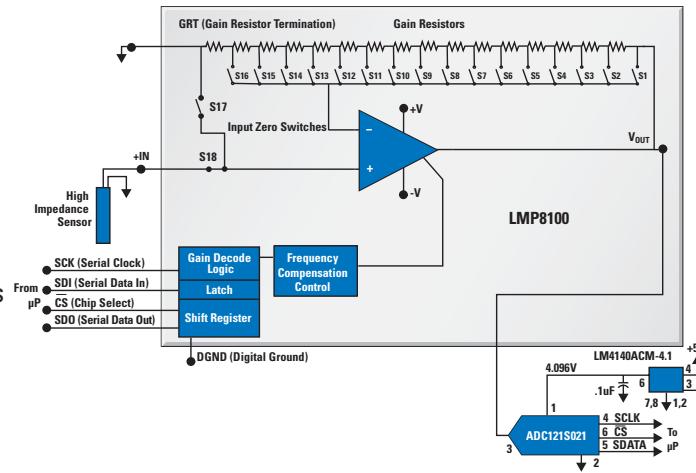

Applications:

Ideal for use in industrial instrumentation, sensor interface, data acquisition, test equipment, and gain control applications

Precision and EMI-Hardened Amplifiers

LMP7721 – 3 fA Input Bias Current Precision Amplifier

Features

- Input bias current ($V_{CM} = 1V$)
 - $\pm 20 \text{ fA}$ at 25°C (max)
 - $\pm 900 \text{ fA}$ at 85°C (max)
- $6.5 \text{ nV}/\sqrt{\text{Hz}}$ input voltage noise, $f = 1 \text{ kHz}$
- Supply current 1.3 mA
- Gain bandwidth: 17 MHz
- Slew rate (falling edge) $12.76 \text{ V}/\mu\text{s}$
- Supply voltage 1.8V to 5.5V
- Available in SOIC-8 packaging

Applications:

Ideal for use in photodiode amplifiers, high-impedance sensor amplifiers, ion chamber amplifiers, electrometer amplifiers, pH electrode amplifiers, and transimpedance amplifiers

LMV831/32 – 3 MHz Low-Power CMOS, EMI-Hardened Operational Amplifiers

Features

Unless otherwise noted, typical values at $T_A = 25^\circ\text{C}$, $V_+ = 3.3\text{V}$

- Supply voltage 2.7V to 5.5V
- Supply current (per channel) $240 \mu\text{A}$
- Input offset voltage 1 mV max
- Input bias current 1 pA
- GBW 3.3 MHz
- EMIRR at 1.8 GHz 120 dB
- Input noise voltage at 1 kHz $12 \text{ nV}/\sqrt{\text{Hz}}$
- Slew rate $2 \text{ V}/\mu\text{s}$
- Output voltage swing rail to rail
- Output current drive 30 mA
- Operating temperature range ambient -40°C to 125°C

Applications

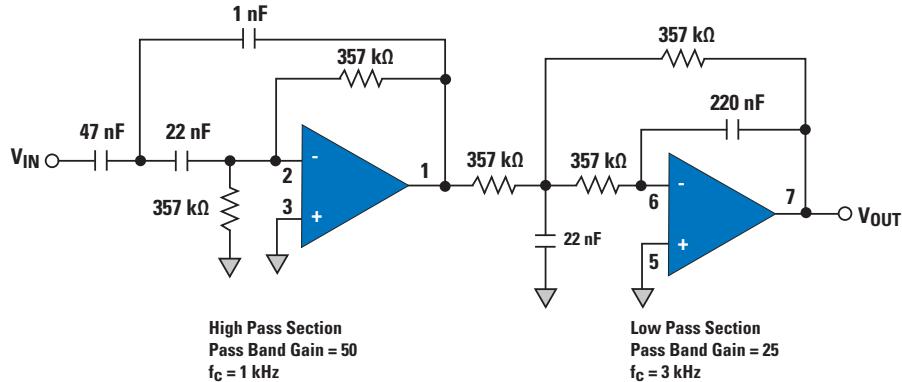

Ideal for use in photodiode preamps, piezoelectric sensors, portable/battery-powered electronic equipment filters/buffers and PDAs/phone accessories

Low-Voltage, Low-Noise Operational Amplifiers

LMV716 – 5 MHz, Low-Noise, Dual Op Amp with CMOS Input

Features

- Input noise voltage $12.8 \text{ nV}/\sqrt{\text{Hz}}$
- Input bias current 0.6 pA
- Offset voltage 1.6 mV
- CMRR 80 dB
- Open loop gain 122 dB
- Rail-to-rail output
- Gain bandwidth 5 MHz
- Slew rate $5.8 \text{ V}/\mu\text{s}$
- Supply current 1.6 mA
- Supply voltage range 2.7V to 5V
- Available in MSOP-8 packaging

Applications:

Ideal for use in active filters, transimpedance amplifiers, audio preamps, and HDD vibration cancellation circuitry

NEW!

±15V Supply Amplifiers

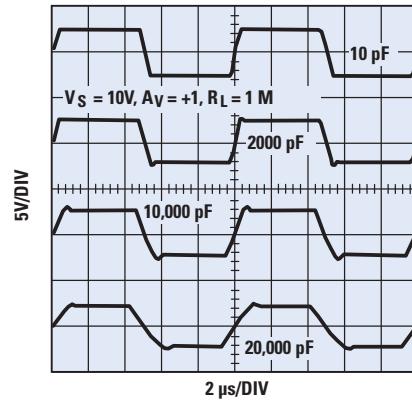

LM7332 – Dual RRIO, 30V Wide Voltage Range Operational Amplifier

Features

($V_+ = 10V$, $T_A = 25^\circ C$, typical values unless specified.)

- Wide supply voltage range 2.5V to 32V
- Wide input common mode voltage 0.3V beyond rails
- Output short circuit current ± 120 mA
- Output current (1V from rails) ± 65 mA
- GBWP 19 MHz
- Slew rate 15 V/ μ s
- Capacitive load tolerance unlimited
- Supply current/channel 0.75 mA
- Temperature range $-40^\circ C$ to $+125^\circ C$
- Voltage offset 100% tested at 5V, $\pm 5V$, 30V

Large Signal Step Response for Various Capacitive Loads

Mixed-Signal Subsystems/Audio Codecs

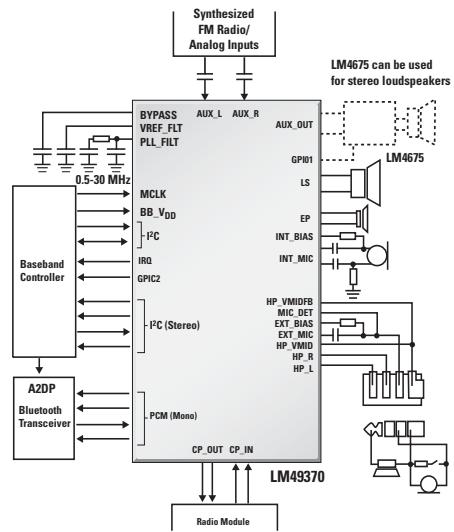

LM49370 – PowerWise® Audio Codec Subsystem with Ultra-Low EMI, Class D Amplifier, and a PCM Interface for Bluetooth® Transceivers

Features

- Spread spectrum Class D architecture reduces EMI
- Mono Class D 8Ω amplifier, 490 mW at 3.3V
- OCL or AC-coupled headphone operation
- 33 mW stereo headphone amplifier at 3.3V
- 115 mW earpiece amplifier at 3.3V
- Digital 3D stereo enhancement
- Total harmonic distortion: 0.04%
- Available in micro SMDxt-49 packaging (4 x 4 mm)

Applications:

Ideal for use in smart phones, mobile phones and multimedia terminals, PDAs, Internet appliances and portable gaming, portable DVD/CD/AAC/MP3 players, and digital cameras/camcorders

LM49450 – 2.2W Stereo Boomer® Class D Audio Subsystem

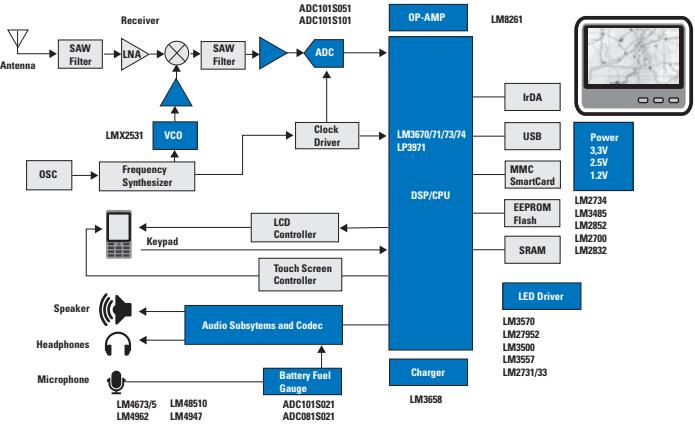

Features

- 24-bit stereo DAC
- Selectable spread spectrum mode reduces EMI
- Ground-referenced headphone amplifiers with 100 dB SNR
- I²S-compatible audio interface; I²C-compatible control interface
- Audio sample rates up to 192 kHz
- Click-and-pop suppression
- Micro-power shutdown

Applications:

Ideal for use in personal media/MP3 players, portable navigation, digital still/video cameras, mobile phones, and VoIP devices

Handheld GPS Navigation

Product ID	Description	Mono Input Ch.	Stereo Input Ch.	Class D Speaker Driver	Packaging

PowerWise® product

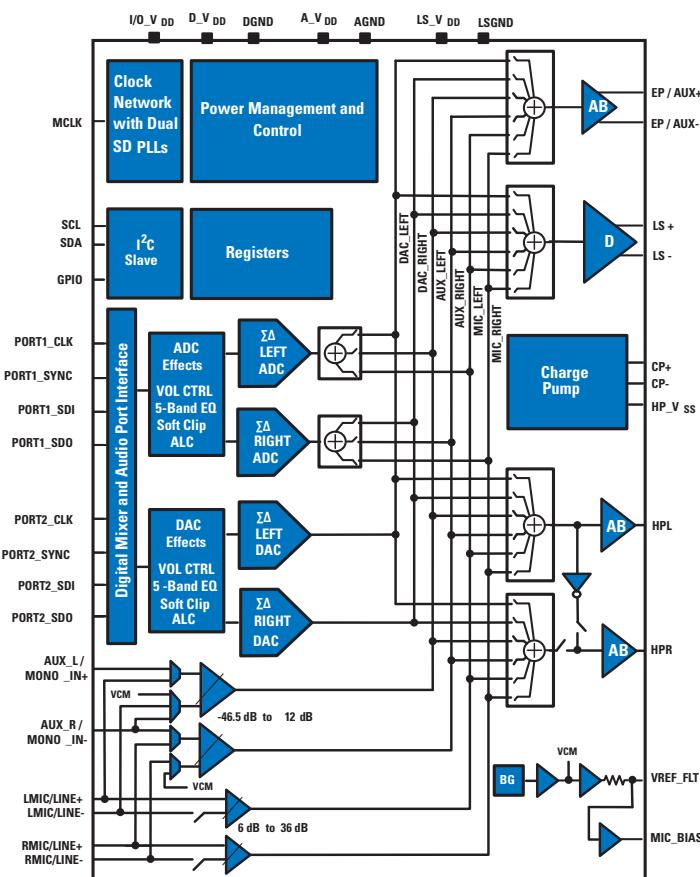

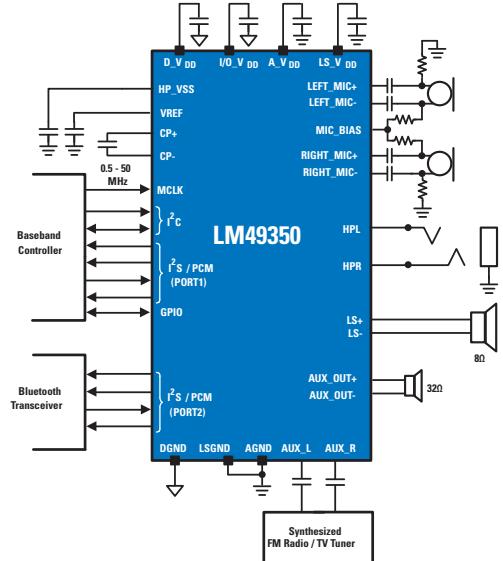

LM49350 – High-Performance Audio Codec Subsystem with a Ground-Referenced Stereo Headphone Amplifier and Ultra-Low EMI Class D Loudspeaker Amplifier with Dual I²S/PCM Digital Audio Interfaces

Features

- High-performance 96 dB SNR stereo DAC and ADC
- Up to 192 kHz stereo audio playback
- Up to 48 kHz stereo recording
- Dual bidirectional I²S- or PCM-compatible audio interfaces
- Dual 5-band parametric equalizers
- ALC/compressor/limiter on both DAC and ADC paths
- Ultra-low EMI, Class D loudspeaker amplifier with spread spectrum control
- Ground-referenced output cap-less headphone amplifier operation

Applications

Ideal for use in smart phones, mobile phones, VOIP phones, portable GPS, portable gaming devices, and digital cameras/camcorders

Analog Subsystems

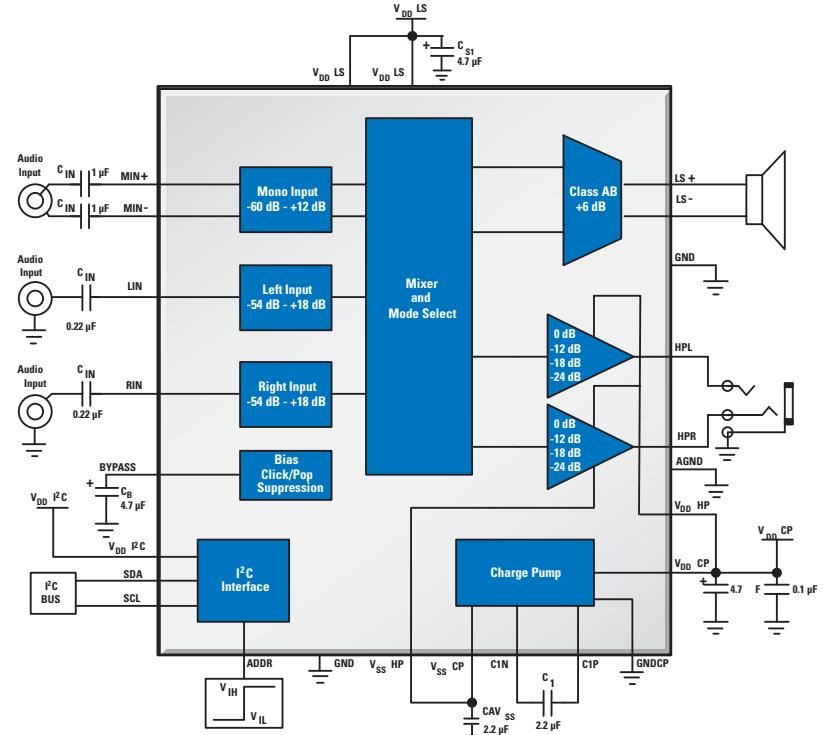

LM49100 – PowerWise® Mono Class AB Audio Subsystem with a True-Ground Headphone Amplifier

Features

- Very low power consumption
 - 5 mA IDQ with speaker and headphone enabled
 - Mono and stereo inputs
 - Thermal overload protection
 - Total harmonic distortion: 0.035%
 - I²C-compatible control interface
 - Input mute attenuation
 - 2nd stage headphone attenuator
 - 32-step digital volume control
 - Ten operating modes
 - Minimum external components
 - Click-and-pop suppression
 - Micro-power shutdown
 - RF suppression
 - Available in space-saving GR-25 packaging
(3 x 3 mm)

Applications:

Ideal for use in mobile phones, personal media / MP3 players, portable navigation, laptops, and VoIP devices

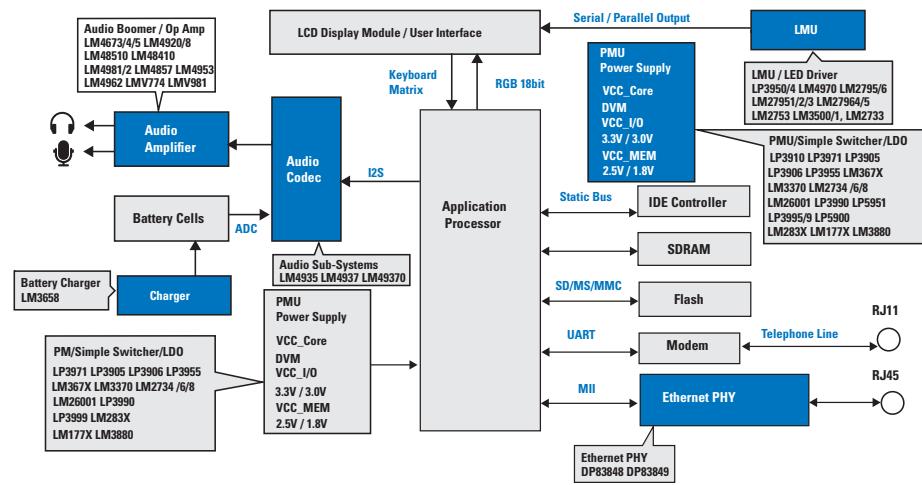

LM49250 – Stereo Boomer® Class D Audio Subsystem with Ground-Referenced Headphone Amplifier and Mono Earpiece

Features

- Output short circuit protection
 - Thermal overload protection
 - Spread spectrum modulation
 - I²C-compatible control interface
 - Total harmonic distortion: 0.01%
 - RF suppression
 - Click-and-pop suppression
 - Micro-power shutdown
 - Available in space-saving micro SMD-36 packaging

Personal Media Player

Applications:

Ideal for use in mobile phones, personal media/MP3 players, portable navigation, and VoIP devices

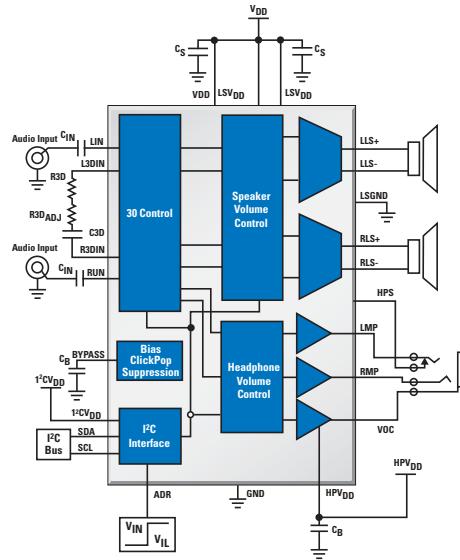

LM49270 – Boomer® Filterless 2.2W Stereo Class D Audio Subsystem with OCL Headphone Amplifier, 3D Enhancement, and Headphone Sense

Features

- Stereo filterless Class D amplifier
- Selectable OCL/CC headphone amplifier
- Headphone sense ability
- National's 3D enhancement
- RF suppression
- I²C-compatible control interface
- 32-step digital volume control
- Total harmonic distortion: 0.02%
- Available in space-saving LLP-28 packaging

Applications:

Ideal for use in portable media players, smart phones, PDAs, and laptops

PowerWise® product

Noise Reduction

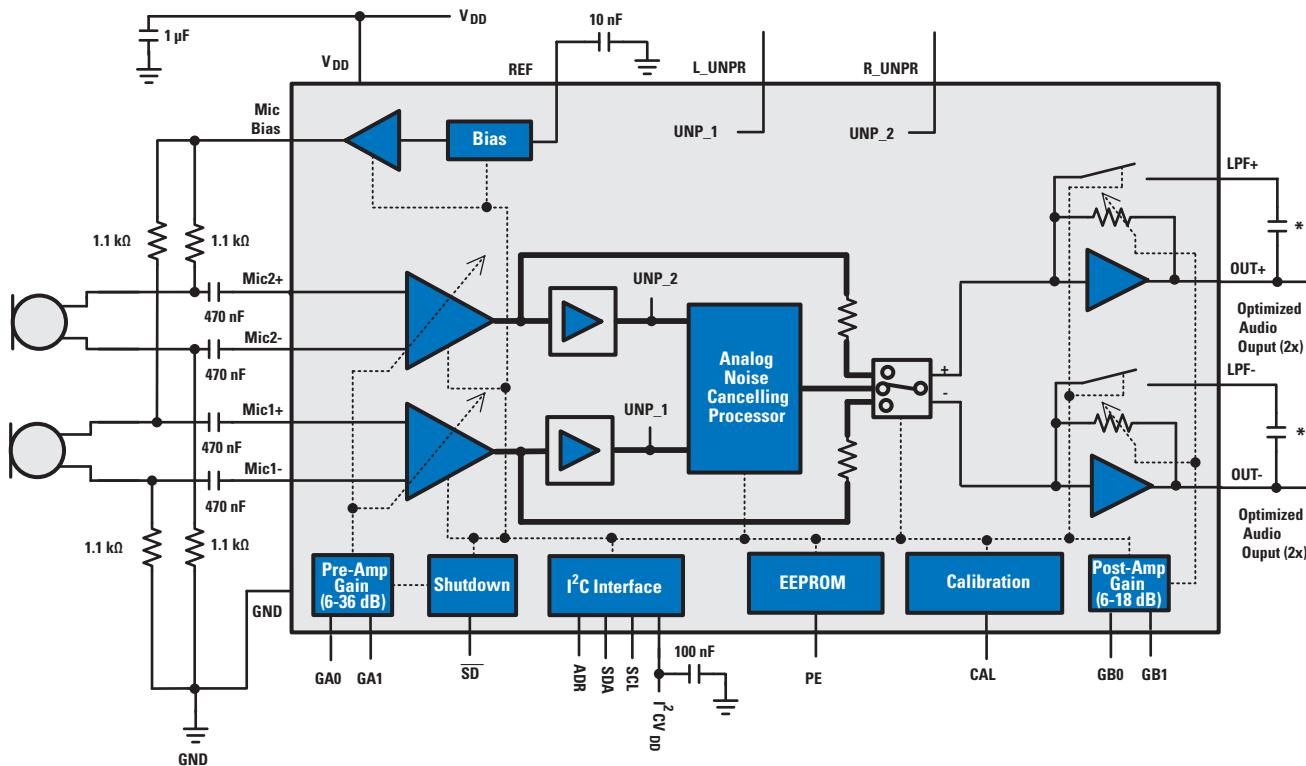

LMV1088/89 – Far Field Noise Suppression Microphone Amplifier

Features

- First analog noise suppression solution
- Up to 20 dB of far field acoustic noise suppression
- Low 1 mA current consumption (1/10th of DSP solution)
- Automatic microphone calibration feature
- Calibration data stored in EEPROM
- Available in micro SMD-36 package (3.5 mm x 3.5 mm)

Applications

Ideal for use in mobile handsets, headsets, and two-way radios

Noise Reduction Microphone Amplifiers

Product ID	Description	Output	SNR (dB)	PSRR (dB)	Shutdown	Supply Voltage Range (V)	Packaging
LMV1088	Noise reduction mic amp	Single-ended	60	85	—	2.7 to 5.5	micro SMD-36
LMV1089	Noise reduction mic amp	Differential	65	96	✓	2.7 to 5.5	micro SMD-36

Microphone Amplifiers

LMV1012/32 – Amplifiers for Electret Microphones

LMV1012 Amplifier Features

- Improved gain of 25 dB over common JFET
- Lower THD: 0.5%
- Better SNR: >55 dB
- 2-wire interface/connectivity
- Available in the world's thinnest micro SMD-4 packaging

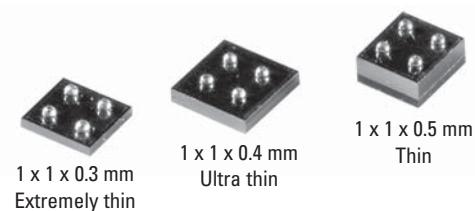

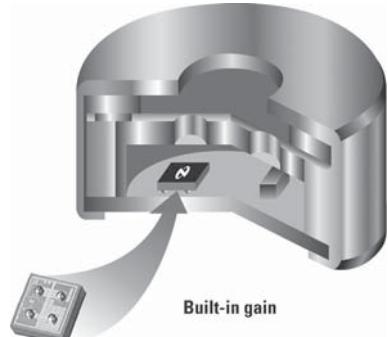

LMV1032 Amplifier Features

- Low-supply current: <60 μ A
- Low-output impedance: 200 Ω
- SNR: >55 dB
- Improved gain of 6 dB over common JFET
- 3-wire interface/connectivity

Applications:

Ideal for use in mobile communications, automotive communications, PDAs, and accessory microphone products

Next-Generation Electret Condenser Microphone (ECM)

Amps for Mics

OCL/CC Headphone Boomer® Amplifiers

LM4916 – 1.5V, Mono 85 mW BTL Output, 14 mW Stereo Headphone Audio Amplifier

Features

- Single-cell 0.9V to 2.5V battery operation
- BTL mode for mono speaker
- Single-ended headphone operation with coupling capacitors
- Unity-gain stable
- Click-and-pop suppression circuitry
- Active-low micropower shutdown
- Low current, active-low mute mode
- Thermal shutdown protection circuitry

Applications

Ideal for use in portable one-cell audio products and electronic devices

OCL/CC Headphone Boomer Amplifiers

PowerWise® product

Ground-Referenced Headphone Boomer® Amplifiers

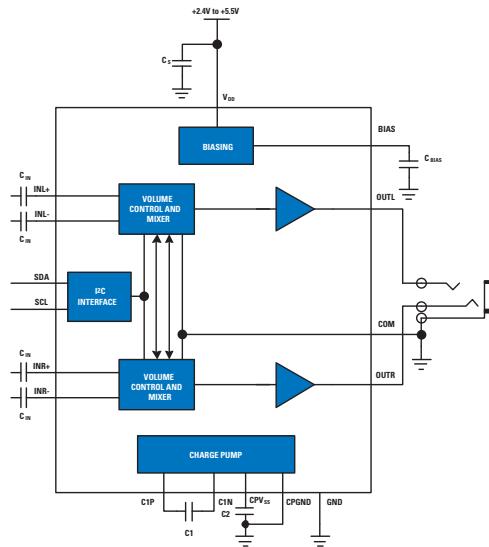

LM48822 – Ground-Referenced, Ultra-High PSRR, Ultra-Low Noise, 35 mW/Channel Stereo Headphone Amplifier with Common-Mode Sense, and I²C-compatible Volume Control

Features

- Ground-referenced outputs – eliminates output-coupling capacitors
- Common-mode sense
- Ultra-high PSRR
- I²C-compatible volume and mode control
- High-output impedance in shutdown
- Differential inputs
- Advanced click-and-pop suppression
- Low supply current
- Minimum external components
- Micro-power shutdown
- Available in space-saving 16-bump micro SMD packaging

Applications:

Ideal for use in mobile phones, PDAs, notebook PCs, portable electronic devices, and MP3 players

LM48860 – Ground-Referenced, Ultra-Low Noise, Fixed-Gain, Stereo Boomer® Headphone Amplifier

Features

- Fixed logic levels
- High PSRR
- Ultra-low current shutdown mode
- No output coupling capacitors, snubber networks, bootstrap capacitors, or gain-setting resistors required
- Shutdown either channel independently
- Click-and-pop circuitry eliminates noises
- Available in space-saving micro SMD-12 packaging

Applications:

Ideal for use in mobile phones, personal media/MP3 players, PDAs, laptops, and other portable electronic devices

PowerWise product

High-Efficiency Boomer® and Overture® Class D Amplifiers

LM48411 – Ultra-Low EMI, Filterless, 2.5W, Stereo, Class D Audio Power Amplifier with E²S

Features

- E²S system reduces EMI preserving audio quality and efficiency
- Output short circuit protection
- No output filter required for inductive loads
- Logic selectable gain
- Independent shutdown control
- Minimum external components
- Click-and-pop suppression circuitry
- Micro-power shutdown mode
- Available in space-saving micro SMD-16 packaging (0.5 mm pitch)

Applications:

Ideal for use in mobile phones, PDAs, and other portable electronic devices

Boosted Boomer® Moving Coil

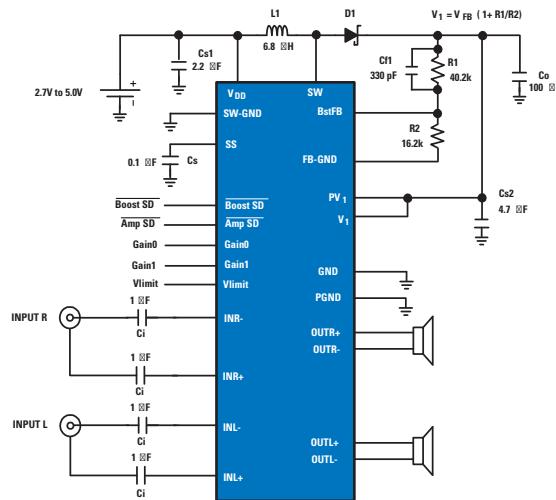

LM48520 – Boosted Stereo Class D Audio Power Amplifier with Output Speaker Protection and Spread Spectrum

Features

- Click-and-pop suppression
- Low 0.04 μ A shutdown current
- 78% efficiency
- Filterless Class D
- 2.7V to 5.0V operation
- 4 Adjustable gain settings
- Adjustable output swing limiter with soft clipping
- Speaker protection
- Short circuit protection on audio amps
- Independent boost and amplifier shutdown pins

Applications:

Ideal for use in mobile phones, PDAs, portable media, cameras, and handheld games

PowerWise® product

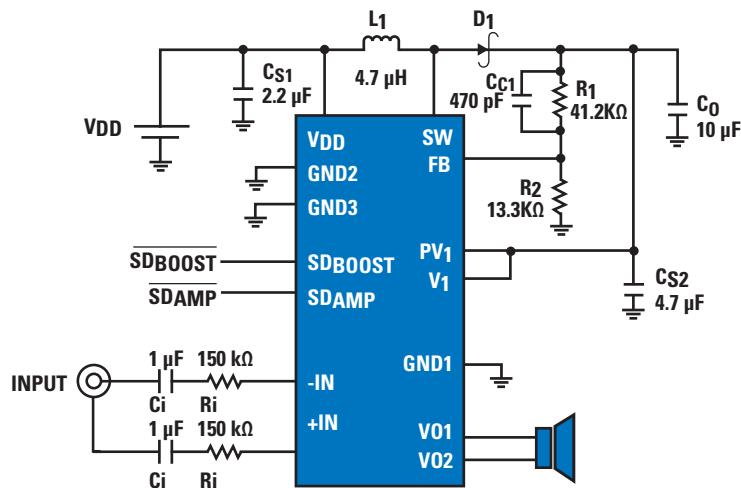

LM48510 – PowerWise® Boosted Boomer Class D Audio Power Amplifier

Features

- Click-and-pop suppression
- Low 0.01 μ A shutdown current
- 76% efficiency
- Filterless Class D
- 2.7V to 5.0V operation (V_{DD})
- Externally configurable gain on Class D
- Very fast turn on time: 17 μ s
- Independent boost and amplifier shutdown pins

Applications:

Ideal for use in mobile phones, PDAs, portable media, cameras, and handheld games

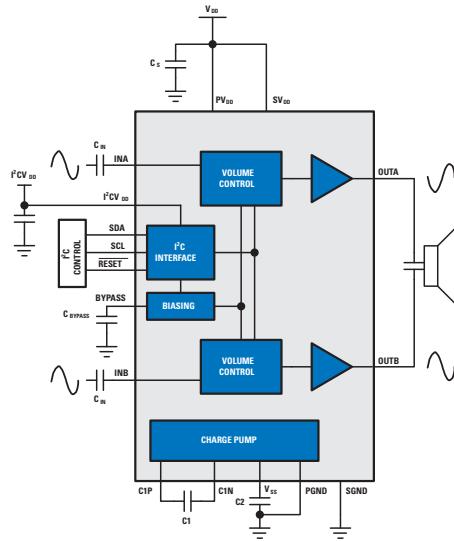

Boosted Boomer® Piezo Ceramic

LM48823 – Mono, Bridge-Tied Load, Ceramic Speaker Driver with I²C-compatible Volume Control and Reset

Features

- Integrated charge pump
- Bridge-tied load output
- High PSRR
- I²C-compatible volume and mode control
- Reset input
- Advanced click-and-pop suppression
- Low supply current
- Minimum external components
- Micro-power shutdown
- Available in space-saving micro SMD-16 packaging

Applications:

Ideal for use in cell phones, smart phones, portable media devices, and notebook PCs

Boosted Boomer Piezo Ceramic

Product ID	Description	THD (%)	Output Voltage (V _{P-P})	Condition	Packaging
LM4802B	12 V _{P-P} boosted ceramic speaker driver	0.05	12	V _{DD} =4.2V, 2 μF + 30Ω, THD ≤ 1%	LLP-28

Mono Boomer® Audio Amplifiers

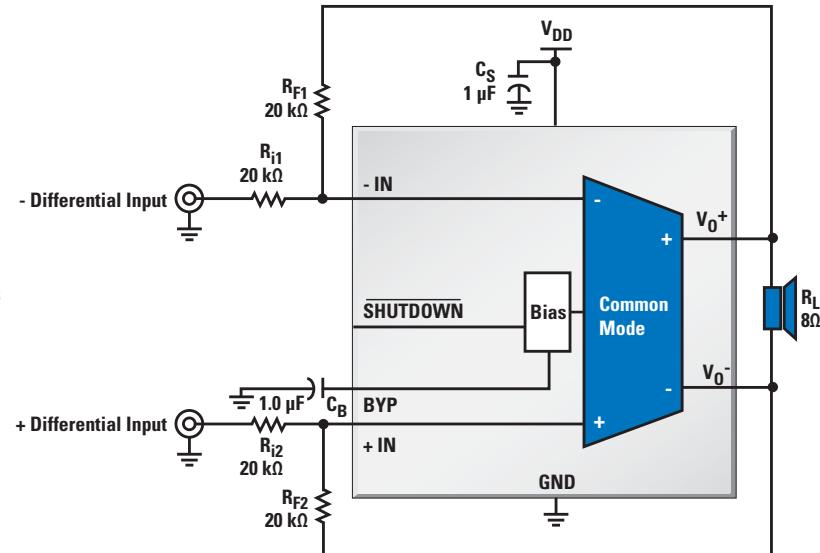

LM4941 – PowerWise® Boomer 1.25 Watt Fully Differential Audio Power Amplifier with RF Suppression and Shutdown

Features

- Improved RF suppression, by up to 20 dB over previous designs in selected applications
- Fully differential amplification
- Available in space-saving micro SMD package
- Ultra low current shutdown mode
- Can drive capacitive loads up to 100 pF
- Improved click-and-pop circuitry eliminates noises during turn-on and turn-off transitions
- 2.4 to 5.5V operation
- No output coupling capacitors, snubber networks or bootstrap capacitors required

Applications:

Ideal for use in mobile phones, PDAs, and portable electronic devices

Fully Differential Mono Boomer Amplifier

Product ID	Description	THD (%)	Output Power at 1% THD+N V _{CC} = 5V		Packaging
			4Ω (W)	8Ω (W)

Stereo Boomer® Audio Amplifiers

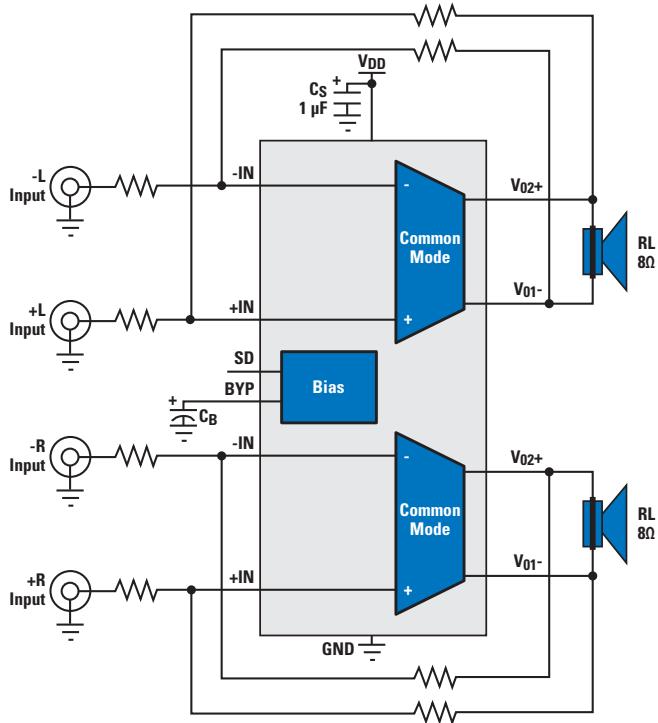

LM4928 – 1.2W, Stereo Fully Differential Audio Amplifier with RF Suppression

Features

- RF suppression circuitry
- Fully differential amplification
- Ultra-low current shutdown mode
- Can drive capacitive loads up to 100 pF
- Click-and-pop circuitry
- 2.4 to 5.5V operation
- No output coupling capacitors, snubber networks, or bootstrap capacitors required
- Available in space-saving micro SMD-16 and LLP-14 packaging

Applications:

Ideal for use in portable equipment, battery-powered systems, sensors, instrumentation, and automotive applications

Stereo Boomer Amplifiers

Product ID	Description	THD (%)	Output Power THD ≤ 1%, V _{VCC} = 5V		Packaging
			4Ω (W)	8Ω (W)

LM4570	Haptic motor driver	2.4 to 5.5	1.9	2.4	192	Low	LLP-8

Choosing an Audio Power Amplifier

Selecting an appropriate audio power IC for a particular application is dependent upon the desired output power, its corresponding THD specification, a specified load impedance, and available voltage supply rails. With the varying output power specifications stated by IC manufacturers, and the variables mentioned above, choosing the correct IC is sometimes difficult. The following paragraphs are intended to simplify the decision making process by explaining the general issues with specifying output power with respect to THD and some of the other variables mentioned above.

Power may be represented in many forms, but for general purposes, power is based on the current through a resistance multiplied by the voltage drop across that resistance, as shown in *Equation 1*.

$$(1) P = VI$$

Two other equivalent forms of the same equation based on either the voltage or current are shown in *Equations 2* and *3*, respectively.

$$(2) P = V^2/R$$

$$(3) P = I^2R$$

The output power of an audio IC can be represented by any of the preceding equations, and depending upon the measurement device, the output voltage or current can be represented as peak or root-mean-square (rms) amplitude. It is an industry standard to evaluate linear systems with a sinewave whose rms voltage can be obtained through *Equation 4*.

$$(4) V_{rms} = \sqrt{[(1/T)\int v(t)dt]} \text{ from } t=0 \longrightarrow t=T$$

Deriving the above equation for one period of a sinewave [$v(t) = V_{pk}\sin(\omega t)$] results in *Equation 5*.

$$(5) V_{rms} = V_{pk}/\sqrt{2}$$

The industry standard continuous average output is found by using the output rms voltage, as shown in *Equation 6*.

$$(6) P_{o rms} = V_{rms}^2/R_L$$

If the same output power is to be obtained using the peak output voltage as seen on an oscilloscope, then

Equation 5 should be substituted into *Equation 6*, resulting in *Equation 7*.

$$(7) P_{o rms} = V_{pk}^2/2R_L$$

Equation 6 or *7* are the most general equations stating the output power of a power IC based on a sinewave output into pure resistance. All of the above equations would change if the signal form changed or the load included some form of reactance. It should also be noted that if the peak output voltage were used directly into *Equation 2*, then a peak output power rating would result. This nonstandard technique misleads customers into thinking that a part is capable of much more than what is really true. System design engineers therefore may have a difficult time distinguishing between the different power ratings stated by semiconductor manufacturers. Every output power rating of an audio IC has a corresponding Total Harmonic Distortion (THD) specification that states the quality of music reproduction by the device. The more linear an amplifier is, the lower the THD rating will be, therefore providing clearer music amplification.

In some instances, IC manufacturers state output power levels with THD values equal to 10%; a condition well into clipping. When observed on an oscilloscope, a sinewave appears to have its peaks cut off. This condition of clipping can occur from two factors; the maximum output voltage swing is reached or the maximum output current drive capability is reached. Both of these limiting factors can control the maximum output power capability, as indicated through *Equations 1-3*.

As shown in *Figures 1-3*, the amount of clipping increases the number and level of harmonics produced by the amplifier as its output limitations are reached and exceeded. Although output power is increased as the amplifier is driven farther into clipping, the quality of sound is adversely affected by the increasingly distorted waveform.

The output power obtained from one IC with a 10% THD specification will not be competitive with another amplifier whose power is the same, but whose THD is lower. For a given supply voltage load, two audio amplifiers can only be compared on equal footings if their THD specifications are equivalent. The amplifier whose power is the same, but has a lower THD, will generally be more expensive. This is partly because the output stage needs to be larger to support more current drive capability. This makes the device more expensive to produce and thus translates into a higher end cost for the customer.

In summary, it should be remembered when selecting an audio IC that any power rating has a corresponding THD specification which is based on a given voltage supply and load. Most consumer applications require clean crisp music as opposed to the harsh sound of clipping, so beware of those 10% distortion ratings and make sure that your comparisons are apples to apples.

In support of the above information, this audio selection guide is set up to allow easy selection of parts based on supply voltage range, load impedance, and most importantly, power with respect to THD level.

Figure 1: Amplifier output: $P_o = 80W$, $THD+N = 0.00056\%$, $R_L = 8\Omega$

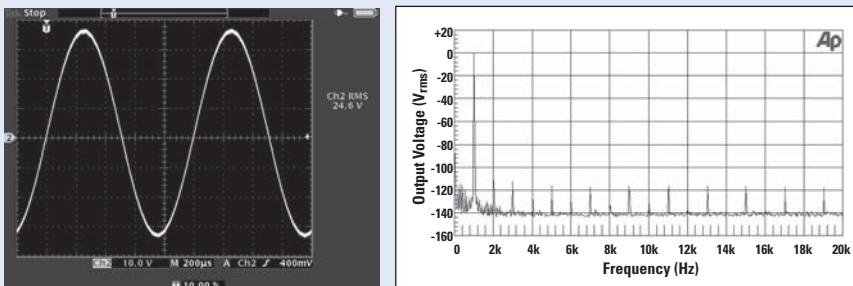

Figure 2: Amplifier output: $P_o = 106W$, $THD+N = 1\%$, $R_L = 8\Omega$

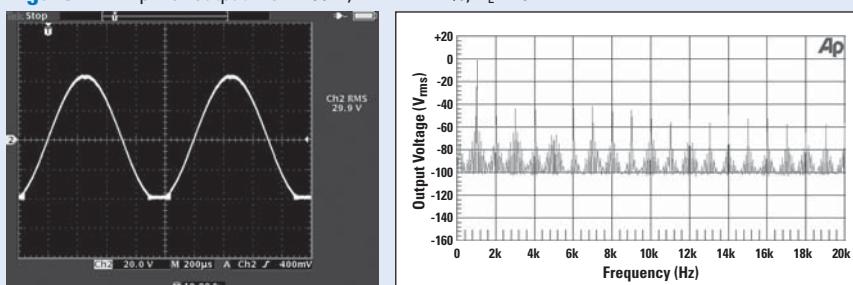

Figure 3: Amplifier output: $P_o = 125W$, $THD+N = 10\%$, $R_L = 8\Omega$

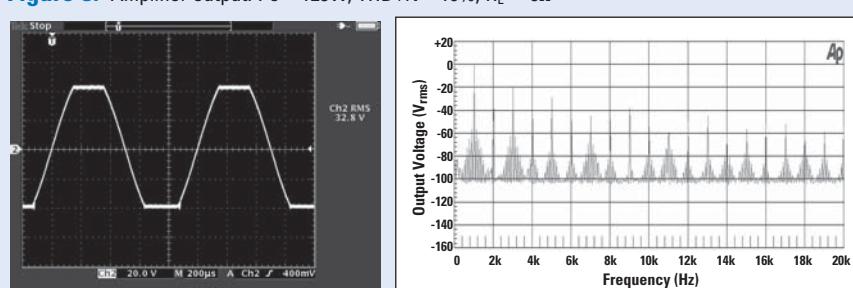

Figure 1 - 3 are collected using National's LM4702

High-Performance Audio

Typical High-Performance Audio Signal Path

Ideal for applications such as:

- High-end components (Pre-amps/DACs/DVD-SCAD etc.)
- Music (including guitar amps)
- Powered speakers and subwoofers
- Home theater
- Home automation and dist. audio
- Professional mixers and effects
- Commercial sound reinforcement
- After-market automotive
- Portable performance audio

High-Performance Audio Op Amps and Buffers

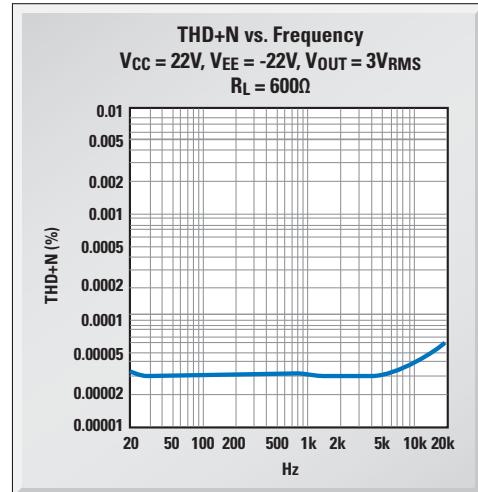

LME49860 – 44V Dual High-Performance, High-Fidelity Operational Amplifier

Features

- Easily drives 600Ω loads
- Optimized for superior audio signal fidelity
- Output short circuit protection
- PSRR and CMRR exceed 120 dB (typ)
- Available in SOIC-8 and DIP-8 packaging

Applications:

Ideal for use in high-quality audio amplification, phono pre-amps, high-performance professional audio, high fidelity active filters, equalization and crossover networks, high-performance line drivers and receivers, and high-voltage industrial applications including test, measurement and ultrasound

High-Performance Audio Amplifier Power Amplifier Driver

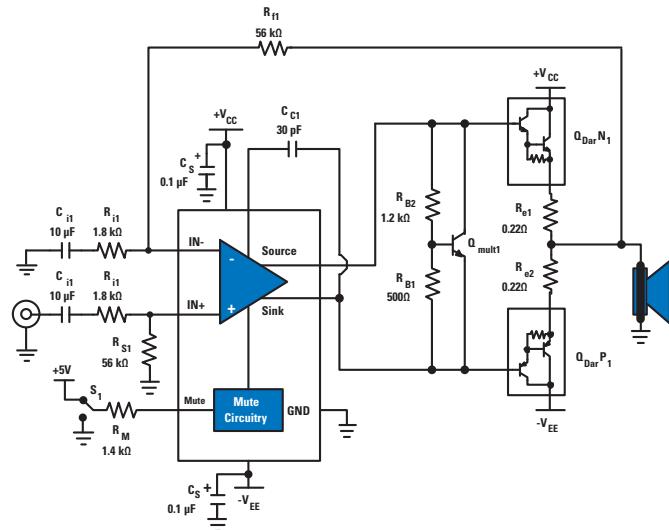

LME49811 – Audio Power Amplifier Series Mono High Fidelity 200 Volt Driver with Mute

Features

- Very high voltage operation
- Scalable output power
- Minimum external components
- External compensation
- Thermal shutdown and mute

Applications:

Ideal for use in AV receivers, audiophile power amps, pro audio, and high-voltage industrial applications

Remote Diode Temperature Sensors and Hardware Monitors

PowerWise® Precision Remote Diode Temp Sensors (RDTS) with TruTherm® Technology

TruTherm® Beta Compensation Technology

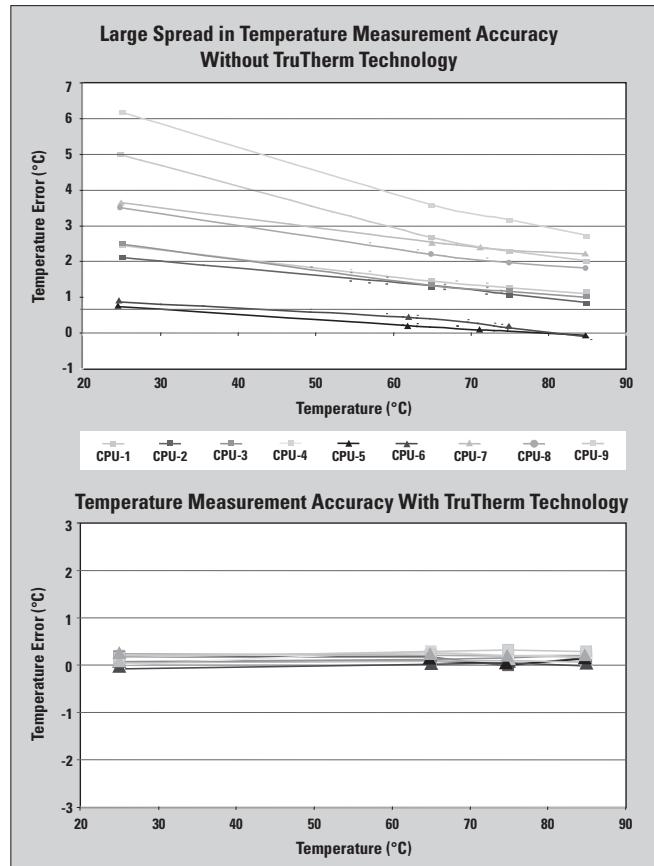

- Precisely senses the temperature of remote diodes in deep-submicron processes
- Compensates effects of beta variation
- Eliminates processor dependent offset calibration
- Precise temperature measurement combined with National's advanced fan control solution enables optimal acoustic solutions

Features (LM95233/34/35/41/45)

- Remote and local sensors
- Analog and digital filters to reduce noise
- Calibrated for 2N3904 or processors on 45, 65, or 90 nm processes
- Resolves temperatures above 127°C
- Remote diode fault detection
- SMBus 2.0 compatible interface, supports TIMEOUT

Applications:

Ideal for use in processor/computer system thermal management (e.g. laptop, desktop, workstations, server), electronic test equipment, and office electronics

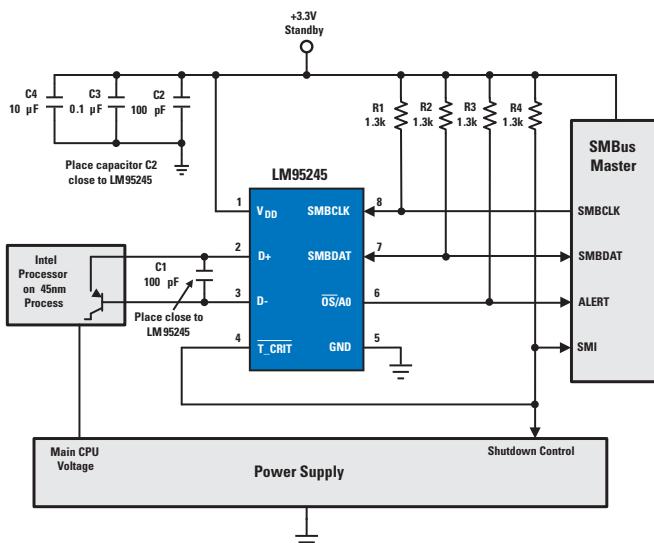

LM95245 – PowerWise® Single Remote Diode and Local Temperature Sensor

Features

- 45 nm supported TruTherm beta compensation technology
- Monitors one remote diode and local temperature
- Remote temperature accuracy: $\pm 0.75^\circ\text{C}$ (max)
- One programmable critical temperature alarm
- Supply voltage: 3.0V to 3.6V
- 350 μA supply current
- 3 level address pin
- Available in MSOP-8 and SOIC-8 packaging

Applications:

Ideal for use in processor/computer system thermal management, electronic test equipment, and office electronics

 PowerWise® product

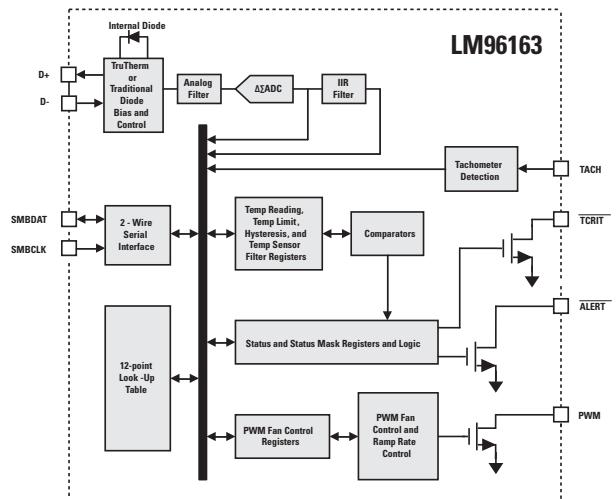

LM96163 – PowerWise® TruTherm® Remote Diode Integrated Look-Up Table Fan Control

Features

- TruTherm® 45 nm and 65 nm BJT beta compensation technology
- Monitors remote diode, local temperature, and 1 cooling fan
- Remote temperature accuracy $\pm 0.75^\circ\text{C}$
- Controls cooling fans with advanced fan speed control techniques
- Features that minimize acoustical noise:
 - Programmable PWM duty-cycle transition smoothing
 - 12-point LUT
 - 0.39% PWM duty-cycle resolution at 22.5 KHz PWM frequency
- TCRIT output for critical temperature system shutdown
- ALERT output for processor event notification
- Available in LLP-10 (QFN10) packaging

Applications:

Ideal for use in single processor-based equipment, industrial controls, and electronic test and office equipment

Product ID	Key Features
LM63C/D	11-bit remote diode and LUT fan control
LM80/81B	Voltage monitoring, TACH inputs, local temp
LM96000	Desktop hardware monitor, dual RDTS, linear fan control for 4-pin fans

 PowerWise® product

Analog Temperature Sensors

LM94021/22/23 – PowerWise® Low-Voltage, Low-Power, 1.5 to 5.5V, Analog Temperature Sensor

Features

- Next generation LM20
- Supply voltage 1.5V to 5.5V
- $\pm 1.5^\circ\text{C}$ temperature accuracy
- Four configurable gains for optimum sensitivity vs. supply and temperature
- Low 5.4 μA quiescent current
- Wide temperature range of -50°C to $+150^\circ\text{C}$
- Short-circuit protected output
- Available in SC-70 packaging
- New: LM94023 - micro SMD, dual gain
- Evaluation board available

Applications:

Ideal for use in low-voltage, battery-powered systems such as cellular phones, PDAs, MP3 players and digital cameras, as well as automotive, and storage devices

Product ID	Supply Current (μA)	Output Drive		Output	Packaging
		Source (μA)	Sink (μA)		
LM94022	5.4	50	50	Class AB	SC-70
LM94023	5.4	50	50	Class AB	micro SMD

LM26LV – PowerWise® 1.6V Lowest Power, Factory Preset Temperature Switch and Temperature Sensor

Features

- Ultra-low supply voltage: 1.6V to 5.5V for all trip points
- Ultra-low supply current: 8 μA (typ)
- Highest accuracy with temperature trip point accuracy of $\pm 2.3^\circ\text{C}$ (0 to 69°C)
- 0°C to 150°C temperature trip point range, -50°C to 150 °C analog output temperature range
- Trip-test pin allows in-situ testing to verify connectivity and comparator function
- Analog output can be overdriven for trip point testing
- Push-pull and open-drain digital outputs in same package
- Buffered V_{TEMP} output drives external circuits, such as A/D converters
- 5°C hysteresis
- Factory programmable temperature set point
- Available in 2.2 mm x 2.5 mm LLP-6 packaging (SC-70 footprint)

Applications:

Ideal for use in industrial and automotive markets, and in consumer applications including notebooks and cell phones

Product ID	Key Features	Description
LM26LV	1.6V to 5.5V, $\pm 2.3^\circ\text{C}$, -50°C to 150°C factory preset set point, LLP-6	Lowest power, ultra-low voltage, analog temperature switch plus analog temperature sensor
LM26	2.7V to 5.5V, $\pm 3^\circ\text{C}$, -40°C to 125°C factory preset set point, SOT-23	Small, low power, analog temperature switch plus analog temperature sensor
LM27	2.7V to 5.5V, $\pm 3^\circ\text{C}$, 120°C to 150°C factory preset set point, SOT-23	Small, low power, analog temperature switch plus analog temperature sensor
LM45	4V to 10V supply voltage, $\pm 3^\circ\text{C}$, SOT-23	Low-power, precision temperature sensor
LM56	2.7V to 10V supply voltage, $\pm 3^\circ\text{C}$ accuracy, user programmable set point	User programmable temperature switch plus analog temperature sensor

PowerWise® product

Digital Temperature Sensors

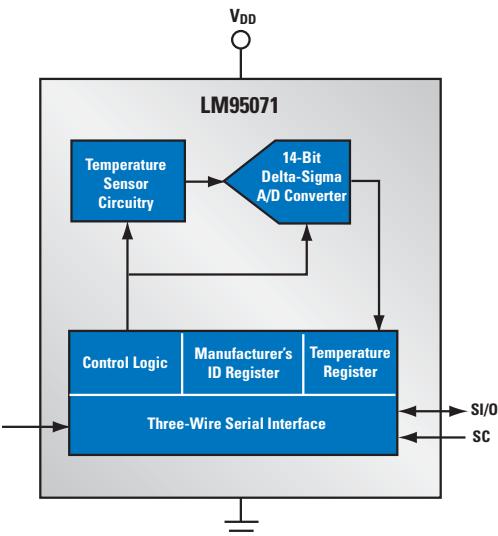

LM95071 – PowerWise® High-Accuracy SPI General-Purpose Digital Temperature Sensor

Features

- $\pm 1^\circ\text{C}$ accuracy (0°C to 70°C)
- 14-bit resolution ($0.03125^\circ\text{C}/\text{LSB}$)
- 2.4V to 5.5V supply
- Low power: 280 μA typical
- -40°C to 150°C temp range
- Next generation to the LM70 and LM74
- Available in SOT23-5 packaging

Applications:

Ideal for use in system thermal management, portable devices, personal computers, disk drives, and test equipment

Product ID	Key Features	Comments
LM70	3-wire, 11 bits, $\pm 2.0^\circ\text{C}$	Bare bones sensor, LLP® packaging
LM71/LM95071	3-wire, 14 bits, $\pm 1.0^\circ\text{C}$	High accuracy and resolution
LM95172Q	3-wire, 13 to 16 bits, $\pm 1.0^\circ\text{C}$	175°C, high accuracy and resolution
LM73	2-wire, 11 to 14 bits, $\pm 1^\circ\text{C}$	High accuracy, programmable resolution, fast conversion time
LM74	3-wire, 13 bits, $\pm 1.25^\circ\text{C}$	World's smallest, low power, micro SMD packaging
LM75	2-wire, 9 bits, $\pm 2.0^\circ\text{C}$	Industry standard
LM76	2-wire, 13 bits, $\pm 0.5^\circ\text{C}$ and $\pm 1.0^\circ\text{C}$	Higher accuracy
LM77	2-wire, 10 bits, $\pm 1.5^\circ\text{C}$	ACPI compliance
LM92	2-wire, 13 bits, $\pm 0.33^\circ\text{C}$ and $\pm 0.5^\circ\text{C}$	World's most accurate

PowerWise® product

Automotive Portfolio

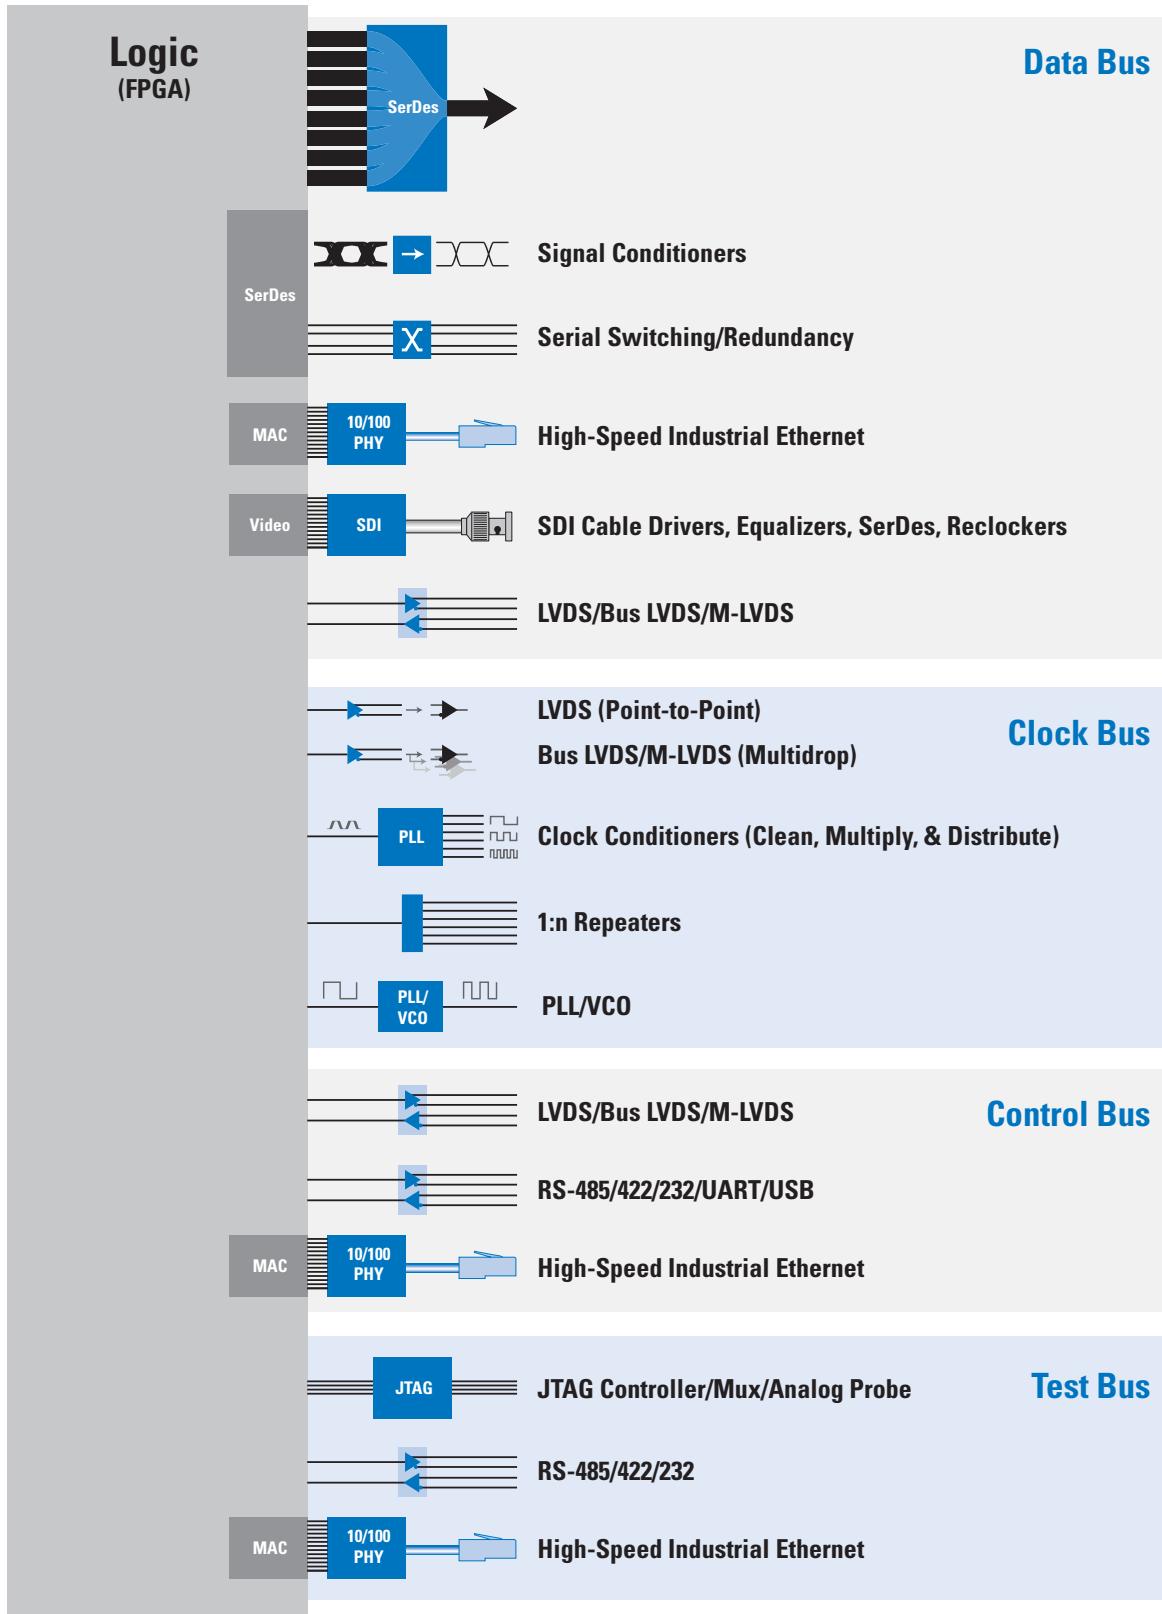

This family of temperature sensors is optimized for the automotive market. Increased electronic content in critical automotive and industrial applications is driving the need for specialized high-temperature thermal management solutions. These temperature sensors provide high accuracy at the critical high-temperature area and operate in extended temperature range, making them ideal for use in automotive head units, transmission control, diesel systems, electric motor control, and suspension systems.

Automotive Portfolio

Product ID	Grade	Description
LM95172Q	0	SPI/MICROWIRE® high-temperature digital temperature sensor, available in die form
LM95235Q	3	Remote diode temperature sensor with TruTherm® technology AEC-Q100 Grade 3
LM94022Q	0	Low-voltage analog temperature sensor AEC-Q100 Grade 0
LM27A		High-temperature (120 - 150°C) thermostat, available in die form
LM71A		SPI/MICROWIRE high-temperature digital temperature sensor, available in die form
LM95071		SPI/MICROWIRE high-accuracy and resolution digital temperature sensor

PowerWise® product

Interface Product Overview

Multi-Drop LVDS

Multi-Drop: Drive as Many as 32 Loads Using Bus LVDS or M-LVDS

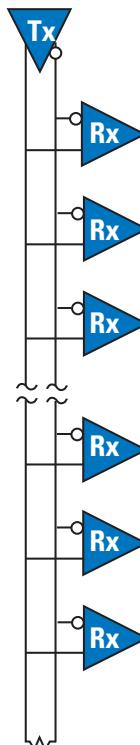

Bus LVDS is a multi-drop version of LVDS with beefed-up drive to support as many as 32 loads. Controlled edge rates help reduce reflections and allow B-LVDS to support data rates as high as 400 Mbps.

- High drive with controlled edge rates
- Up to 400 Mbps

M-LVDS is described in the TIA/EIA-899 standard and is a multi-drop solution capable of data rates as high as 125 MHz. M-LVDS has guaranteed edge rates greater than 1 ns, increased drive and a wider input common mode range.

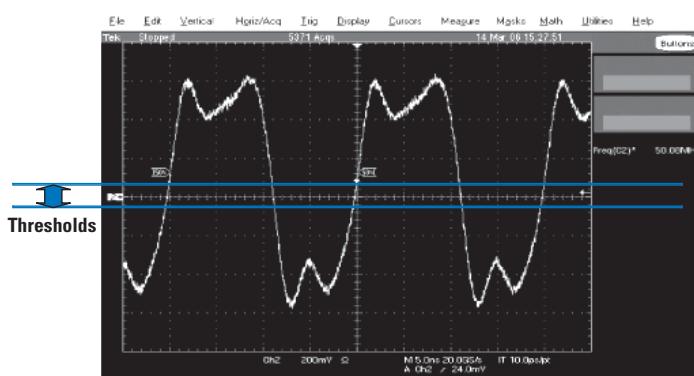

- High drive with >1 ns edge rates
- Up to 125 MHz

Multi-Drop Topology

$$R_T = Z_0 \text{ (diff.)}$$

DS91D176 driving 50 MHz clock on ATCA backplane
- 13 loads - 1/2 inch stubs - Rx slot 7, Tx slot 14

LVDS and CML PHYs

Signal Conditioning—Extend Your Reach

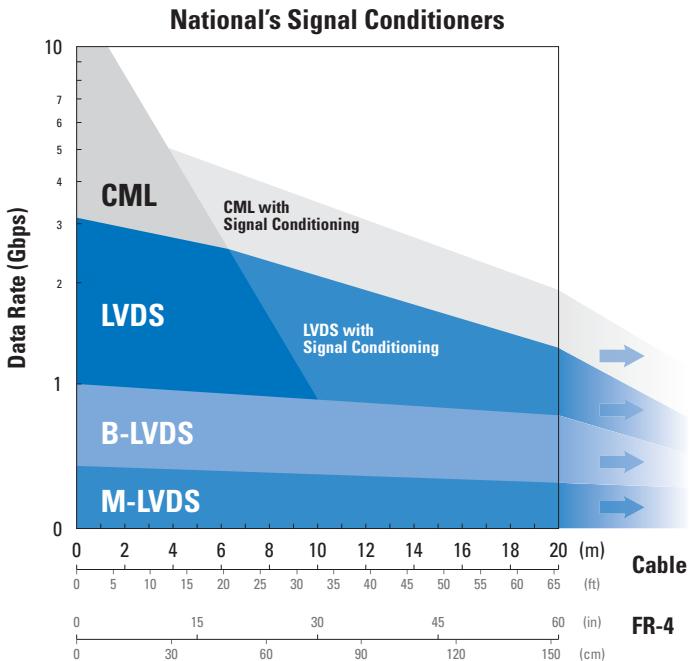

National offers an array of signal conditioning solutions, covering data rates from DC to 10 Gbps and topologies ranging from point-to-point to 32 multidrop loads.

LVDS is the most widespread high-speed signaling technology and generally requires the least amount of power while supporting data rates from DC to 3.125 Gbps.

CML supports data rates as high as 10 Gbps while generally maintaining the lowest jitter.

Signal conditioning using equalization and pre-emphasis (for CML, de-emphasis) enables both technologies to significantly extend cable and backplane reach by compensating for media loss.

B-LVDS and M-LVDS are lower speed technologies that use controlled edge rates to improve signal integrity when driving multiple loads in multi-drop or multi-point configurations.

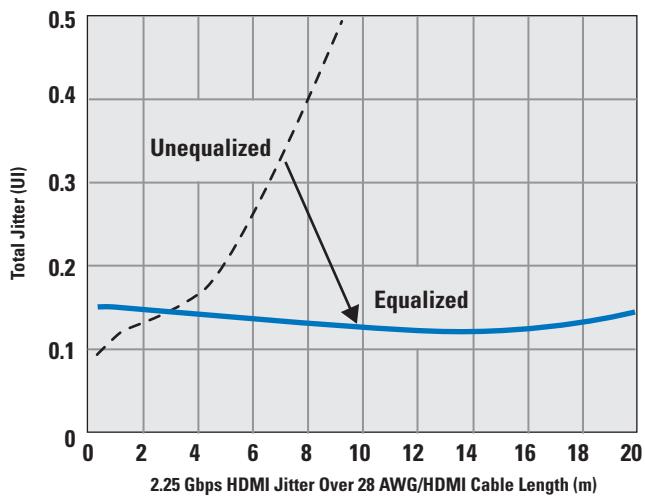

DS16EV5110 – HDMI/DVI Cable Equalizer

Features

- 1.65 Gbps (DVI 1.0 and HDMI 1.2a)
 - > 40m 24 AWG HDMI/DVI cable
 - > 25m 28 AWG HDMI/DVI cable
 - > 20m CAT5/5e/6
- 2.25 Gbps (HDMI 1.3)
 - > 30m 24 AWG HDMI/DVI cable
- Supports digital TV resolutions: 480i/p, 720i/p, and 1080i/p (including 1080p with 12-bit color depth)
- Supports computer resolutions from VGA to WQXGA
- Flexible Serial Management Bus (SMBus) interface
- Settable boost for optimum equalization
- Optimized for 250 Mbps to 1.65 Gbps
- Clock channel loss of signal (LOS) detect
- 0.13 UI total at 1.65 Gbps including cable
- Low-power consumption: 430 mW (typ)

Applications:

Ideal for use in DVI/HDMI cable extenders/switchers, digital routers, projectors, and high definition displays

See the new show:

"Designing Long-Reach Applications with
DVI HDMI and PCI Express Cable Standards"
www.national.com/nationaltv

Cable Extension and Switching/Redundancy

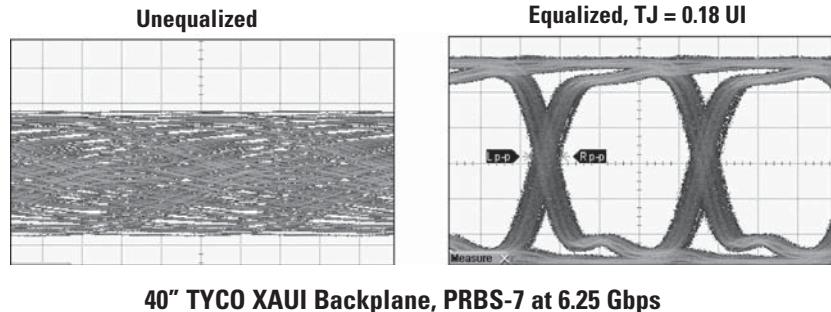

PowerWise® Cable and Backplane Equalizer Family Operates from 2.5 to 10 Gbps

Features

- Equalizes 40 inch FR4 or 10m 24 AWG Twin-AX at 6.4 Gbps
- 94 mW typical power consumption per channel

Applications:

Ideal for use in extending cable reach in storage, automated test equipment, networking, and medical applications, and in reducing jitter in high-speed backplanes

Product ID	Description	Supply Voltage	Channels	Package
DS32EV400	Quad 1-5 Gbps general purpose equalizer	3.3	4	LLP-48
DS64EV400	Quad 5-10 Gbps general purpose equalizer	3.3	4	LLP-48

DS50EV401	Quad 2.5-8Gbps PCI Express equalizer	2.5-3.3	4	LLP-48

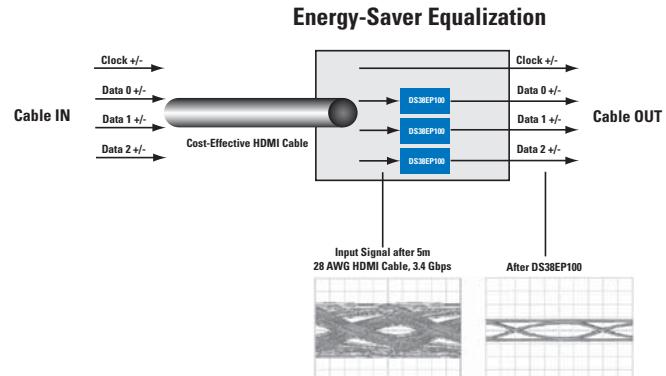

PowerWise product

PowerWise Energy-Saver Equalizers

Energy-saver equalizers employ passive components to provide as much as 7 dB relative boost. Energy-savers require no power or ground, add no R_j and are bi-directional. Energy-savers are ideal for placement in connectors, backplanes, and cables, and can act independently or in conjunction with an active equalizer.

Device	Datarate	Boost	Packaging
DS38EP100	1 to 5 Gbps	7 dB	LLP-6
DS80EP100	5 to 12.5 Gbps	7 dB	LLP-6

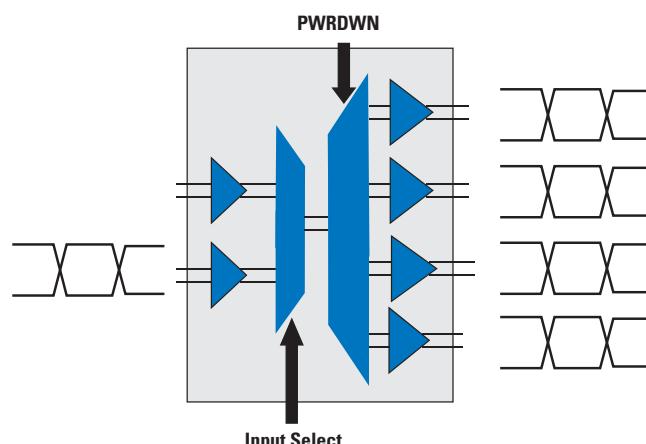

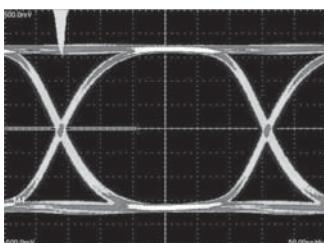

PowerWise product

DS25BR204 1 to 4 LVDS Splitter with Selectable Input

Features

- DC to 3.125 Gbps
- Select 1 of 2 inputs
- .5 ps R_j typical
- Input Equalization and Output Pre-emphasis

LB = Loopback ¹CML devices in this column that feature de-emphasis show negative dB  PowerWise product

DS25BR100/10/20 – PowerWise® 3.125 Gbps LVDS Buffers with Pre-Emphasis and Equalization

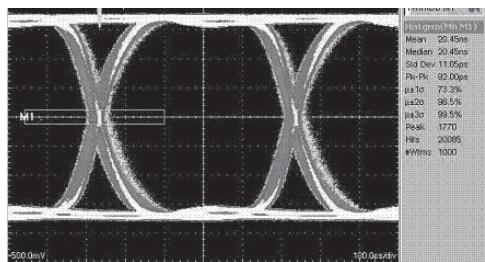

Features

- 17 ps typ jitter (2.5 Gbps, 2²³-1 pattern)
- Programmable pre-emphasis and equalization
- Wide common mode input accepts LVDS, CML, and LVPECL
- Integrated 100Ω input and output termination
- 7 kV ESD protection on LVDS pins
- Available in LLP-8 packaging

Applications:

Ideal for use in routers, switches, storage, medical imaging, video security, image capture, and processing

DS25BR110 Equalization

PowerWise product

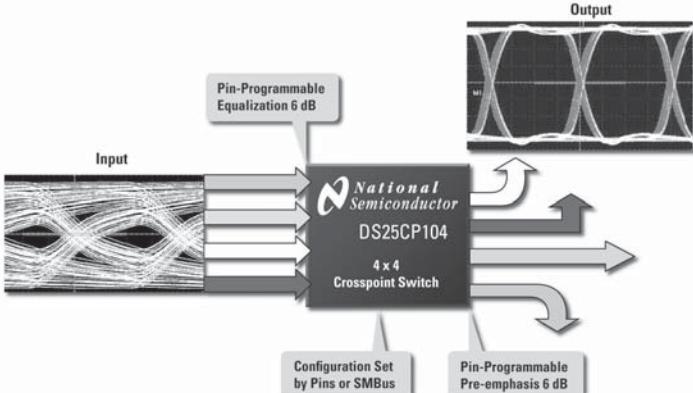

DS25CP104A – PowerWise® LVDS 4 x 4 Crosspoint Switch

Features

- DC to 3.125 Gbps
- 10 ps typical jitter
- Programmable equalization and pre-emphasis
- Configurable using pins or SMBus

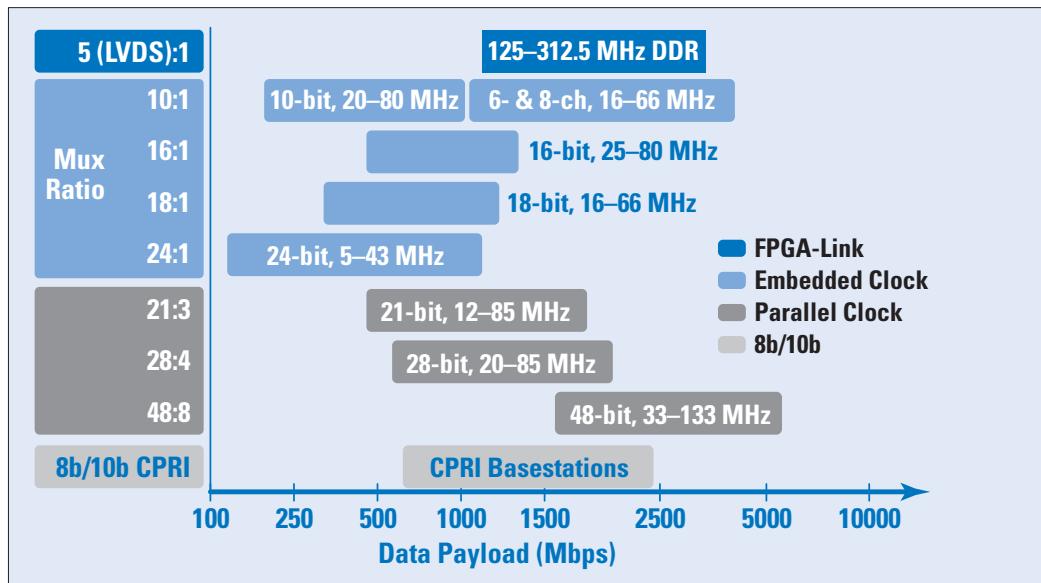

Applications:

Ideal for use in routing and switching of video, data, or clock signals, and redundancy

DS32EL(X)0421/DS32EL(X)0124 - 3.125 Gbps FPGA-Link Serializers and Deserializers

Features

- Wide serial data rate – 1.25 Gbps to 3.125 Gbps
- Tx de-emphasis, RX equalizer, DC balancing, scrambler
- Supports – CAT5e/6/7, FR-4, coax (50Ω, 75Ω)
- FPGA-friendly interface – 5-bit DDR LVDS data
- “Remote sense” back-channel enables self-healing link
- 35 ps_{pp} (typ) TX jitter, 0.9 UI (typ) Rx jitter tolerance
- Low power – auto standby and configurable sleep modes
- ELX version features – retimed output and redundant I/O
- Sample FPGA IP for Ser/Des interfacing included

DS90UR241/124 – 5 to 43 MHz 24-bit Serializer/Deserializer with DC-Balance and Pre-Emphasis

Features

- Serializes 24 bits at 5 to 43 MHz (125 to 1032 Mbps)
- Receiver automatically locks to any data pattern without external clock
- DC-balance encoding for AC-coupled and optical interconnects
- Drives 10m twisted pair cable
- At-speed BIST pattern generation/verification
- 10 kV ESD (ISO-10605) and hot plug protection
- Extreme -40 to +105°C temperature range
- Meets National automotive-grade compliance (includes AEC-Q100)

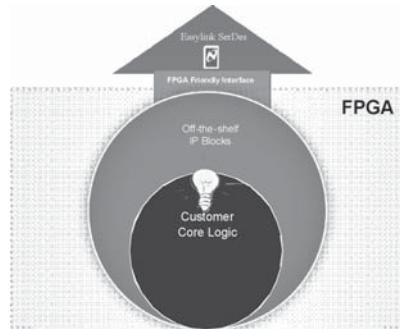

Applications:

Ideal for use in remote displays, remote cameras, signal acquisition, automotive, and bus extension

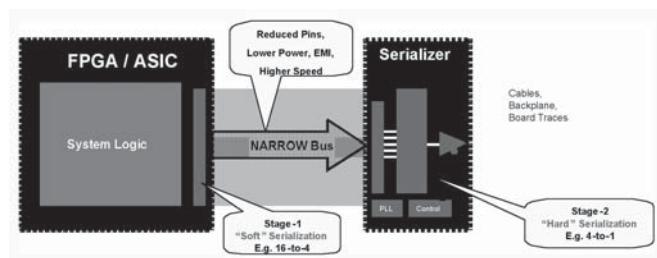

FPGA Link

Use Analog or Digital, Whichever Works Best

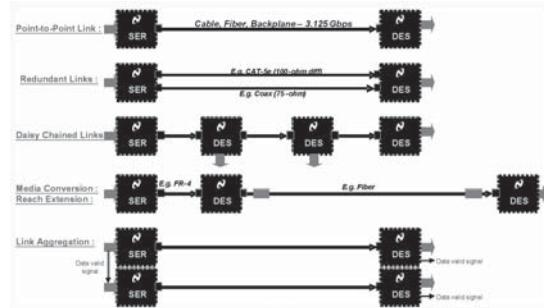

FPGA Link analog circuit collaboration combining signal integrity and FPGA digital logic to maximize flexibility for the user

Simple Design

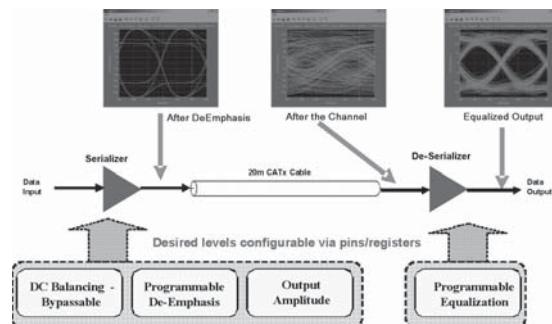

With increasing signal bandwidth, simultaneous switching noise generated on the parallel bus and the number of signal lines become more and more of a problem. FPGA Link solves these issues by replacing the parallel bus with LVDS (low noise and low power consumption).

Topologies (connection schemes)

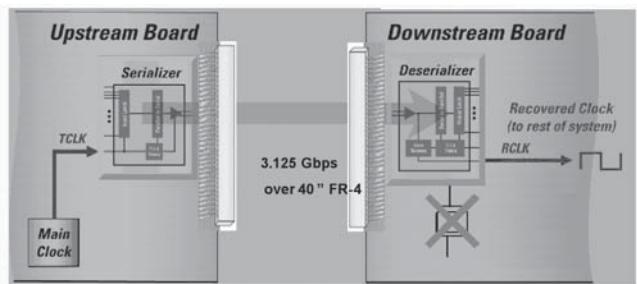

Supports a wide range of topologies including point-to-point, daisy chain, media converter, and aggregation mode (synchronized transmission from multiple chips).

Topologies (connection schemes)

Signal conditioning including powerful equalizer (EQ) and de-emphasis circuits are integrated into the chipset. Cables and backplanes can be driven directly without requiring any additional chips.

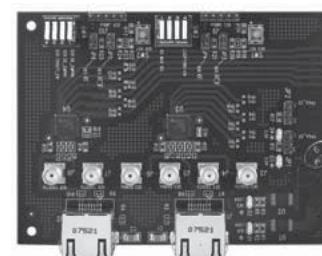

Simple Design

1. No reference clock required
2. Automatic negotiation (minimal user control)
3. Internal termination resistor

Evaluation Board

EXP High-Performance SerDes Module

AES-EXP-HPSER-G

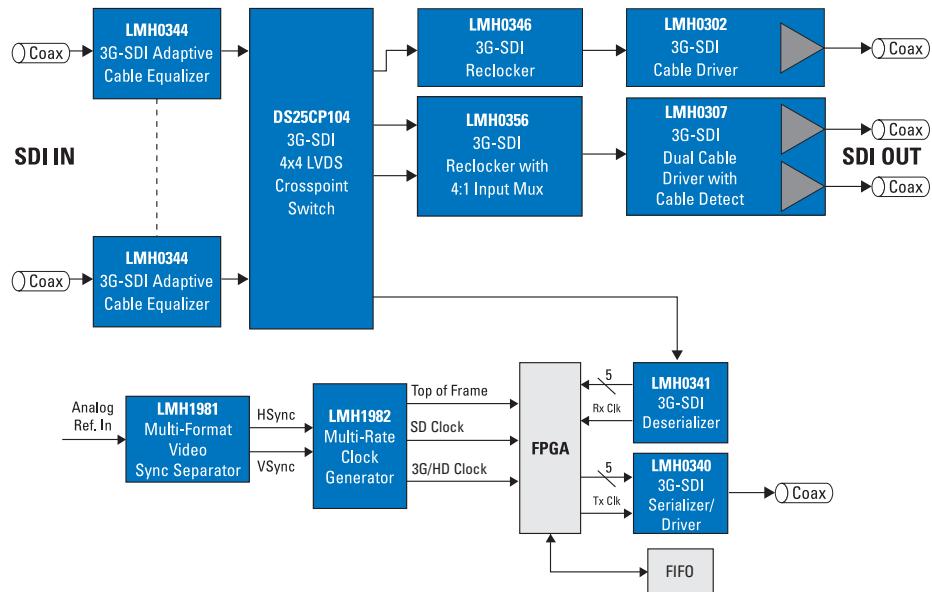

Comprehensive 3 Gbps SDI Solution

3G/HD/SD SDI Equalizer, Deserializer, Serializer, Reclocker and Cable Driver

National is the first semiconductor supplier to offer a complete end-to-end solution for the rapidly emerging 3 Gbps SDI market. Each of National's 3G-SDI products has a footprint-compatible counterpart for HD/SD and SD only applications to maximize

designer flexibility in building a system. Do you require HD/SD operation today with an upgrade path to 3 Gbps SDI tomorrow? National's technology offers solutions for all your SDI needs.

Comprehensive Triple-Rate Development Platforms with Xilinx and Altera FPGAs

SDALTEVK: 3G-SDI Development Platform with Altera Cyclone-III FPGA

SDXILEVK: 3G-SDI Development Platform with Xilinx Spartan-3A FPGA

INTERFACE

Features

- Supports triple-rate 3G/HD/SD SDI standards including SMPTE 424M, 292M, and 259M (C)
- Supports 2.967 Gbps, 2.97 Gbps, 1.485 Gbps, 1.483 Gbps and 270 Mbps serial data rate operation
- Comprehensive reference for hardware design and FPGA IP development

- Included HDL (Verilog, VHDL source) supports SDI framing, audio embedding/de-embedding and test pattern generation
- Four clocking options available
 - Recovered clock
 - Genlock (analog ref in with LMH1981 + LMH1982)
 - Local generation (free run with LMH1982)
 - External clock
- Reference design includes popular low-cost FPGAs

Triple-Rate SDI SerDes FPGA IP

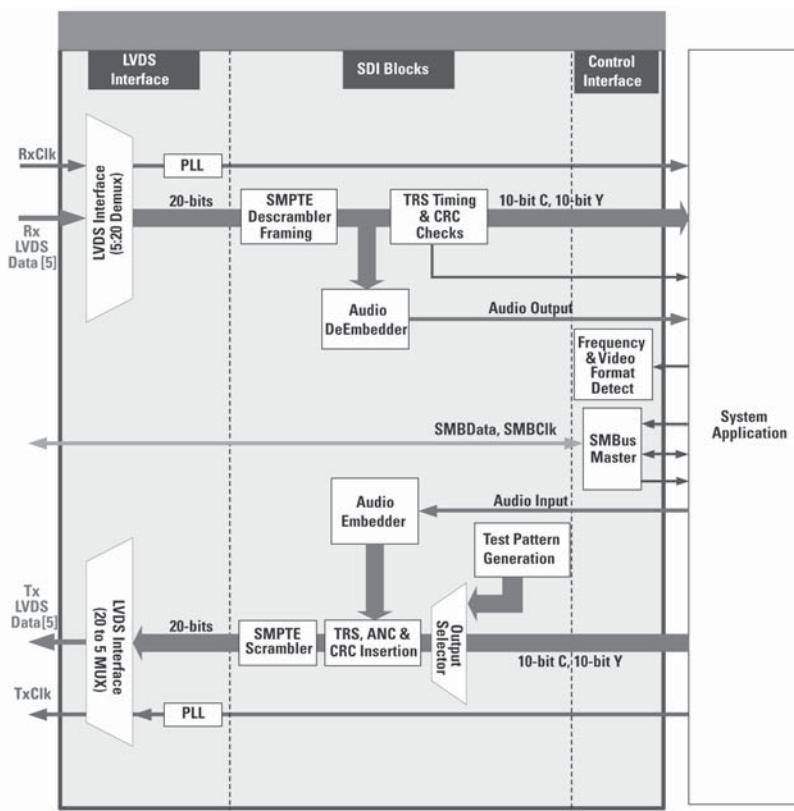

Today's designers of high-speed video applications face a significant challenge in addressing both the digital IP and analog physical interface requirements of their professional and broadcast video systems. Attempts to support both in one application-specific chip have compromised the flexibility, quality, or cost-effectiveness of the solution. National's 3G SDI SerDes family of products overcomes these difficulties by intelligently partitioning the analog and digital tasks between the 3G SDI SerDes PHYs and FPGA, thereby increasing the performance and flexibility of the entire solution.

National's SerDes solution includes a comprehensive IP package to support common SDI applications and popular FPGA models.

IP Package Includes

- Triple-rate SDI support with automatic rate detect
- SMPTE scrambling, descrambling, and framing
- Support for embedded audio
- Test pattern generation for development and validation
- 20:5 output muxing and 5:20 input demuxing to support the 5-bit LVDS interface bus
- SMBus management interface
- Supports both level-A and level-B 3G SDI formats
- Source code provided in synthesizable HDL (Verilog, VHDL) format
- Detailed design documentation

Industry's First Dual Channel 3G-SDI SerDes Transceiver

LMH4345 Features	
Dual SerDes Transceiver	
Supports 3G/HD/SD SDI and DVB-ASI	
Independent data rates on each channel	
30 ps typical output alignment jitter at 3G and HD data rates	
0.6 UI minimum jitter tolerance	
Reclocked loopthrough on each Rx channel	
Narrow 5-bit LVDS parallel data interface simplifies layout	
Differential signaling reduces EMI	
No external VCOs required	
Integrated LC-based PLL cleans FPGA PCLK jitter	
Integrated SMPTE cable drivers	
1600 mW typical power consumption at 3G rates (all channels active)	
Sleep modes for reduced power consumption (unused channels)	
Small 100-pin package reduces board area

Extending the Reach of SDI Transmissions

3G-SDI Distribution Amplifier

- Highest jitter tolerance
- Lowest output jitter
- Exceeds SMPTE 424M specifications for jitter injection with significant margin, even using matrix pathological test signals
- Less than 0.1 UI output jitter difference between PRBS and Pseudo-Matrix Pathological signals at 3 Gbps data rates

Distribution Amplifier Jitter Tolerance, 2.97 Gbps, PRBS 2^10-1, (BER = 1e-10)

PowerWise® SDI Cable Drivers with Cable Detect Reduce System Power

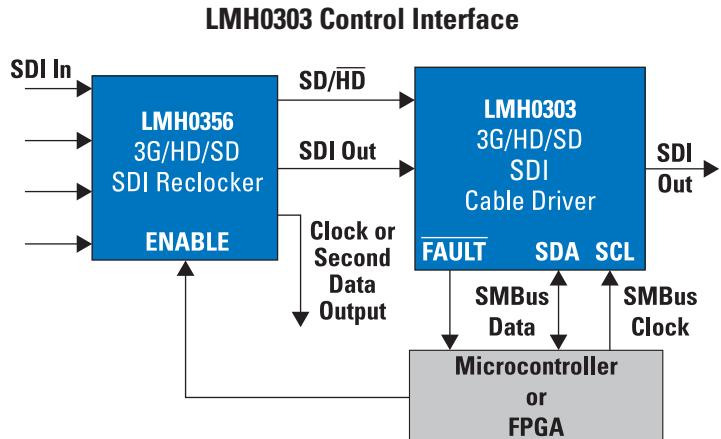

LMH0303 and LMH0307 SDI Cable Drivers

Features

- Output cable detect alerts if cable is disconnected from BNC or improperly terminated
- Input loss of signal detect notifies when no input video signal is present
- Less than 4 mW power consumption in power saver mode
- Compliant with SMPTE 424M, 292M, 344M and 259M
- Dual differential output available (LMH0307)
- 7-bit SMBus accessible registers allows control of up to 127 cable drivers with one bus
- Easily communicates with LMH0356 3G-SDI reclocker, placing the reclocker in a 10 mW consuming power saver mode when possible
- Small LLP-16 packaging (4 x 4 mm)

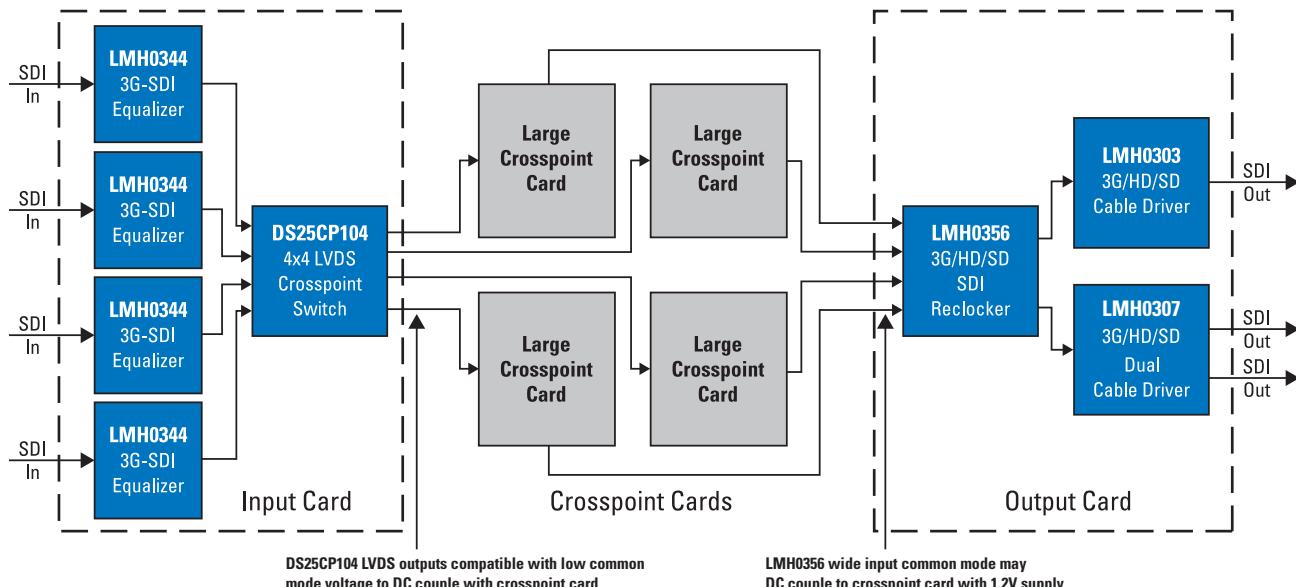

Video Router Solution

National's 3G-SDI products deliver the highest performance to power consumption ratio. The LMH0303 and LMH0307 cable drivers can automatically initiate a deep, 4 mW, power saver mode upon system faults such as output cable disconnection and input loss of signal. The cable drivers can also activate the deep power saver mode of National's LMH0356 3G/HD/SD SDI reclocker reducing the reclocker power consumption to 10 mW.

The LMH0356 features equalization on each of the inputs capable of equalizing up to 30 inches of FR4 trace. Additionally, the DS25CP104 4x4 LVDS crosspoint switch from National's PowerWise® family supports receive equalization and transmit pre-emphasis while consuming only 120 mW per channel, extending performance with minimal power.

Large Video Router Simplified Block Diagram

Mobile Pixel Link

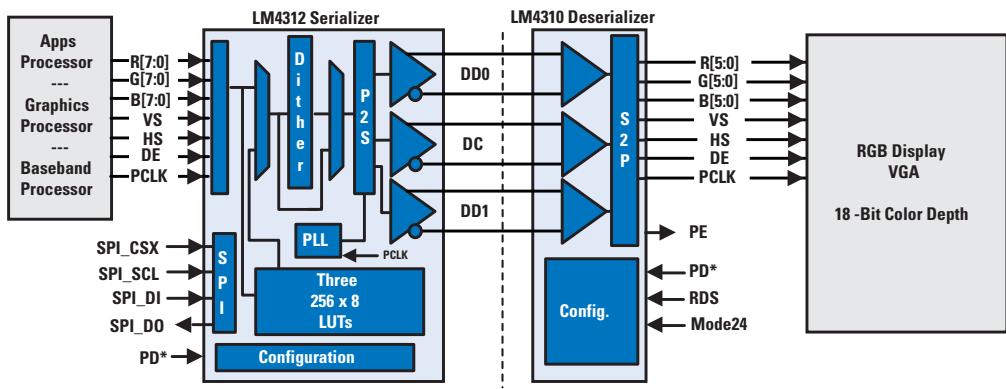

Mobile Pixel Link

Mobile Pixel Link Two (MPL-2) is a robust serial interface between video ports on sources and displays. MPL-2 features a robust differential transmission interface with a small magnitude signal to offer system-level low-power and low-EMI benefits.

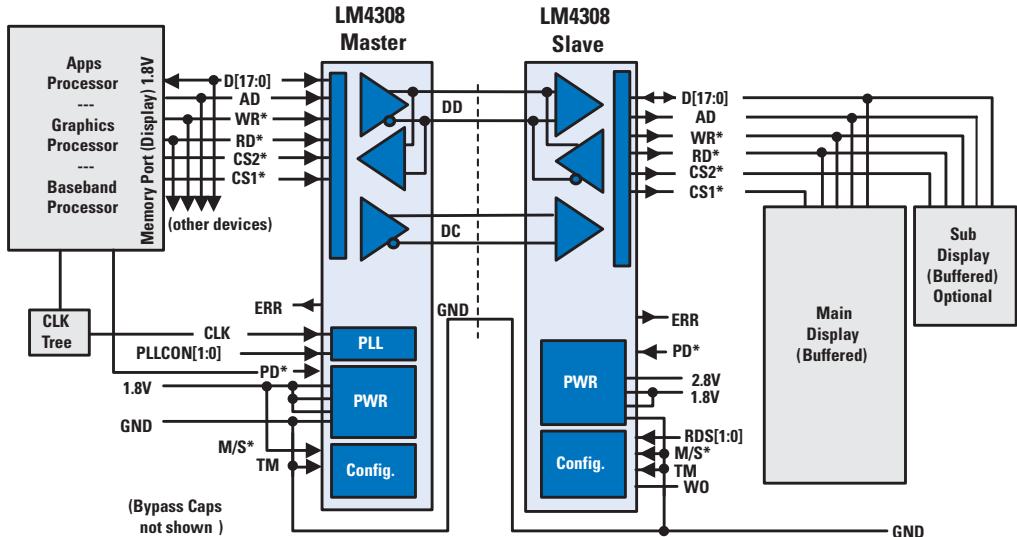

Features

- Less wires
- Low power
- Low EMI
- Robust differential interface
- SLVS physical layer

Serialized data is sent in mini-parallel fashion to simplify the data recovery on the receiver and to eliminate the need for a PLL, thus saving power in the receiver. The number of lanes is also scalable, depending upon the bandwidth required by the end application.

[Supply, all Configuration pins, and bypass caps. and grounding not shown]

Product ID	Function	Bits	Max PCLK Freq (Hz)	Interface	I/O Levels	Special Features	Packaging
LM4308	Master/Slave	18	30	CPU	MPL-2	Write and read supported	LLP/micro-array
LM4310	Receiver	18 or 24	30	RGB	MPL-2	Sleep mode	LLP
LM4312	Transmitter	18 or 24	30	RGB	MPL-2	Sleep mode, optional dithering	LLP

High-Speed Industrial Ethernet

Advanced 10/100 Ethernet PHYs

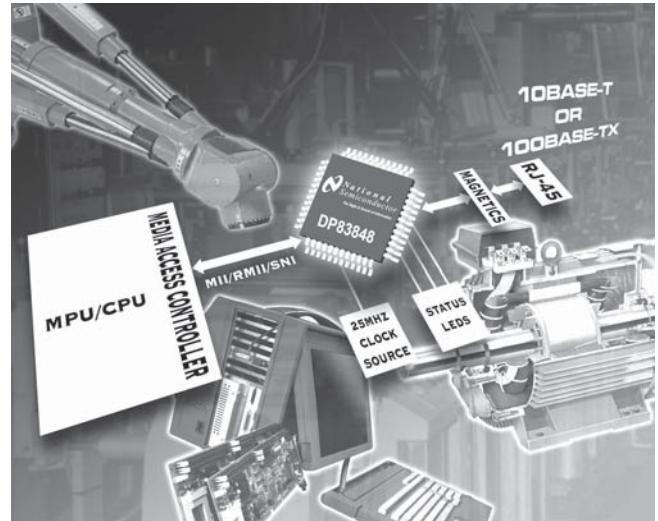

DP83848 – PHYTER® 10/100 Ethernet PHY Transceivers

Features

- Industry's lowest deterministic latency
- Software utility support
- Selectable MII/RMII interface
- Flexible interrupt capability
- Reference clock output (to MAC)
- Controlled I/O during power up
- Very low power consumption
 < 23 mW (energy detect mode)
 < 250 mW (normal operation)
- Built-in Self-Test (Packet BIST)

Applications:

Ideal for use in industrial automation, test and measurement, telecom, military, and aerospace applications

NEW! Precision PHYTER 10/100 IEEE 1588 PHY Transceiver

Product ID	DP83640T
Parameter	Industrial
Temp Range (°C)	-40 to 85
Number of Ports	Single
Interface	MII/RMII
IEEE 1588 Precision Time Protocol v1 & v2	<10 nS
Cable Health Diagnostics	•
Fiber Support	•
Synchronized GPIOs	12
Synchronized Clock Output	•

High-Speed Industrial Ethernet

DP83849 – Dual PHYTER® 10/100 Ethernet PHY Transceiver for Commercial, Industrial, and Fiber Applications

Features

- Flexible port switching and chaining
 - MII port assignment
 - MDI chaining
- Industry's lowest deterministic latency
- Enhanced cable diagnostics
- Two fully independent 10/100 ports
 - Selectable 100Base-Tx/100Base-Fx
 - MII/RMII/SNI
- Controlled I/O during power up
- Built-in Self-Test (Packet BIST)
- Industrial temperature range
- Fully IEEE 802.3u compliant
- Available in TQFP-80 packaging (12 x 12 mm)
- Low power consumption: < 300 mW per port

Applications:

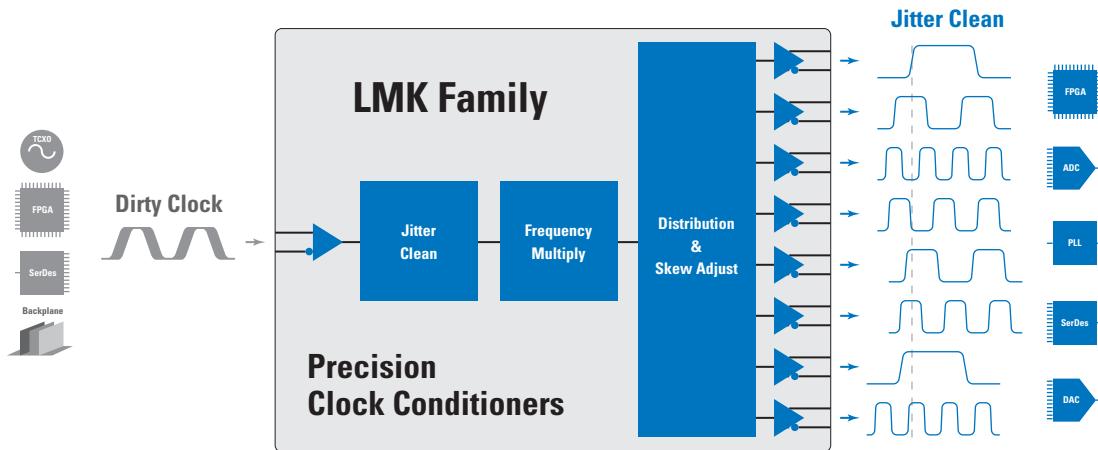

Ideal for use in industrial automation, test and measurement, telecom, military, and aerospace applications

LMK04031B LVCMS Output Phase Noise at 122.88 MHz
using a Crystek VCXO

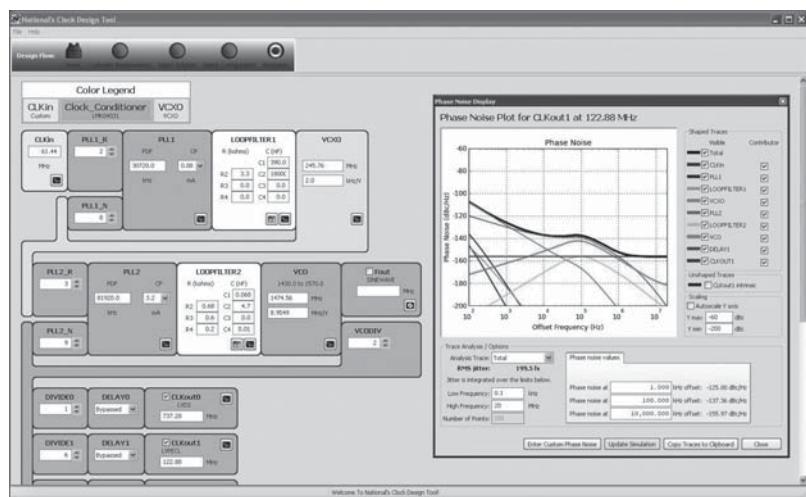

LMK04031B LVCMS Output Phase Noise at 122.88 MHz using a
Low-Cost Vectron Crystal

National's Clock Design Tool

Easy-to-use and feature-rich design tool for simple and quick clock subsystem design and analysis

Features

- Easy design parameter entry
- LMK part selection and configuration
- PLL and loop filter customization
- Input clock and VCXO phase noise entry
- Phase noise and jitter simulations and plotting

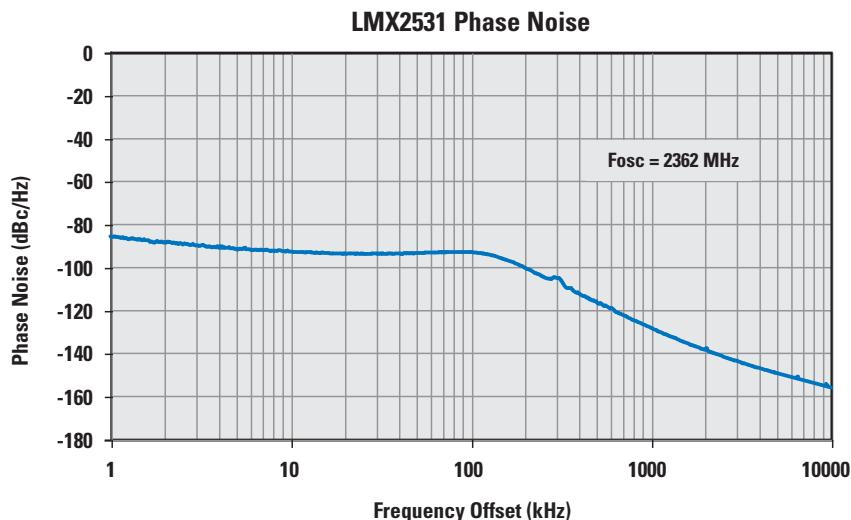

High-Performance Frequency Synthesizers

LMX2531 – PLLatinum® Frequency Synthesizer with Integrated VCO

Features

- 553 to 3132 MHz frequency range
- Very low phase noise and spurs
- Sigma-Delta fractional-N PLL
- Fully-integrated low-noise VCO
- Low 34 mA (typ) current consumption
- High +4 dBm (typ) output power
- Fast-lock and cycle-slip reduction
- Very low power-down current
- Partially integrated and adjustable loop filter
- 2.8 to 3.2V operation
- 1.8V MICROWIRE® support
- Available in 6 mm x 6 mm LLP-36 packaging

National's Power Management Product Portfolio

Power Solutions by Category

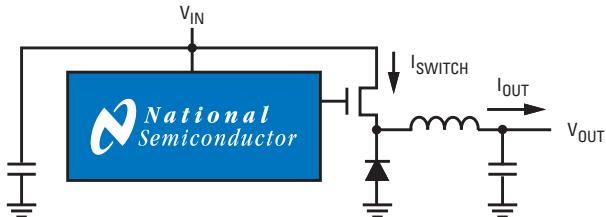

Power Solutions by Application

*LMUs = Highly integrated Lighting Management Units
**PMUs = Highly integrated Power Management Units

Commonly Used Power Switching Topologies

Buck

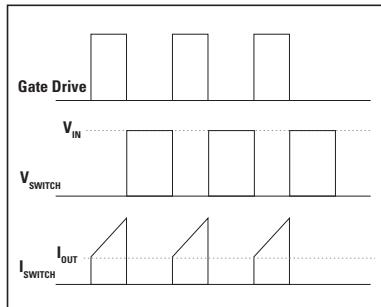

Function: Step-down ($V_{OUT} < V_{IN}$)

When to use: Typically when V_{IN} is 3x to 5x V_{OUT} and I_{OUT} is $> 0.5A$ and $< 5A$

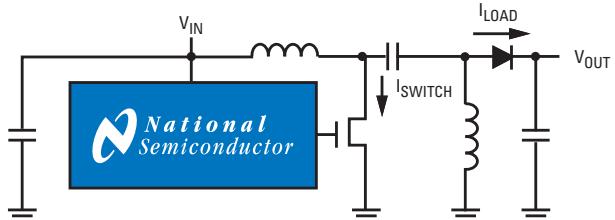

Characteristics: Easy to design and good efficiency for the above mentioned typical V_{IN} / V_{OUT} / I_{OUT} conditions

Devices to use: All buck integrated regulators and controllers

Comments: Can do multi-output or isolation through coupling a second inductor to the one shown in the basic circuit

SEPIC

SEPIC = Single Ended Primary Inductor Converter

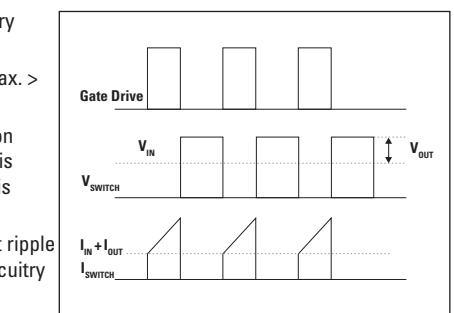

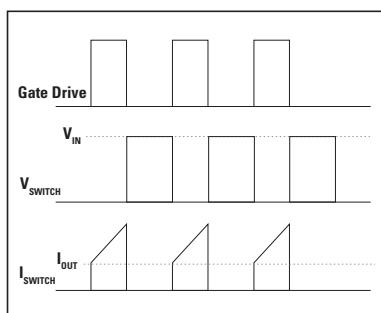

Function: Buck-boost (V_{IN} max. $> V_{OUT}$ > V_{IN} min.)

When to use: Excellent option when buck-boost operation is needed and no transformer is desired

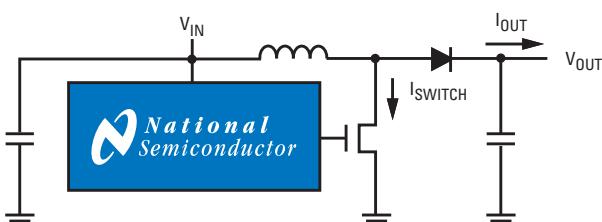

Characteristics: Lower input ripple than flyback, no snubber circuitry required

Devices to use: Any boost/flyback regulator or controller

Comments: Also useful for replacing boost circuits when true shutdown is required

Boost

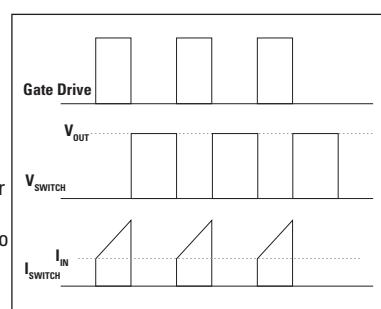

Function: Step-up ($V_{OUT} > V_{IN}$)

When to use: Typically used when transformerless, regulated output voltages larger than input voltages at output currents beyond 100 mA - 200 mA are required

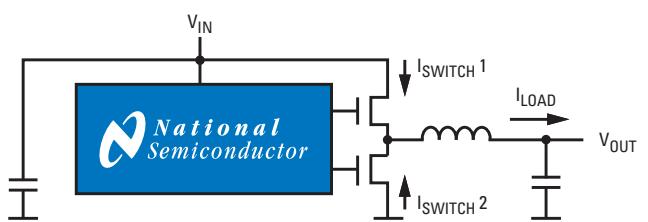

Characteristics: Best for low-power conversion (up to 10W or 20W) and output voltages less than or equal to 7x the input voltage

Devices to use: All boost/flyback regulators and controllers

Comments: Output current $V_{IN}/V_{OUT} \times 0.7$ x switch current

Synchronous Buck

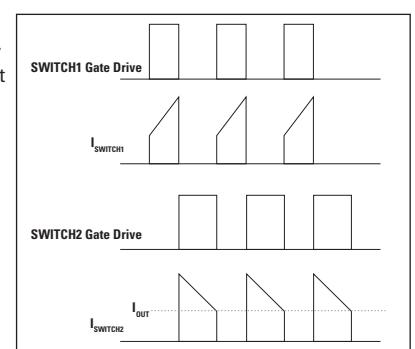

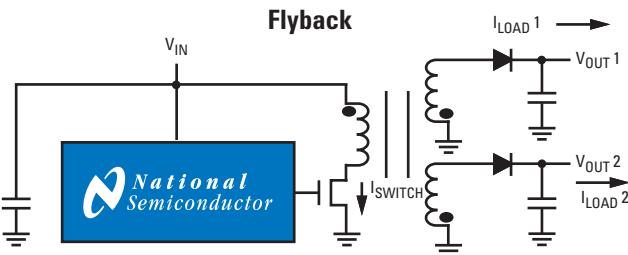

Function: Step-down ($V_{OUT} < V_{IN}$)

When to use: When high efficiency is required with high-output current ($> 5A$) or low duty cycles ($V_{IN} > 5 \times V_{OUT}$ and/or $I_{OUT} < 0.5A$)

Characteristics: A second switch replaces the diode in the basic buck topology, reducing losses in the conditions mentioned above

Devices to use: Any "synchronous rectification" buck integrated regulator or controller

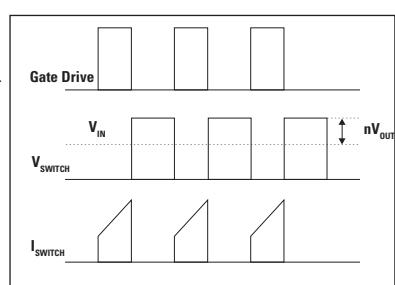

Function: Step-up, step-down, invert or buck-boost

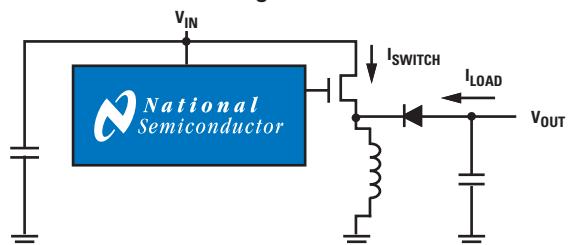

When to use: Typically when multi-output or isolation is required, when step-up beyond $8 \times V_{IN}$ is required or when the max. voltage or current of the switch needs to be extended in order to take advantage of the turns-ratio conversion from the transformer

Characteristics: Ideal for medium-power conversion (5W to 100W)

Devices to use: All boost/flyback regulators and controllers

Inverting Buck Boost

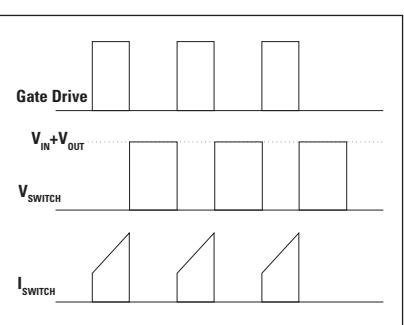

Function: Inverting (negative output from positive input, $-V_{OUT}$ can be greater than or less than V_{IN})

When to use: When an inverted, regulated output is needed. This topology is commonly used for output currents from approximately 300 mA to 5 A.

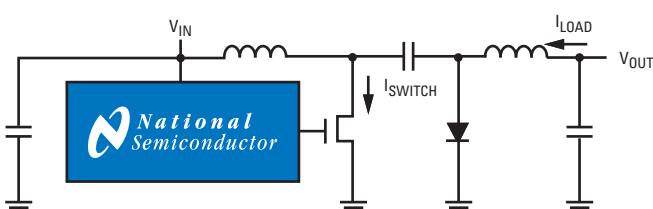

Characteristics: Easy to implement, single output

Devices to use: Any buck integrated regulator or controller (see National's App Note AN-1157 for implementing with a SIMPLE SWITCHER® buck regulator)

Comments: Alternatives for voltage inversion include cuk topologies (low noise) or switched capacitor converters where I_{OUT} is less than 200 mA (no inductor needed)

Cuk

Function: Inverting (V_{OUT} is negative; V_{IN} is positive)

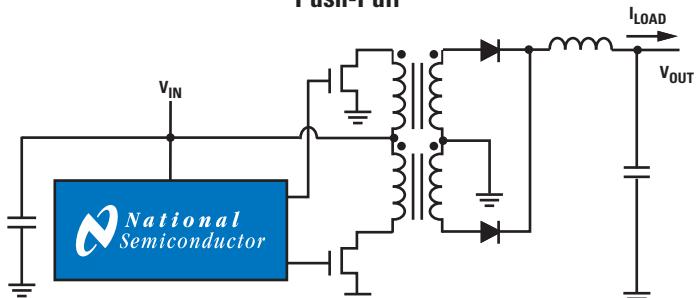

When to use: When a regulated, negative, low-ripple voltage is needed from a positive supply

Characteristics: Continuous current at input and output translates into a very low-ripple/very low-noise design

Devices to use: Any boost/flyback regulator – this is easiest with parts that have a negative FB input pin

Comments: OK for isolation when a 1:1 transformer is added

Push-Pull

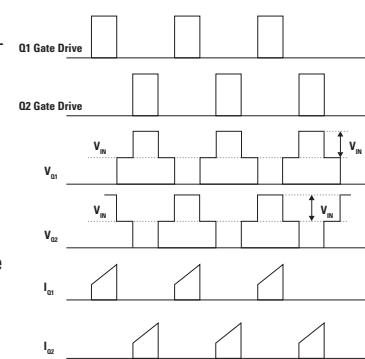

Function: Isolated step-down, step-up or buck-boost and multiple outputs

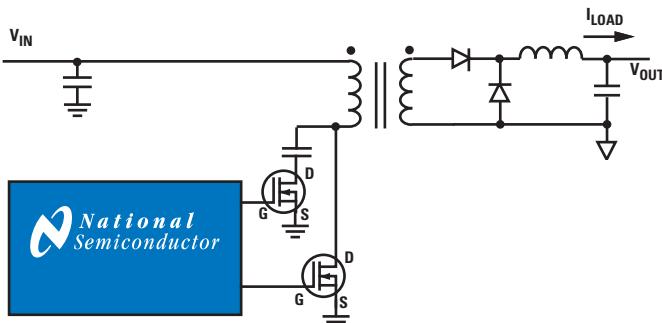

When to use: When isolated, medium-to-high power conversion is needed (25 W to 1000 W). This topology can also be used when the input voltage range is very wide or when the V_{IN}/V_{OUT} ratio instep-down applications requires a very small duty cycle (and thus might yield poor regulation) if a standard buck topology is used.

Devices to use: LM5030 current-mode push-pull controller

Comments: The peak current and voltage stress in the switches are given by: $V_{PK} = 2.6 V_{IN}$ max., $I_{PK} = 1.56 \times P_{OUT}/V_{IN}$ min.

Active Clamp Forward

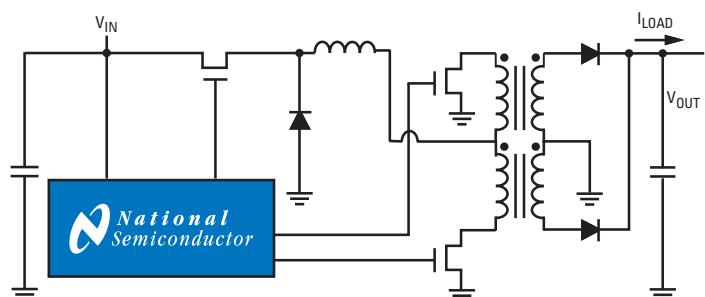

Function: Isolated, step-down or step-up

When to use: High step down ratios and/or isolated output and 100-300W power

Devices to use: LM5025, LM5026, LM5032, LM5034

Comments: Forward topology requires lower peak current than flyback. At the start of a switch conduction, the net magnetization of the transformer core must be zero. Active Clamp recycles the reset energy, improving efficiency.

Current-Fed Push-Pull (Cascaded)

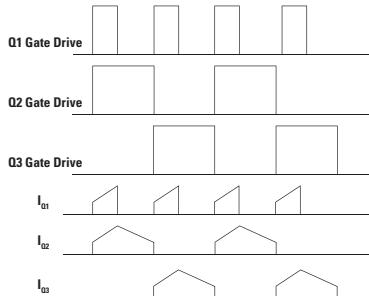

Function: Isolated step-down, step-up, or buck-boost topologies. Can do tightly regulated multiple outputs.

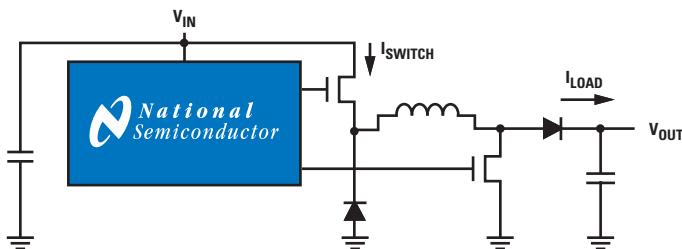

When to use: When isolated medium- to high-power conversion is needed, but reduced losses, high efficiency, and no output inductor are also desired.

Characteristics: The current-fed cascaded topology consists of a buck regulation stage followed by a push-pull isolation stage.

Because the buck stage feeds continuous current to the push-pull stage, no output inductor is required.

Single Inductor Buck & Boost

Function: Step-up and step-down

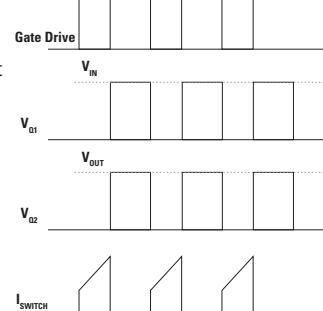

When to use: This topology is an alternative to sepic and flyback topologies when automatic step-up/step-down functionality is needed, but no transformer or second inductor is required

Characteristics: A second switch and output diode are added, resulting in an effective overlapped boost topology on top of a basic buck topology. If desired, synchronous rectification can be implemented to increased efficiency (both diodes may be replaced by FETs).

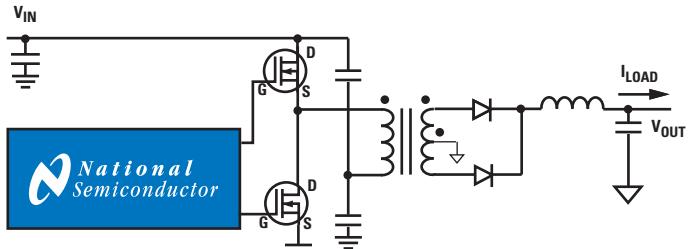

Devices to use: LM5118

Comments: Be sure to watch the voltage

applied to the gate in the second FET which will be V_{IN} . If V_{IN} is too high for the selected FET specifications, use voltage limiting circuitry.

Half Bridge

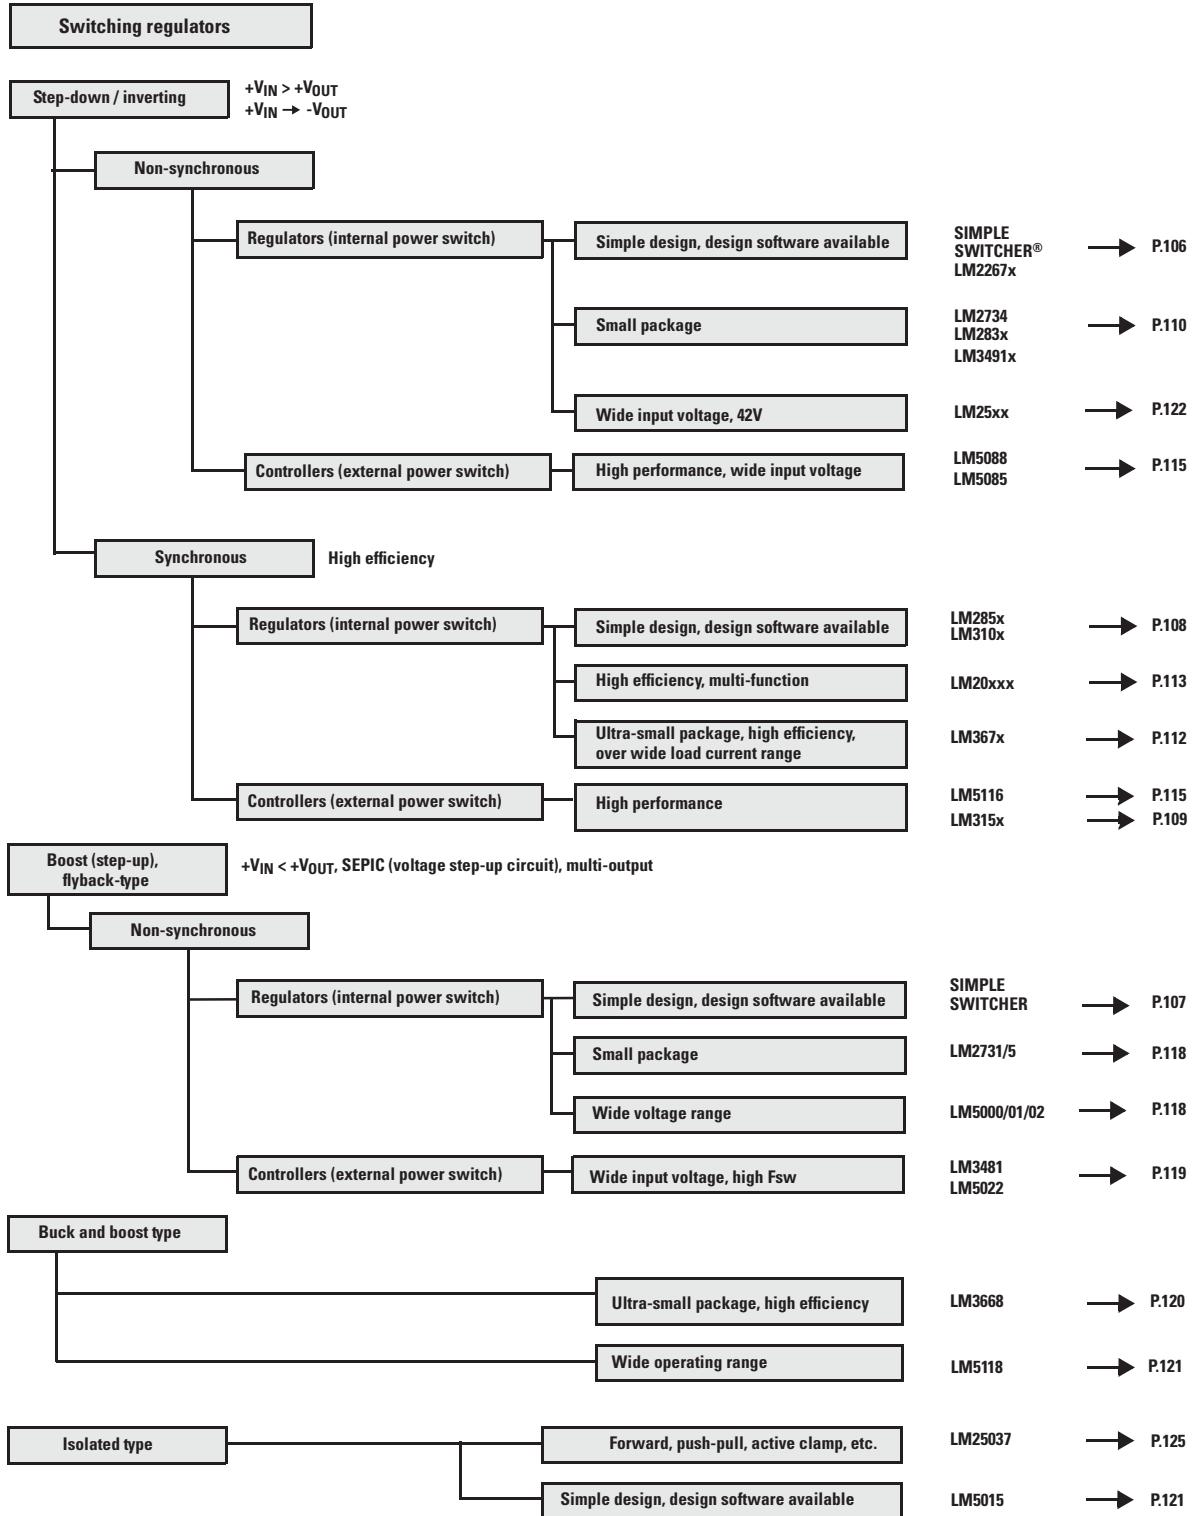

Function: Isolated, step-down or step-up

When to use: High step down ratios and/or isolated output and 200-1000W power

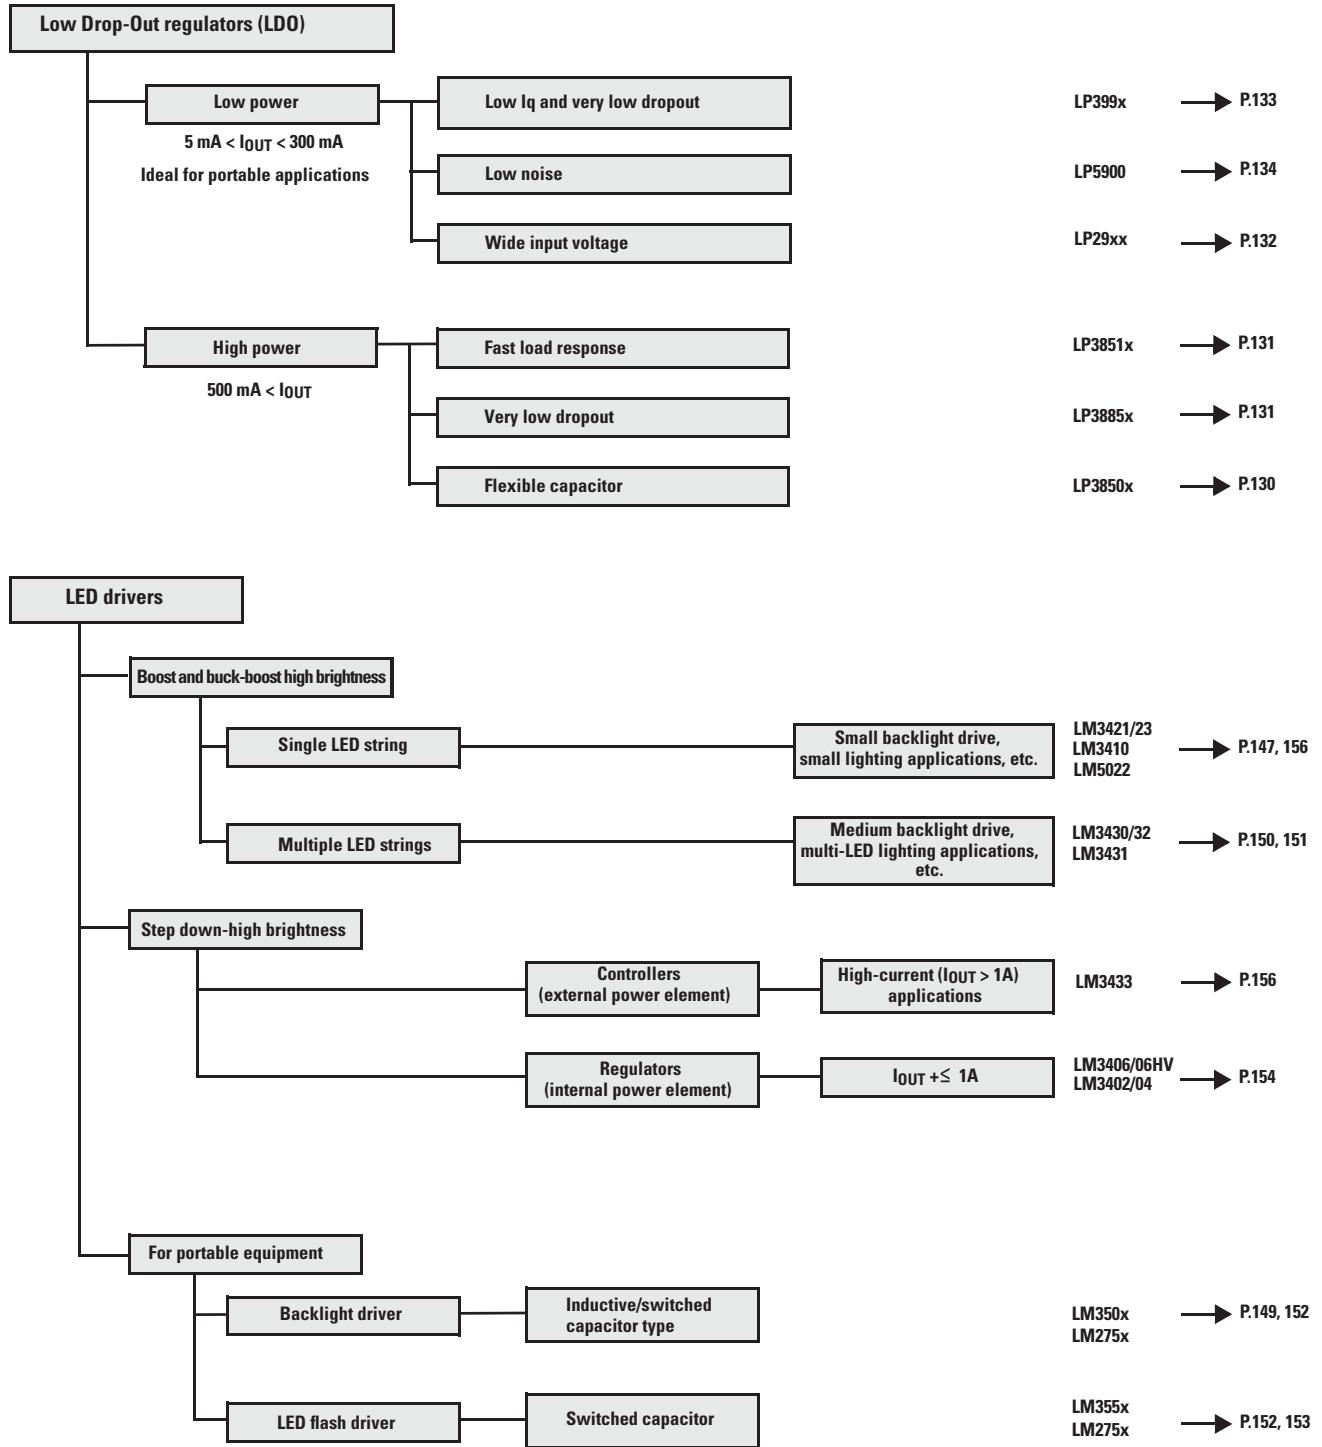

Devices to use: LM5033, LM5035

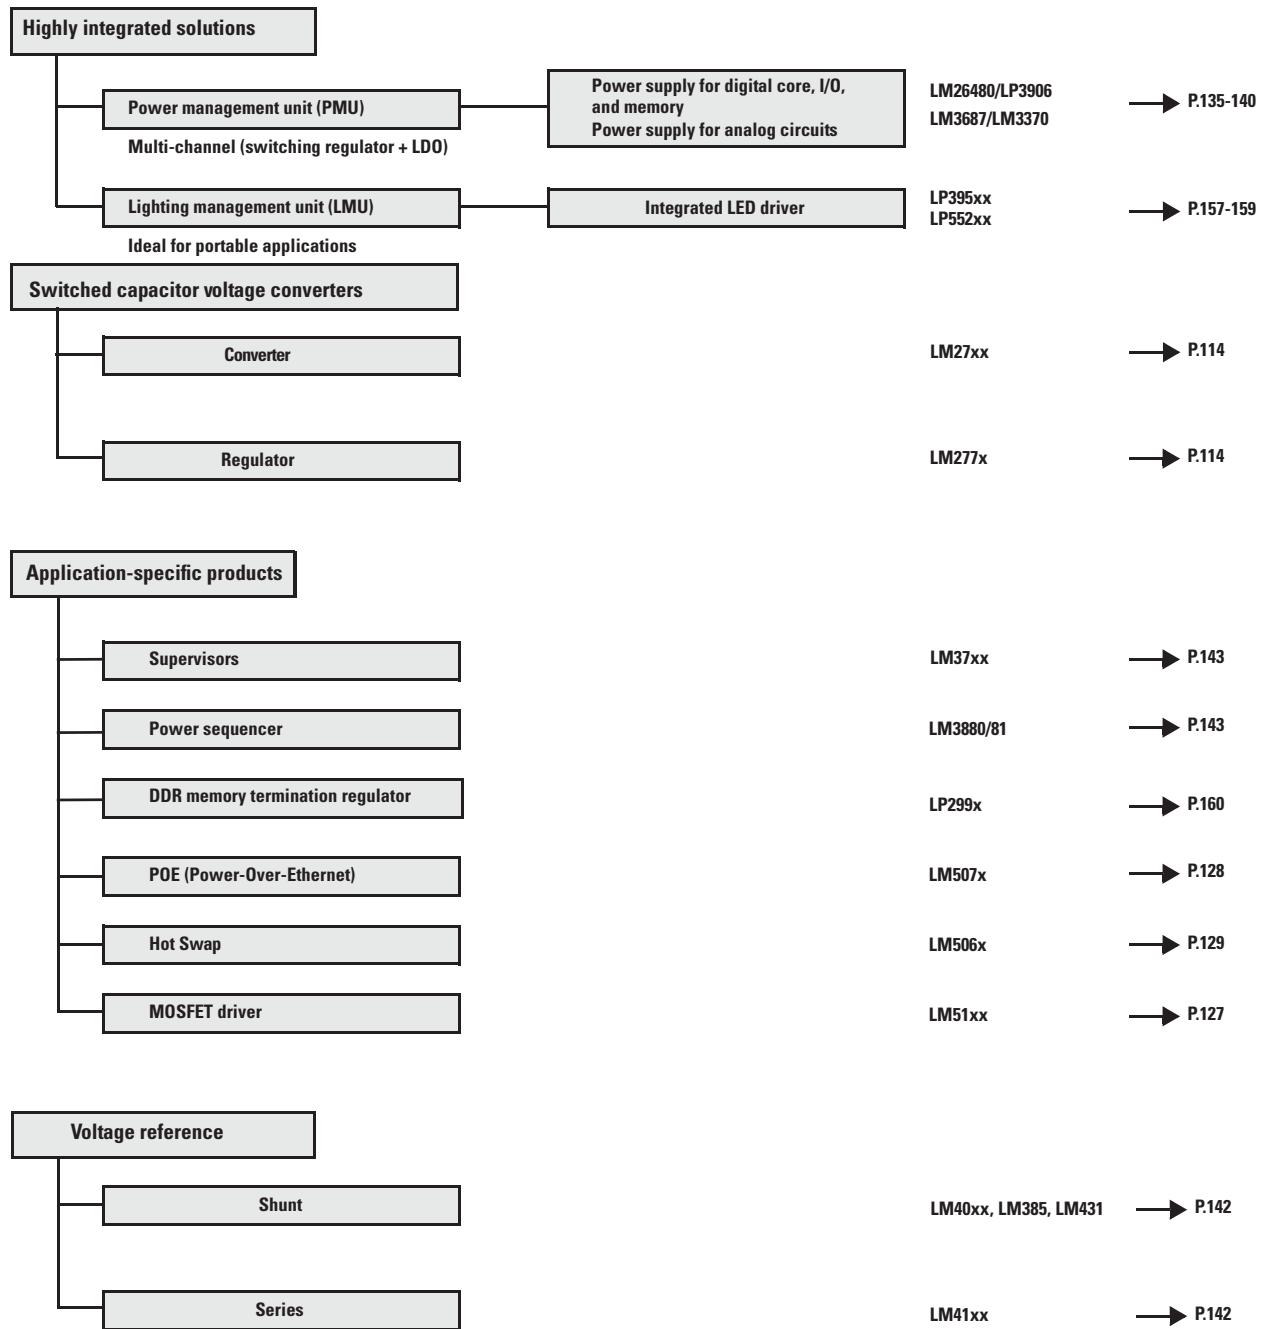

Comments: The half bridge converter is similar to the push pull converter, but FETs are subject to lower voltage stresses and a center tapped primary is not required. The reversal of the magnetic field is achieved by reversing the direction of the primary winding current flow. For higher output power capability a full bridge may be used instead.

WEBENCH® Online Design Environment

Save Development Time and Costs

WEBENCH online design and prototyping tools deliver results faster than ever. Now you have the world's most powerful and award-winning online design environment right at your

fingertips. Design, optimize, generate your prototype, and download your test vectors—all online. And do it all for free, anywhere, anytime.

Select It

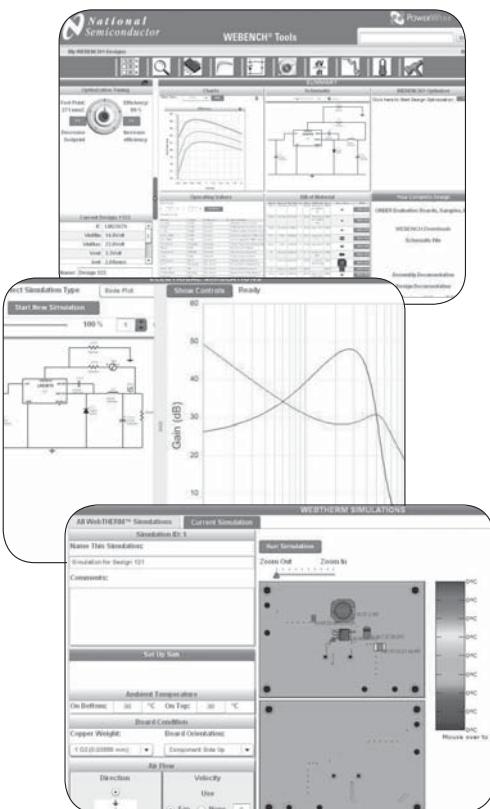

- Input your design requirements
- Choose a recommended part from a customized list

Choose from only those parts that meet your specifications

Design It

- Adjust components and use charts to make design decisions based on power dissipation, current flow, offset voltage, drift, frequency response, output-voltage ripple, efficiency, inductor-current ripple, and other electrical characteristics over the full operating range
- Exchange parts and use bill of materials graph for easy external component selection based on efficiency, footprint, cost, or vendors

Create your custom BOM using readily available parts

Analyze It

- Stimulate your circuit and evaluate performance using electrical and thermal simulations
- Overlay alternate circuits and compare results to get optimal performance

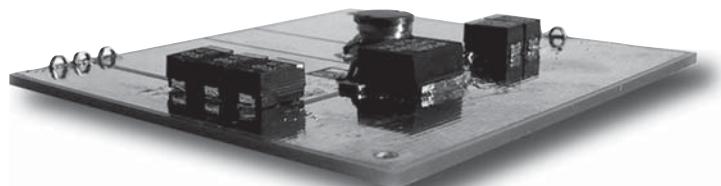

Solve your design problems before you prototype

Build It

- Request samples and purchase parts or demo boards
- Receive your custom prototyping kit the next business day
- Download your automatically generated CAD files, assembly details, test instructions, and complete performance

Save weeks getting your final design into production

24 HOUR SHIPPING!

Power Supply Design Tool

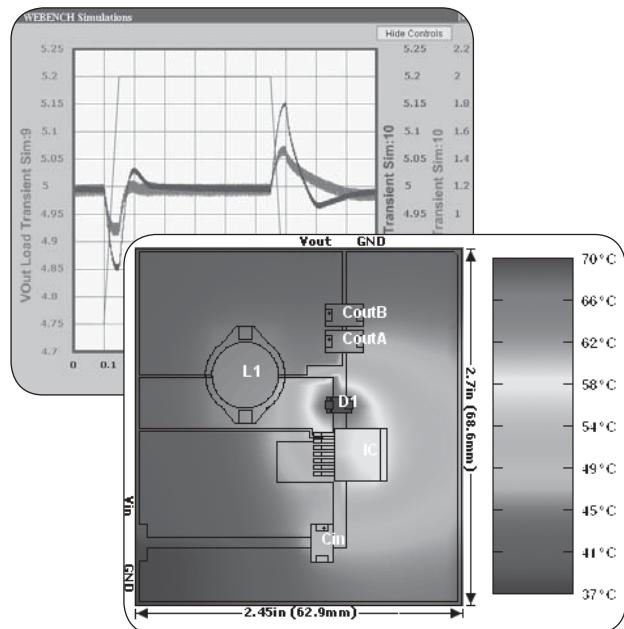

The WEBENCH environment provides the end-to-end design and prototyping tools you need to create power supplies that meet your design's requirements. WEBENCH tools let designers solve design problems before prototyping—alleviating the time and trouble associated with traditional design methods.

WEBENCH Electrical Simulator

Use this tool to simulate your power supply circuit. Use probe points on a schematic display to examine waveforms, change component values, and view a history of simulation results to fine-tune your design.

WebTHERM™ Thermal Simulator

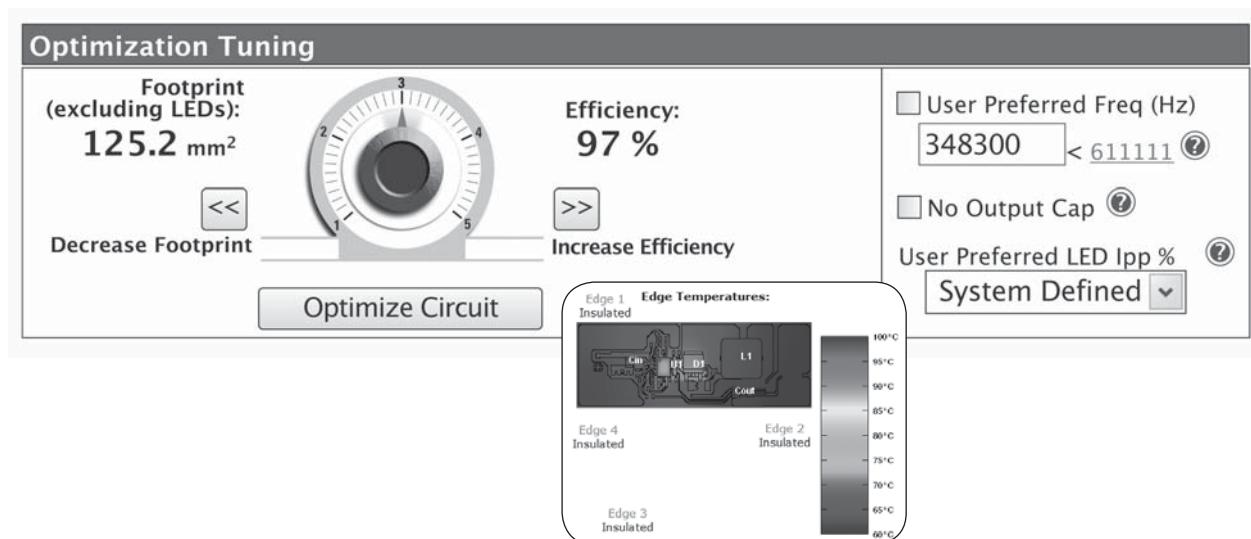

Use this tool to simulate thermal behavior of an electronic PCB. Define the environment, solve thermal problems and output a color plot of the PCB under user specified load and environmental conditions.

Optimization Tool

Use the new WEBENCH optimization tool to quickly tune your design and balance your design objectives. By simply rotating a knob, you can achieve minimum component footprint, maximum efficiency, or a combination of both. Other key features include the ability to directly specify the switching frequency, and, for

LED designs, specify output ripple current and eliminate the output capacitor. Use an alternate passive components list to make tradeoffs for key parameters such as voltage, current, price, size, and other electrical parameters.

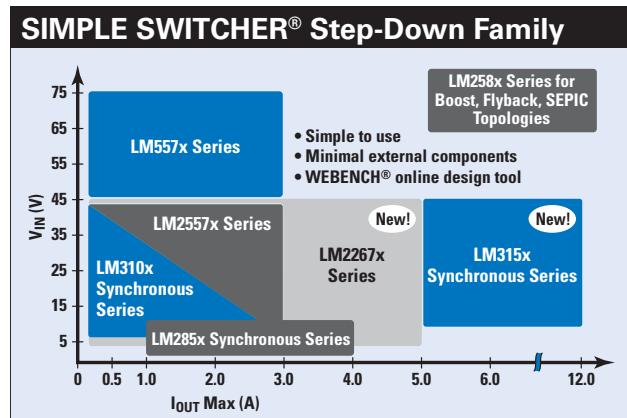

SIMPLE SWITCHER® Solutions

WEBENCH® Power Designer Tool Offers Flexibility and Time-Saving Design Capabilities

National's award-winning SIMPLE SWITCHER® products allow you to design and optimize robust power supplies with a minimum set of external components. Supporting input voltage ranges of 3V to 75V, each SIMPLE SWITCHER series provides you with multiple products with pin-to-pin compatibility for added design flexibility. Plus, all SIMPLE SWITCHER products utilize National's WEBENCH Power Designer end-to-end design and prototyping tools.

SIMPLE SWITCHER Products and WEBENCH Power Designer

NEW! LM2267x AND LM22680 SIMPLE SWITCHER Regulators

The LM2267x and LM22680 SIMPLE SWITCHER regulators provide intuitive, easy-to-use design capabilities while delivering high performance and flexibility.

Features

- Wide input voltage range from 4.5V to 42V
- Load currents from 0.5A to 5A
- Adjustable and fixed output voltages down to 1.285V
- Adjustable and fixed switching frequencies allows for optimization between size and efficiency (up to 1 MHz)
- Frequency sync up to 1 MHz allows for easy management of EMI and/or input capacitance optimization
- Precision enable – precise turn-on and turn-off for power sequencing needs assists with proper system startup
- External soft-start – flexibility to control output voltage rampup, ensuring proper end-system startup to avoid latch up conditions
- PSOP-8 and TO263-7 THIN packages – exposed DAPs provide enhanced thermal dissipation, halogen-free and lead-free
- Fully enabled for WEBENCH® online design tool

Product ID	Input Max Voltage (V)	Input Min Voltage (V)	Output Min (V)	Output Current (mA)	Frequency Range (kHz)	Sync	PWM Mode	Packaging
LM22671/74	42	4.5	1.285	500	500 to 1000 Adj	✓/-	Voltage	PSOP-8
LM22672/75	42	4.5	1.285	1000	500 to 1000 Adj	✓/-	Voltage	PSOP-8
LM22680	42	4.5	1.285	2000	500 to 1000 Adj	✓	Voltage	PSOP-8
LM22670/73/76	42	4.5	1.285	3000	500 to 1000 Adj	✓/-	Voltage	TO263-7 Thin, PSOP-8
LM22677/78/79	42	4.5	1.285	5000	500 to 1000 Adj	✓/-	Voltage	TO263-7 Thin

SIMPLE SWITCHER® Regulators

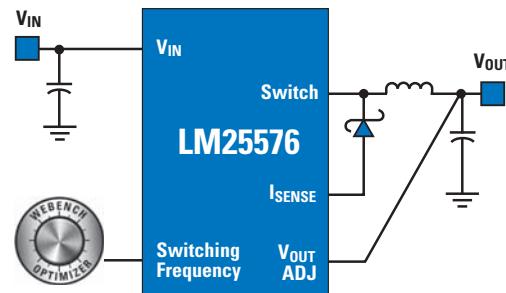

LM2557x/LM557x – PowerWise® SIMPLE SWITCHER Regulators Deliver Customized Performance and Flexibility to Fit Your Design

New Emulated Current Mode (ECM) SIMPLE SWITCHER® Family Features

- High V_{IN} to low V_{OUT} step-down ratios
- Superior transient response
- Fast design, guaranteed performance and flexibility
- Fully WEBENCH® enabled

Applications:

Ideal for use in designing a power supply optimized for your design that's guaranteed to work

SIMPLE SWITCHER Non-Synchronous Regulators

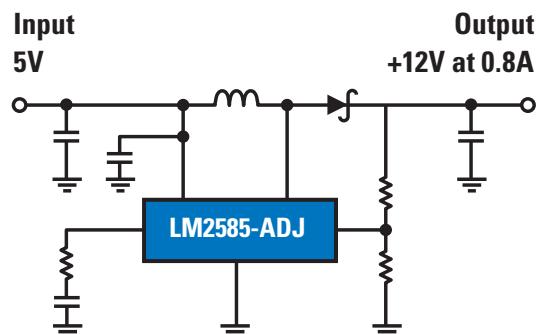

Product ID	Input Max Voltage (V)	Input Min Voltage (V)	Output Min (V)	Output Max (V)	Output Current (mA)	Frequency Range (kHz), Sync	On/Off Pin	PWM Mode	Packaging
LM25574	42	6	1.23	40	500	50 to 1000, Sync	✓	Current	TSSOP-16

PowerWise product

LM258x – Boost/Flyback/SEPIC SIMPLE SWITCHER Series

Features

- NPN output switches support up to 5.0A and can stand off 65V
- Wide input voltage range: 4V to 40V
- Current-mode operation for improved transient response, line regulation, and current limit
- 100 to 200 kHz switching frequencies supported
- Internal soft-start function reduces in-rush current during startup
- Output transistor protected by current limit, under voltage lockout, and thermal shutdown
- System output voltage tolerance of $\pm 4\%$ max over line and load conditions
- Available in both TO-220 and TO-263 packaging

SIMPLE SWITCHER Boost/Flyback/SEPIC

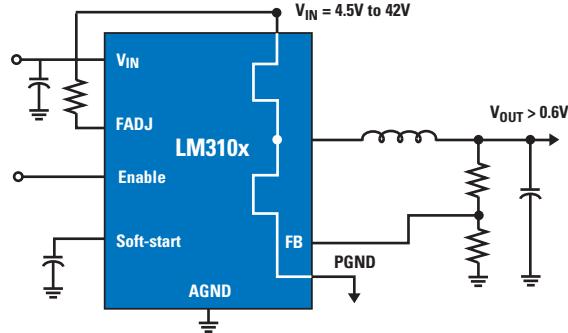

Product ID	Input Max Voltage (V)	Input Min Voltage (V)	Output Min Voltage (V)	I _{OUT}	Frequency Range (kHz), Sync	Packaging
LM2585	40	4	1.23	3	100	TO-220, 20-263
LM2586	40	4	1.23	3	100 to 200	TO-220, 20-263
LM2587	40	4	1.23	5	100	TO-220, 20-263
LM2588	40	4	1.23	5	100 to 200	TO-220, 20-263

SIMPLE SWITCHER® Synchronous Regulators

LM310x – PowerWise® Synchronous SIMPLE SWITCHER® Step-Down Regulators

Features

- COT control provides lightning-fast transient response
- Stable with ceramic capacitors
- Near-constant frequency operation from unregulated supplies
- No loop compensation reduces external component count
- Pre-bias startup
- DCM operation for a light load
- Over voltage protection
- Available in thermally-enhanced eTSSOP-20 packaging

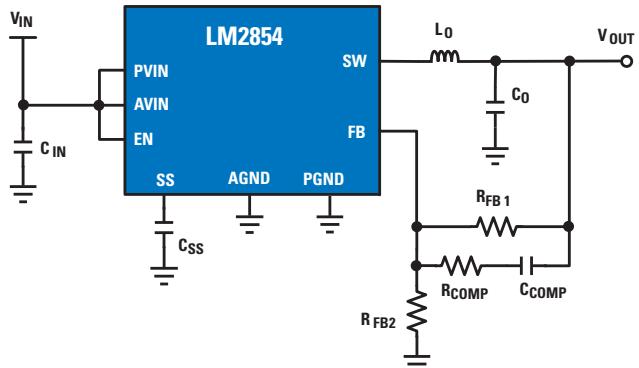

Applications:

Ideal for use in embedded systems, industrial controls, automotive telematics and body electronics, Point-of-Load (POL)

LM285x – PowerWise 500 kHz/1 MHz Synchronous SIMPLE SWITCHER Step-Down Regulator

Features

- Input voltage range of 2.95V to 5.5V
- Maximum load current of 4A
- Fixed switching frequency of 500 kHz or 1 MHz
- Adjustable output down to 0.8V
- Wide bandwidth voltage mode control loop, partial internal compensation
- Pre-biased load startup capability
- 100% duty cycle capability
- Available in eTSSOP-16 packaging

Applications:

Ideal for use in low voltage point of load regulation, local solution for PGA/DSP/ASCI/μP core or I/O power, broadband, communications infrastructure

Simple Switcher Synchronous Regulators

Product ID	Input Max Voltage (V)	Input Min Voltage (V)	Output Min (V)	Output Max (V)	Output Current (mA)	Frequency Range (kHz) & Sync (computed field)	PWM Mode	Packaging

LM2854	5.5	2.95	0.8	VIN	4000	500, 1000	Voltage	eTSSOP-16

PowerWise product

NEW!

LM315x – SIMPLE SWITCHER® Synchronous Controllers

Designed to support higher current applications, the LM315x SIMPLE SWITCHER® controllers are National's newest addition to its popular brand of switching solutions.

Features

LM315x controller

- Input voltage ranging from 6V to 42V
- Output current up to 12A
- Constant On-Time control eliminates the need for complex compensation circuitry
- Patent-pending Emulated Ripple Mode allows for the use of low ESR output capacitors for reduced solution size and reduced output voltage ripple
- Synchronous architecture for added efficiency
- Exposed pad TSSOP-14 packaging for enhanced thermal performance
- Fully WEBENCH® enabled

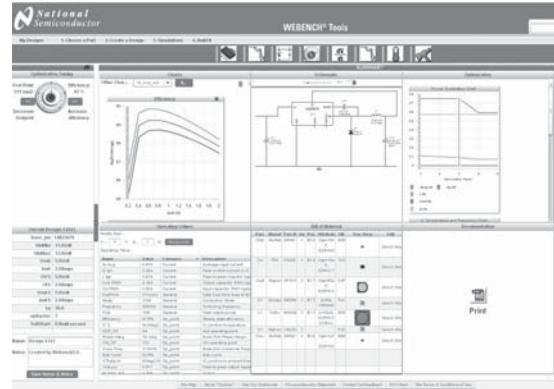

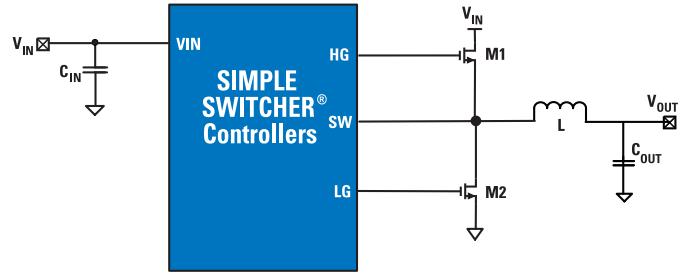

LM3150 controller

- Adjustable output voltage down to 0.6V
- Adjustable frequency up to 1 MHz

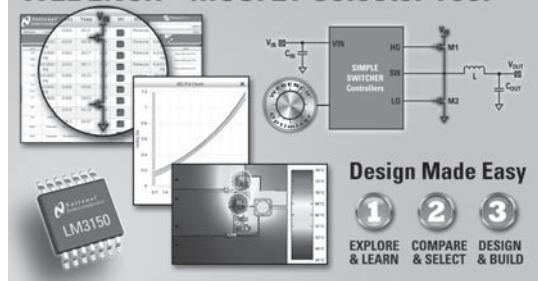

LM3151/52/53 controller

- Fixed output voltages: 3.3V
- Fixed frequencies: 250 kHz, 500 kHz, 750 kHz

Features robust design tools including the enhanced WEBENCH® Power Designer online tool, external component selection, new WEBENCH MOSFET selection tool, electrical and thermal simulation, and board evaluation

SIMPLE SWITCHER® Controllers & WEBENCH® MOSFET Selector Tool

PowerWise product

Non-Synchronous Step-Down (Buck) Switching Regulators

LM27341/42 – 1.5A/2A Wide Input Range Buck Regulator with Frequency Synchronization

Features

- 3.0V to 20V input voltage range
- 1V to 18V output voltage range
- 2 MHz fixed switching frequency
- 1% internal voltage reference accuracy
- 1 MHz to 2.35 MHz frequency synchronization
- 30 nA shutdown current
- 150 mΩ NMOS switch with internal bootstrap supply
- Available in space -saving 3 mm x 3 mm LLP-10 and eMSOP-10 packaging

Applications:

Ideal for 12V to point-of-load conversions in communications, industrial, medical ultrasound, and automotive infotainment applications

Non-Synchronous Step-Down (Buck) Switching Regulators

Product ID	Input Max Voltage (V)	Input Min Voltage (V)	Output Min (V)	Output Max (V)	Output Current (mA)	Frequency Range (KHz) & Sync	On/Off Pin	PWM Mode	Packaging

PowerWise® product

LM26001/03 – PowerWise® 1.5/3.0A Buck Regulator Delivers Industry-Leading Low I_q and Feedback Voltage Accuracy

Features

- High-efficiency sleep mode (40 μ A I_q typ.)
- 10 μ A in shutdown mode
- 3V cold-crank compatibility
- 4V to 38V continuous input range
- 1.5% reference accuracy
- Frequency synchronization
- Low input version LM26001B (4.8V to 18V)
- Available in eTSSOP-16/20 exposed-pad packaging

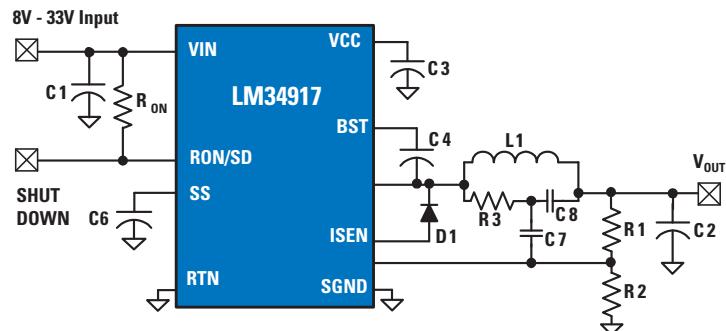

Basic Step-Down Regulator

LM34917A – PowerWise® Ultra-Small 1.25A Buck Switching Regulator with Intelligent Current Limit and OVP

Features

- Wide operating range: 8V to 33V (transient capability to 50V)
- Input Over-Voltage Shutdown at 35V
- Integrated N-Channel buck switch
- Constant On-Time (COT) control for ultra-fast transient response
- Operating frequency remains nearly constant with load current and input voltage variations
- Valley current limit varies with V_{IN} and V_{OUT} to reduce excessive inductor current
- No loop compensation is required
- Maximum switching frequency: 2 MHz
- Available in micro SMD-12 packaging

Applications:

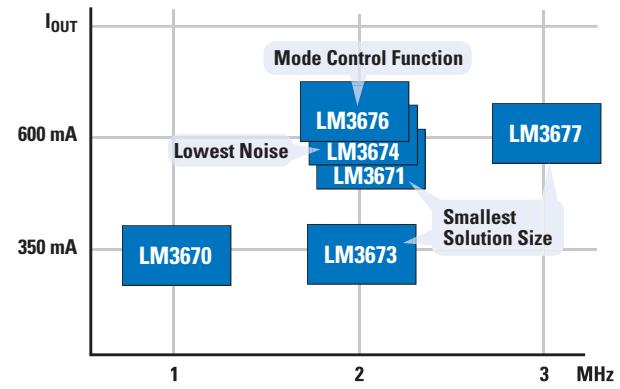

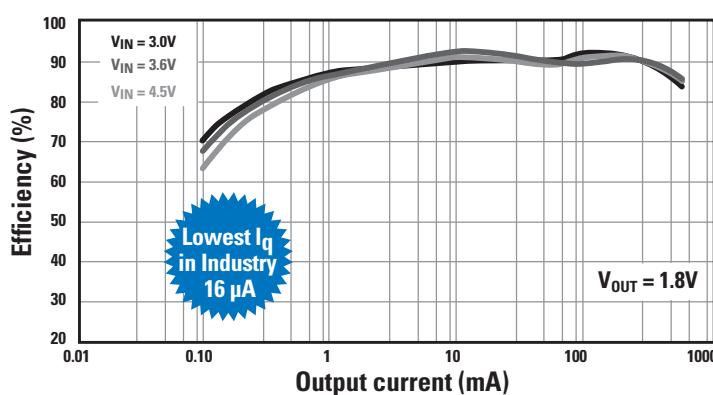

Ideal for use in high-efficiency Point-Of-Load (POL) regulators, non-isolated buck regulator, and portable applications

Synchronous Step-Down (Buck) Switching Regulators

LM3677 – PowerWise® Highest-Efficiency DC-DC Converters in Smallest Solution Size

Features

- >90% efficiency in PWM mode and lowest standby I_Q (16 μA) in the industry
- Smallest switcher in the industry, 3 MHz switching frequency (1 μH chip inductor) and tiny ceramic capacitors
- Tight V_{OUT} accuracy, tiny V_{OUT} ripple (5 mV peak-peak) and excellent transient response
- Available in micro SMD-5 packaging for optimal solution size

PowerWise product

LM20xxx – PowerWise® Family of High-Efficiency, Full-Featured Synchronous Buck Regulators

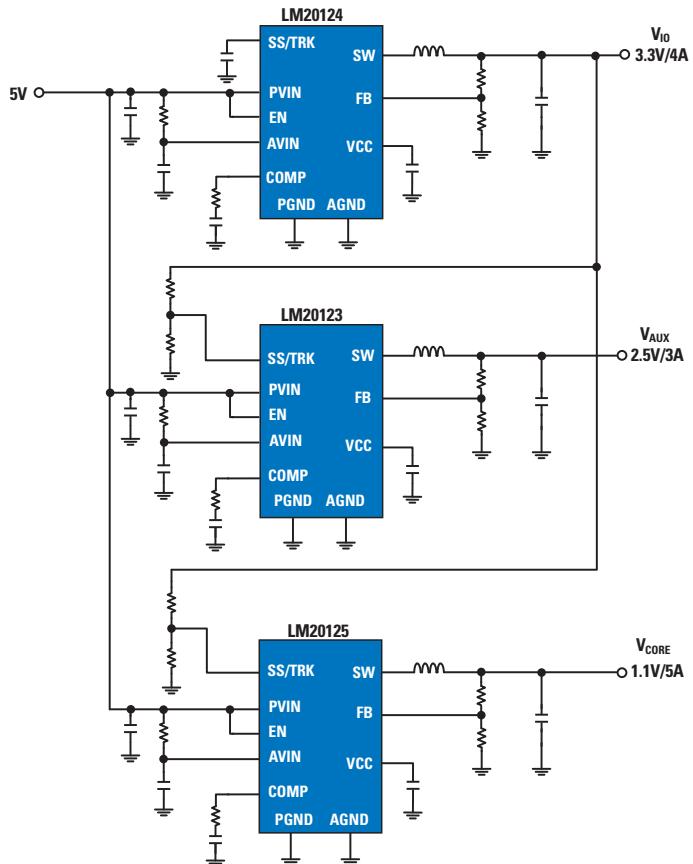

Features

- Fixed and adjustable switching frequency
- Clock synchronization in and out
- External soft-start
- Tracking
- Precision enable
- POWER GOOD
- Pre-biased startup
- Enhanced system reliability
 - High-accuracy current limit
 - Over-voltage protection, under voltage lockout, and over-current protection
- Available in eTSSOP-16 packaging

Applications:

Ideal for use in powering FPGAs, DSPs, and microprocessors in servers, networking equipment, optical networks, and industrial power supplies

Sequencing and Tracking for Multiple Rails Typical Application

PowerWise product

Switched-Capacitor Converters and Regulators

LM2772 – Switched-Capacitor Buck Regulator in Tiny Package

Features

- Output current up to 150 mA
- 1.2V output voltage
- Inductor-less charge pump solution minimizes PCB board space
- PFM mode during light load operation maximizes standby times in battery powered applications
- 1.1 MHz fixed-frequency switching minimizes output voltage ripple and optimizes output voltage precision
- Multiple gain architecture provides high efficiency over entire input voltage range
- Built-in thermal protection to protect from damage due to overheating
- Available in LLP-10 packaging for optimizing solution size

Applications:

Ideal for use in DSP, memory, and microprocessor power for cellular handsets, and battery-powered devices

PowerWise product

Step-Down (Buck) Switching Controllers

LM(2)5085 – 42V/75V Constant On-Time PFET Buck Switching Controller

Features

- Adjustable current limit using RDS(ON) or a current sense resistor
- Programmable switching frequency up to 1 MHz
- No loop compensation required
- Ultra-fast transient response
- Nearly constant operating frequency reduces EMI and provides more stable switching
- Adjustable output voltage from 1.25V
- Capable of 100% duty cycle operation
- Internal soft-start timer
- Integrated high-voltage bias regulator
- Thermal shutdown

Non-Synchronous Step-Down (Buck) Switching Controllers

PowerWise® product

Synchronous Step-Down (Buck) Switching Controllers

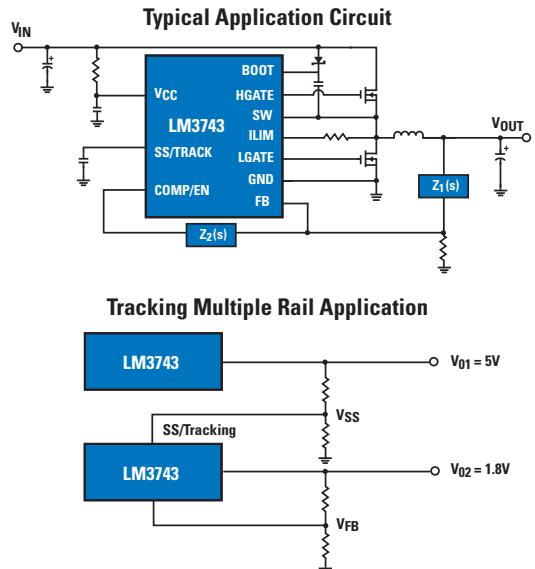

LM3743 – PowerWise® Synchronous 1 MHz Buck Controller with Programmable Tracking

Features

- IC and power supply input voltage from 3V to 5.5V
- Output voltage adjustable down to 0.8V
- $\pm 1.75\%$ reference accuracy over full temperature and input voltage range
- Externally programmable soft-start with tracking capability
- Low-side sensing programmable current limit without sense resistor
- Fixed high-side sensing for supplemental short-circuit protection
- Available in tiny plastic MSOP-10 packaging

Applications:

Ideal for use in communications, high-end consumer, computing, and industrial applications

LM2747 – PowerWise Synchronous Buck Controller with 1% Voltage Feedback Accuracy Across -40 to +125°C

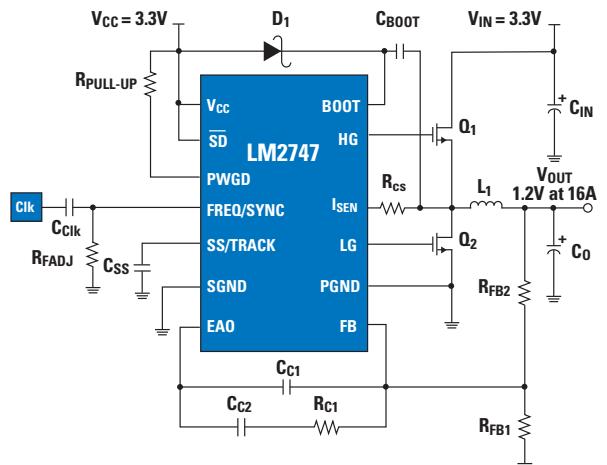

Synchronous Buck Controllers

Product ID	Operating Frequency	Product Features	Packaging
LM2742	50 kHz to 2 MHz	1.5% accuracy 0°C to 125°C, start-up delay	TSSOP-14
LM2743	50 kHz to 1 MHz	2% accuracy -40°C to 125°C, start-up delay	TSSOP-14
LM2744	50 kHz to 1 MHz	External reference, start-up delay, tracking	TSSOP-14
LM2745	50 kHz to 1 MHz	Pre-bias operation, external clock 250 kHz to 1 MHz, tracking	TSSOP-14
LM2746	50 kHz to 1 MHz	1% accuracy 0°C to 85°C, start-up delay, tracking	eTSSOP-14
LM2747	50 kHz to 1 MHz	1% accuracy -40°C to 125°C, pre-bias operation, external clock, programmable soft-start, tracking	TSSOP-14
LM2748	50 kHz to 1 MHz	1.5% accuracy -40 to 125, tracking	TSSOP-14

PowerWise product

Applications:

Ideal for use in cable modems, DSL and ADSL, laser and ink jet printers, low voltage power modules, DSP, ASIC, core, and portable computing

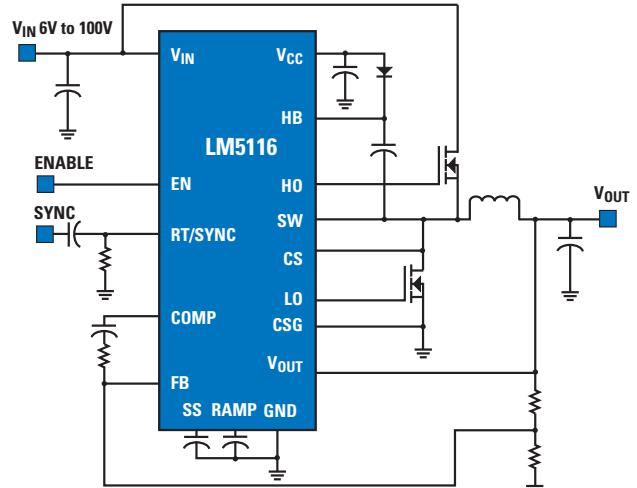

LM5116 – PowerWise® 6V to 100V Emulated Current-Mode Buck Controller

Features

- Ultra-wide input range: 6V to 100V
- Programmable output from 1.215V to 80V
- Less than 10 μ A I_q in shutdown mode
- Frequency adjustable to 1 MHz with sync capability
- Programmable soft-start
- Drives standard or logic-level MOSFETs
- RDS(ON) or resistor current sensing
- Available in thermally-enhanced TSSOP-20EP packaging

Applications:

Ideal for use in telecommunications, automotive, and industrial control applications

Read Analog Edge AN-1628
“Minimizing FET Losses For a High-Input Rail Buck Converter”
www.national.com/analogedge

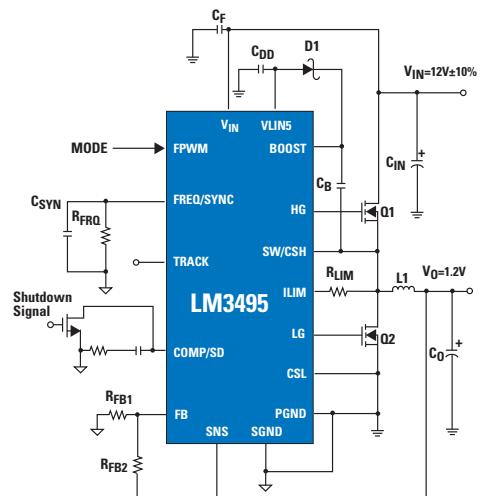

LM3495 – ±1% Accurate, Ultra-High Precision PWM Buck Controller

Features

- Input voltage from 2.9V to 18V
- Adjustable output from 0.6V to 5.5V
- Feedback accuracy: ±1% over temperature
- Switch node fault protection
- Hiccup mode current limit protection for reduced thermal design
- Available in TSSOP-16 packaging

Applications:

Ideal for use in ASICs, FPGAs, DSPs, embedded controller power supplies, industrial applications, and high output current power modules

Step-Up (Boost) Switching Regulators

LM2735 – Integrated 2.1A Switch, Internal Compensation in Tiny Packages

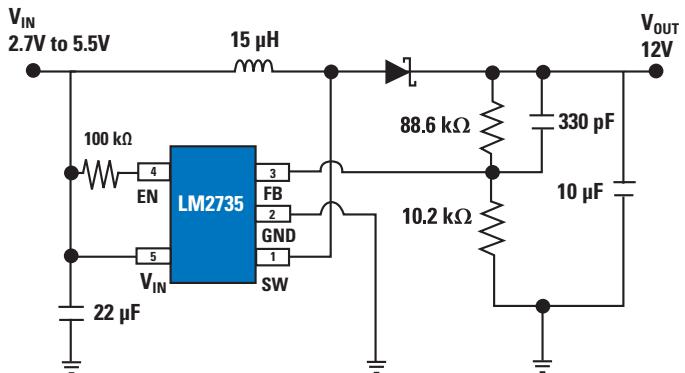

Features

High Current Density

- 2.1A switch current over full temperature range
- Boost from 5V to 12V at 700 mA

Easy-to-Use, Small Solution Size

- Internal compensation allows for ease-of-use and minimal external components
- 1.6 MHz operating frequency uses tiny passive components
- Available in SOT23-5, LLP-6, and eMSOP-8 packaging, making this product ideal for space-constrained applications

Step-Up (Boost) Switching Regulators

Product ID	Switch Current (A)	Input Min Voltage (V)	Input Max Voltage (V)	Frequency Range (kHz) and Sync	Output Min (V)	Output Max (V)	On/Off Pin	Packaging

PowerWise product

Boost and Buck-Boost Regulators

LM3668 – Inductive Buck-Boost DC-DC Converter

Features

- 1A current capability
- Voltage select pin allows output voltage flexibility (2.8V/3.3V)
- Mode pin toggles between automatic PFM/PWM operation or forced PWM operation
- Frequency sync from 1.6 MHz to 2.7 MHz allows customization for lowest noise in system
- V_{IN} range from 2.5V to 5.5V supports Li-Ion batteries
- >90% efficiency maximizes battery life
- Low I_Q (45 μ A) in standby mode decreases current leakage in design
- Excellent transient response allows V_{OUT} to stay within regulation under all conditions
- Available in tiny LLP-12 packaging

Applications:

Ideal for use in handset peripherals, MP3 players, pre-regulation for linear regulators, PDAs, portable hard disk drives, and WiMax modems

Buck-Boost Inductive Regulators

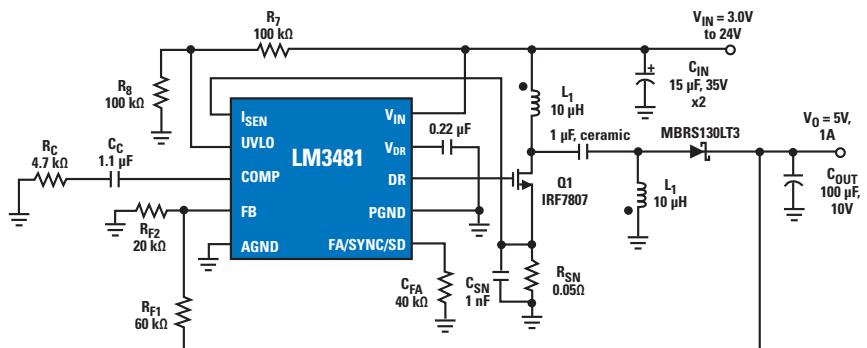

Product ID	Input Max Voltage (V)	Input Min Voltage (V)	Output Min (V)	Output Max (V)	Switch Current (A)	Frequency Range (kHz) and Sync	PWM Mode	Topology	Packaging

Boost and Buck-Boost Controllers

LM3481 – High-Efficiency Low-Side N-Channel Controller for Switching Regulators

Features

- Wide operating range: 2.97V to 48V
 - Internal push-pull driver with 1A peak current capability
 - 100 kHz to 1 MHz adjustable and synchronizable clock frequency
 - 5 μ A shutdown current (over temperature)
 - Adjustable undervoltage lockout with hysteresis
 - Frequency compensation optimized with a capacitor and a resistor
 - 1.5% (over temperature) internal reference
 - Available in MSOP-10 packaging

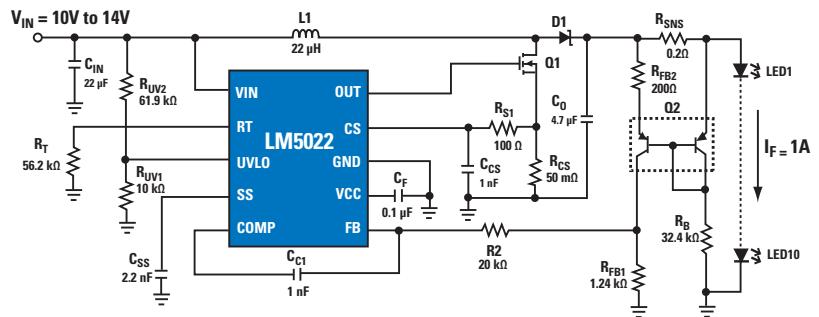

Applications:

Ideal for use in distributed power systems, offline power supplies, set-top boxes, and portable applications

LM5022 – 60V Low-Side Controller for Boost and SEPIC Regulators

Features

- Internal 60V startup regulator
 - 1A peak MOSFET gate driver
 - V_{IN} range 6V to 60V
 - Duty cycle limit of 90%
 - Programmable UVLO with hysteresis
 - Cycle-by-cycle current limit
 - External synchronizable (AC-coupled)
 - Single resistor oscillator frequency set
 - Available in MSOP-10 packaging

Applications:

Ideal for use in telecommunications, networking equipment, automotive, and industrial applications

Boost and Buck-Boost Controllers

Product ID	Input Max Voltage (V)	Input Min Voltage (V)	Output Min Voltage (V)	Frequency Range (kHz) and Sync	On/Off Pin	Topology	Packaging
LM5021	30	8	Set by external feedback network	50 to 1000, Sync	✓	Flyback, Forward	MSOP-8

 PowerWise product

Two-Switch Buck-Boost Controller and Two-Switch Forward Regulator

LM5118 – Wide Voltage Range Buck-Boost Controller

Features:

- Ultra-wide input voltage range from 3V to 75V
- Emulated peak current mode control
- Smooth transition between step-down and step-up modes
- $10 \mu\text{A}$ I_q in shutdown mode
- Switching frequency programmable to 500 kHz
- Oscillator synchronization capability
- Internal high voltage bias regulator
- Integrated high- and low-side gate drivers
- Programmable soft-start time
- Ultra low shutdown current
- Enable input wide bandwidth error amplifier
- 1.5% feedback reference accuracy
- Thermal shutdown
- Available in TSSOP-20 packaging

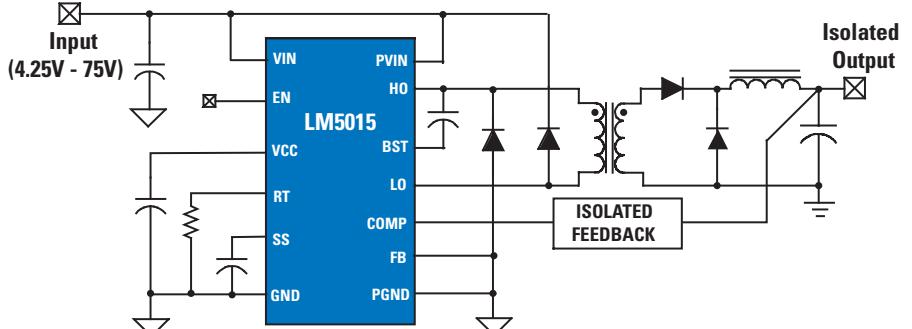

Applications:

Ideal for use in automotive, telecommunications, battery-powered systems

LM5015 – High-Voltage Monolithic Two-Switch Forward DC-DC Regulator

Features

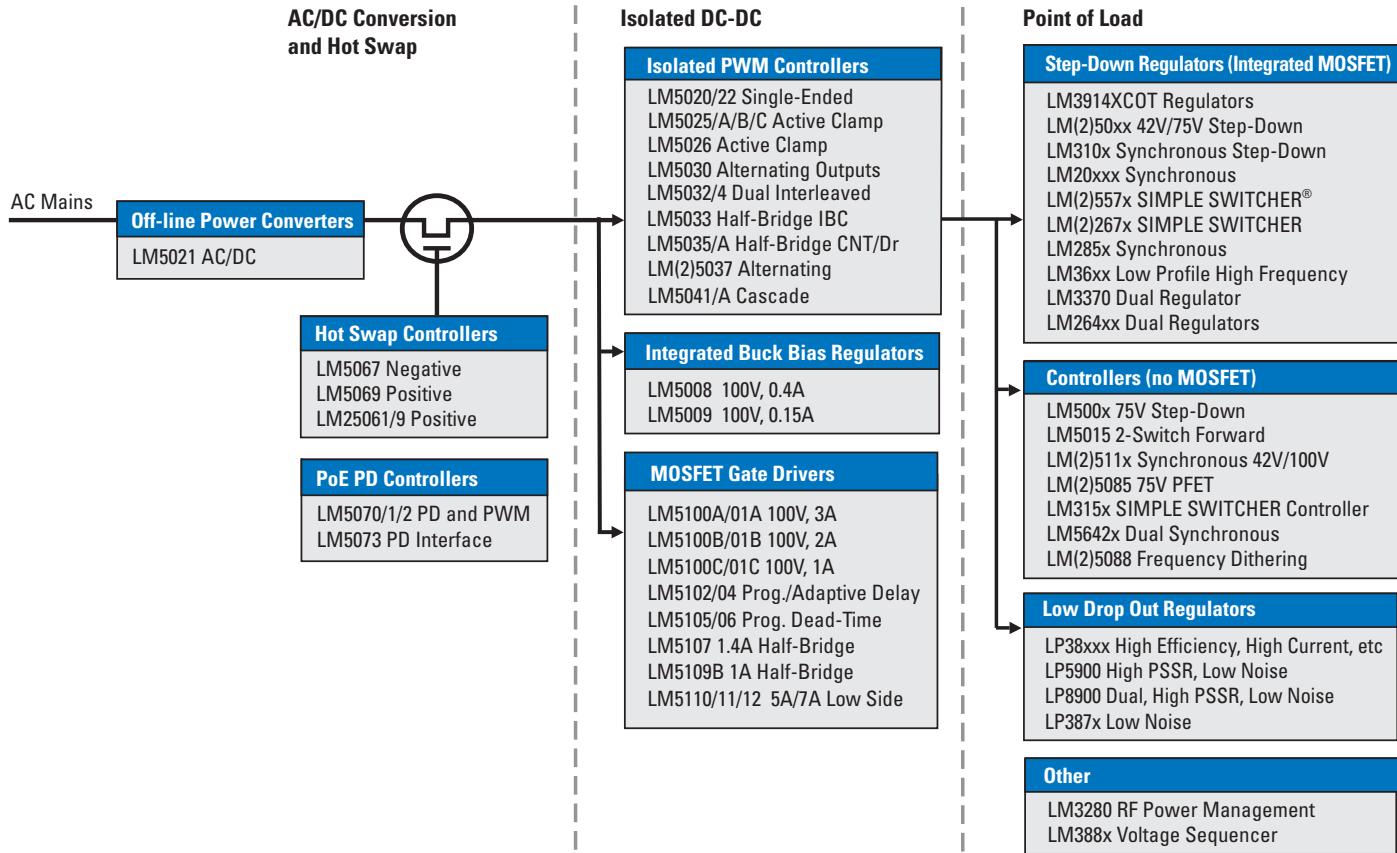

- Dual Integrated 75V N-Channel MOSFETs
- Ultra-wide input voltage range: 4.25V to 75V
- Integrated high voltage bias regulator
- Adjustable output voltage
- 1.5% feedback reference accuracy
- Current mode control with selectable compensation
- Wide bandwidth error amplifier
- Integrated current sensing and limiting
- 50% maximum duty cycle limit
- Single resistor oscillator programming
- Oscillator synchronization capability
- Programmable soft-start
- Enable/Under-voltage Lockout (UVLO) pin
- Thermal shutdown
- Available in eTSSOP-14 packaging

Applications:

Ideal for use in basestation power distribution systems, 48V telecom/data storage systems, and 24V/48V industrial systems
Ethernet-powered devices

LM5000 Series High-Voltage Power IC Family

Product ID	Description
Integrated Switching Regulators	
LM5000	Wide 3.1V to 40V input, 2A switch PWM boost or flyback
LM5001	Wide 3.1V to 75V input, 1A switch PWM for Boost, Flyback, SEPIC
LM5002	Wide 3.1V to 75V input, 0.5A switch PWM for Boost, Flyback, SEPIC
LM5005/LM25005	9V to 75V/42V input 2.5A buck regulator
LM5007/LM25007	9V to 75V/42V input, 500 mA step-down with fast transient response
LM5008	9V to 100V input, 350 mA step-down with fast transient response
LM5009	9V to 100V input, 150 mA step-down with fast transient response
LM5010A/LM25010	6V to 75V/42V input, 1A step-down with fast transient response
LM5015	Wide 4.25V to 75V input, two 1A switches and PWM 1A switch PWM for Two-Switch Forward and Flyback
PWM Switching Controllers	
LM5020	Single-ended 100V current-mode PWM controller
LM5021	AC-DC current mode PWM controller
LM5025/A/B	Active-clamp voltage-mode 100V PWM controller with feed-forward and 3A gate driver
LM5026	Active-clamp current-mode 100V PWM controller with 3A gate driver
LM5030	100V push-pull current-mode PWM controller with synchronization
LM5032	High-voltage dual interleaved current mode PWM controller
LM5033	100V push-pull voltage-mode IBC PWM controller with synchronization
LM5034	High-voltage dual interleaved current mode controller with active clamp
LM5037	100V alternating output PWM controller
LM25037	Dual-mode PWM controller with alternating outputs
LM5041/A	100V input cascaded PWM controller
LM(2)5115/A	Secondary side post regulator controller or synchronous buck controller
LM(2)5116	6V to 42V/100V current-mode synchronous buck controller
LM5118	Wide 3V to 75V input, buck-booster controller
LM5035A	High-performance, half-bridge PWM controller-driver for compact, efficient converters
LM5085/LM25085	4.5 to 75V/42V constant on-time PFET buck switching controller
LM5088/LM25088	4.5 to 75/42V non-synchronous buck controller
MOSFET Drivers	
LM5100A/B/C/1/2/4	Dual FET drivers for 100V synchronous buck and bridge topologies
LM5105/07/09	100V half-bridge power MOSFET drivers
LM5110/11/12	Single and dual high-current MOSFET drivers
Load Share Controller	
LM5080	Modular current-sharing controller
Hot Swap Controllers	
LM5067	Negative high-voltage hot swap/inrush current controller with power limiting
LM5069	Positive high-voltage hot swap/inrush current controller with power limiting
Power-over-Ethernet Powered Device Controllers	
LM5070	Integrated Power-over-Ethernet PD interface and PWM controller
LM5071	Integrated Power-over-Ethernet PD interface and PWM controller with auxiliary power support
LM5072	100V Integrated Power-over-Ethernet PD interface and PWM controller with auxiliary power support
LM5073	100V Power-over-Ethernet PD interface with auxiliary support and flexible DC-DC regulator selection

 PowerWise® product

Switching Regulators and Controllers for Isolated Applications

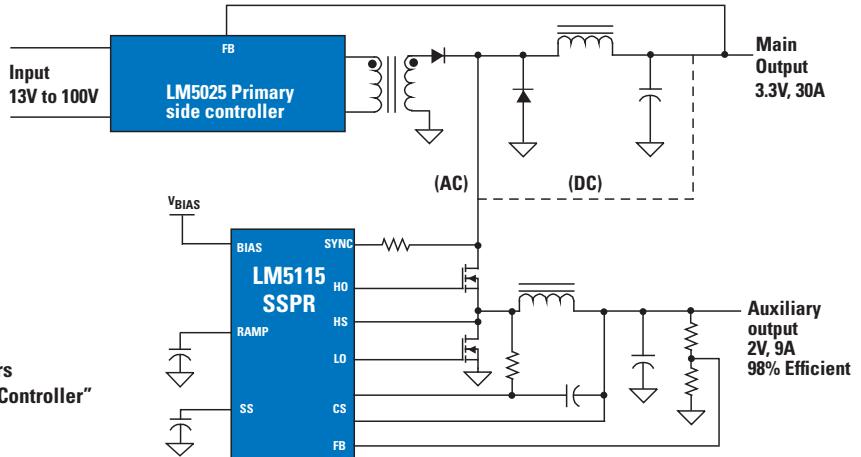

LM5115 – Secondary Side Post Regulator/Synchronous Step-Down (Buck) Controller

Features

- Self-synchronization to main channel output
- Stand alone DC-DC synchronous buck mode
- Voltage-mode control with current injection and input line feed-forward
- Operates from AC or DC input up to 75V
- Available in TSSOP-16 packaging

LM5041/A	100	10	1000	✓	1.5	Cycle-cycle, hiccup	Current	Voltage-fed or current-fed push-pull	LLP-16, TSSOP-16
LM5035/A	105	8	2000	✓	2	Cycle-cycle, hiccup	Voltage	Half-bridge	LLP-24, TSSOP-20EP

Isolated Controllers

LM25037 – Dual-Mode PWM Controller with Alternating Outputs

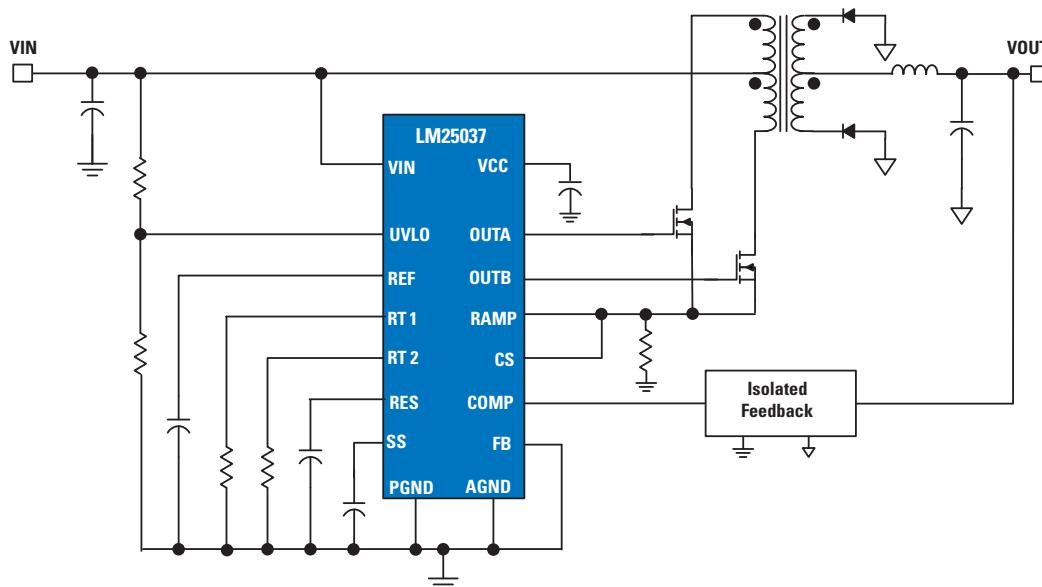

Features

- Ultra-wide input operating range from 5.5V to 75V
- Alternating outputs for double-ended topologies
- Current-mode or feed-forward voltage-mode control
- Programmable maximum duty cycle limit
- Versatile dual mode over-current protection with hiccup delay timer
- Programmable soft-start
- Precision 5V reference output
- Current sense leading edge blanking
- Resistor programmed 1 MHz capable oscillator
- Oscillator synchronization capability with low frequency
- Available in TSSOP-16 packaging

Applications:

Ideal for use in telecommunications power converters, industrial power converters, and automotive systems

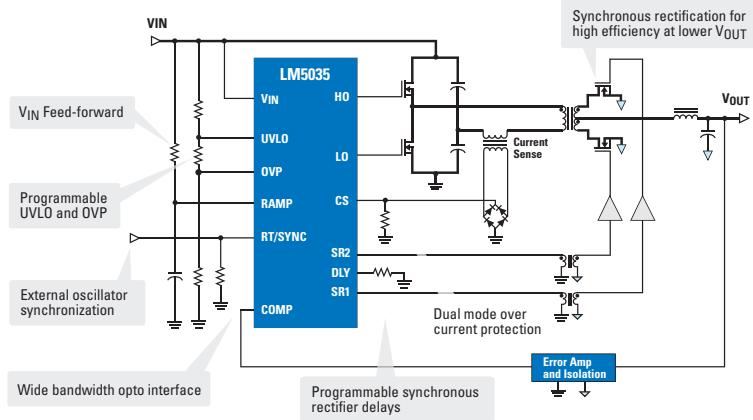

Isolated Controllers

LM5035A – PowerWise® High-Performance, Half-Bridge Controller-Driver for Compact, Efficient Converters

Features

- 105V/2A half-bridge gate drivers
- Synchronous rectifier control outputs with programmable delays
- Oscillator synchronization (patent pending)
- Programmable line under-voltage lockout
- Line over-voltage protection
- Versatile dual mode over-current protection with hiccup delay timer
- Direct opto-coupler interface
- Available in TSSOP-20 and LLP-24 packaging

Applications:

Ideal for use in telecommunications and data communications systems, industrial power supplies, distributed power systems, and consumer electronics

Watch our Online Seminar on

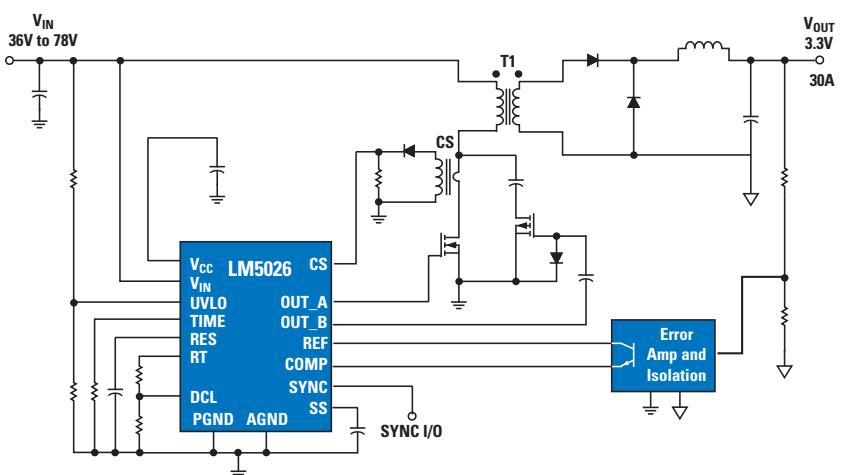

"Half-Bridge Power Converter Design Using the LM5035A"

LM5026 – PowerWise® Simplified Forward Power Converter with Active Clamp Reset

Features

- Current mode control
- Internal 100V startup bias regulator
- 3A compound main gate driver
- High bandwidth opto-coupler interface
- Programmable Line Under-Voltage Lockout (UVLO) with adjustable hysteresis
- Available in TSSOP-16 and LLP-16 packaging

Applications:

Ideal for use in telecommunications, automotive, networking equipment, and industrial applications

Note: This table sorted by peak sink current

Applications:

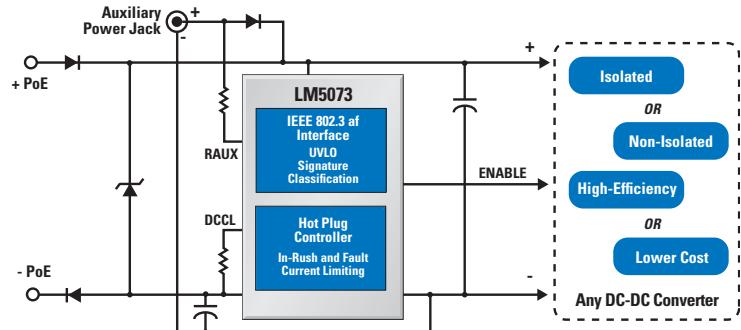

Ideal for use in telecommunications, networking equipment, automotive, motor driver systems, and industrial applications

Power-over-Ethernet Controllers

LM5073 - 100V Power-over-Ethernet PD Interface with Auxiliary Support

Features

- Fully compliant IEEE 802.3af PD interface
- Versatile auxiliary power options, including flexible interface to AC adaptor
 - 13V minimum front auxiliary power range
 - 9V minimum rear auxiliary power range
- Programmable DC current limit up to 800 mA
- Complementary open drain outputs allow flexible DC-DC regulator selection

Optimizing for:	Pair LM5073 with:
High efficiency	LM5025/26 active clamp PWM controller (PowerWise®)
Low cost	LM5020 flyback controller (PowerWise)
Non-isolated and/or ease of design – regulator with integrated MOSFET	LM557x SIMPLE SWITCHER® regulator (PowerWise)
Isolated	LM5015 2-switch forward flyback regulator

Watch our Online Seminar on
“Power Supply Design for POE-Powered Devices”
www.national.com/onlineseminars

Applications:

VoIP telephony, security cameras, wireless access points, IEEE 802.3af-compliant PoE powered devices, non-compliant, application specific devices, higher-power Ethernet powered devices

Hot Swap/In-Rush Current Controllers

LM506x – Hot Swap/In-Rush Current Limit Controllers with Current AND Power Limiting

Features

- In-rush current limit for safe module insertion and removal from live power sources
- Adjustable power limit sets maximum power dissipation in the external pass device and ensures MOSFET stays in safe operating area (SOA)
- Programmable input under voltage lockout (UVLO) and hysteresis
- Programmable input over voltage lockout (OVLO) and hysteresis
- Programmable multifunction timer for fast response to fault current conditions
- Internal high-side charge pump and gate driver for external N-channel MOSFET (LM5067)
- Available in latched fault and automatic restart versions

Applications:

Ideal for use in server backplane systems, basestation power distribution systems, 24/48V industrial systems, in-rush current limiting, solid-state circuit breakers, solid-state relays, transient voltage protection, and POWER GOOD detectors

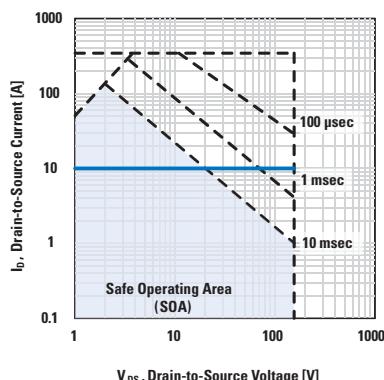

Power Limiting Protects External Pass Device for Improved System Reliability

To ensure system reliability, any MOSFET must operate within its Safe Operating Area (SOA) in order to avoid FET failure.

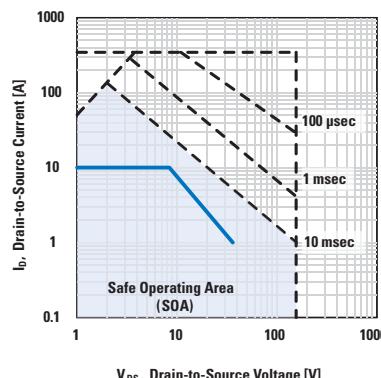

National's LM506x hot swap controllers provide both current and

power limiting to dynamically adjust the current limit at large V_{DS} and ensure the MOSFET stays in the SOA at all conditions – maximizing long-term system reliability and robustness.

Conventional Hot Swap: Current Limit Only
MOSFET Out of SOA at Large V_{DS}

LM506x: Current Limit AND Power Limit
Optimal Circuit and MOSFET Protection for All V_{DS}

Hot Swap/In-Rush Current Controllers

Product ID	V_{IN} Range (V)	POWER GOOD	Adjustable UVLO	Adjustable OVLO	Active In-Rush Current Limit	Active Current Limiting	Active Power Limiting	Fault Latch-Off/Auto Retry	Packaging

Low Dropout (LDO) Linear Regulators

LP38xxx Family of High-Performance CMOS LDOs Power Digital ICs

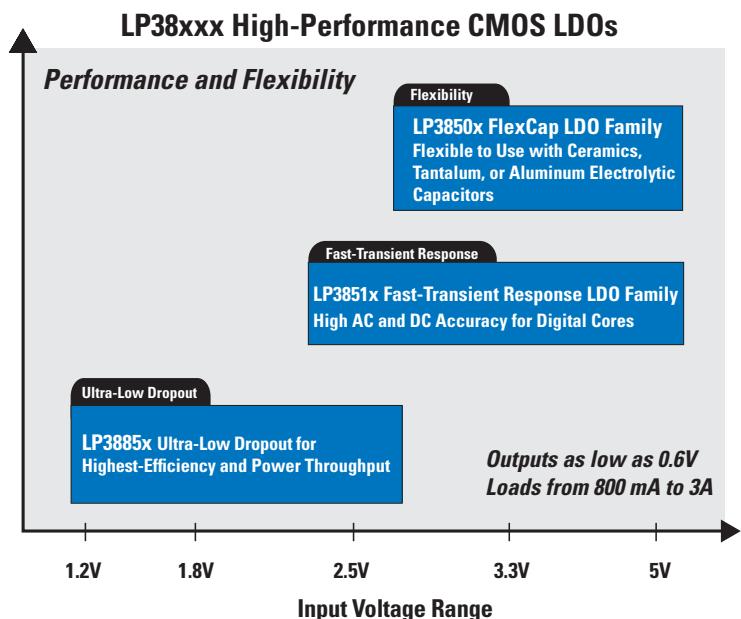

Performance and Flexibility

The LP38xxx Family Offers Performance:

- Ultra-low dropout as low as 115 mV
- Fast-transient response with high AC and DC accuracy for powering digital cores
- High efficiency of 80% for 1.5V to 1.2V conversions

The LP38xxx Family Offers Flexibility:

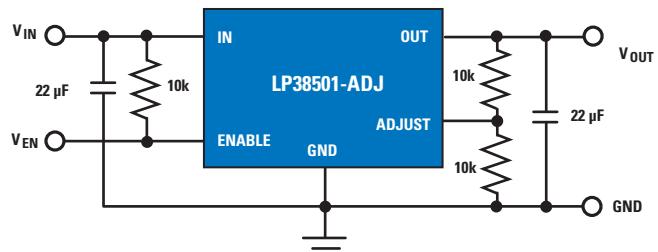

- Flexible to use with ceramics, tantalum, aluminum electrolytic capacitors
- Supports input voltages from 1.2V, 1.5V, 1.8V, 2.5V, 3.3V, and 5V rails
- Load currents from 800 mA to 3A with the same pin-out

LP3850x – FlexCap LDOs Provide Flexibility and Simplicity

The LP3850x FlexCap family of LDOs features unique compensation that allows the use of any type of capacitor with no limits on minimum or maximum ESR.

- Optimized for conversions from 3.3V or 5V rails
- Outputs as low as 0.6V
- Load currents of 1.5A or 3A
- Typical dropout voltage, 450 mV at 3A
- Ultra-low, 25 nA, shutdown current
- Stable with ceramic, tantalum, or aluminum electrolytic capacitors
- Available in TO263-5 or LLP-8 packaging

Product ID	Load Current (A)	V_{IN} Min (V)	V_{IN} Max (V)	V_{OUT} (V)	Typical Dropout (mV)	Enable	Packaging
LP38500	1.5	2.7	5.5	Adj down to 0.6	220	—	TO263-5, LLP-8

LP3851x – Fast Transient-Response LDOs and Ultra-Low Dropout

The LP3851x fast transient-response family of LDOs offers the highest performance in meeting AC and DC accuracy requirements for digital cores.

- Ideal for conversions from 2.5V, 3.3V, or 5V rails
- Fixed 1.8V output
- Output currents of 800 mA, 1.5A, or 3A
- Typical dropout voltage: 275 mV at 3A
- Proprietary control loop enables extremely fast transient response
- High accuracy of 2.5% over line, load, and temperature (-40°C to 125°C)
- Stable with 10 µF ceramic capacitors
- Error flag feature
- Available in TO220-5 or TO263-5 packaging

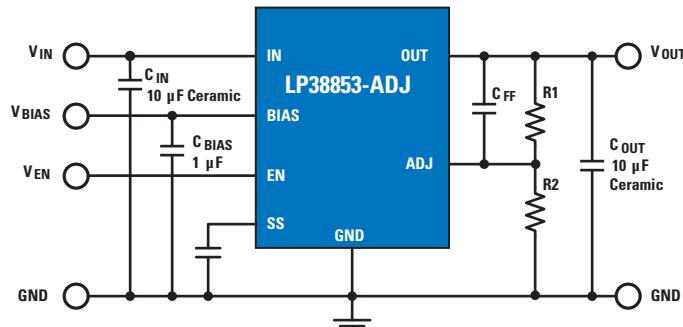

Product ID	Load Current (A)	V _{IN} Min (V)	V _{IN} Max (V)	V _{OUT} (V)	Error Flag	Enable	Packaging

LP3885x – Low Input Voltage and High Efficiency LDOs

The LP3885x LDOs provide ultra low-dropout for high efficiency and power throughput.

- Designed for conversions from 1.8V rails and below
- Adjustable output voltage down to 0.8V
- Load currents of 800 mA, 1.5A, or 3A
- Typical dropout, 115 mV at 800 mA
- Efficiency of up to 80% for 1.5V to 1.2V conversion
- 2% accuracy over line, load, and temperature (0°C to 125°C)
- Enable pin option
- Soft-start pin option
- Available in TO220-7, TO263-7, or PSOP-8 packaging

Low-Noise LDOs to Power RF and Analog Circuits

LP3878 – Low-Noise LDOs Power Noise-Sensitive Analog Loads

Features

- 1.0V to 5.5V output
- Designed for use with low ESR ceramic capacitors
- <10 μ A quiescent current in shutdown
- Low ground pin current at all loads
- Over-temperature/over-current protection
- -40°C to +125°C operating junction temperature range

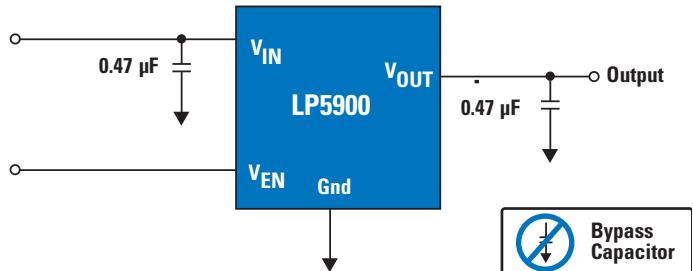

Typical Application Circuit

LP5900 – Low-Noise 150 mA CMOS LDO

Features

- Industry's lowest noise (6.5 μ V_{RMS}) combined with 85 dB of Power Supply Ripple Rejection (PSRR) guarantees signal integrity
- 25 μ A I_q minimizes current drain when system operates in low-power mode
- Elimination of bypass capacitor reduces BOM to only two ceramic 0.47 μ F capacitors
- Available in a micro SMD-4 and LLP packaging

PowerWise product

Multi-Output Switching Regulators

LM3370 – PowerWise® Dual Buck Regulator Provides Highest Efficiency for FPGAs and Multimedia Processors

Features

- Automatic PFM-PWM mode switching provides high efficiency at all loads
- I²C DVS interface scales power to match processor clock frequency
- Lowest I_q (<20 µA) extends battery life
- 2 MHz operation enables smaller external components and minimizes footprint
- Power-on-reset prevents fault condition in processors
- Spread spectrum reduces noise (ideal for RF systems)
- Available in LLP-16 micro SMD packaging

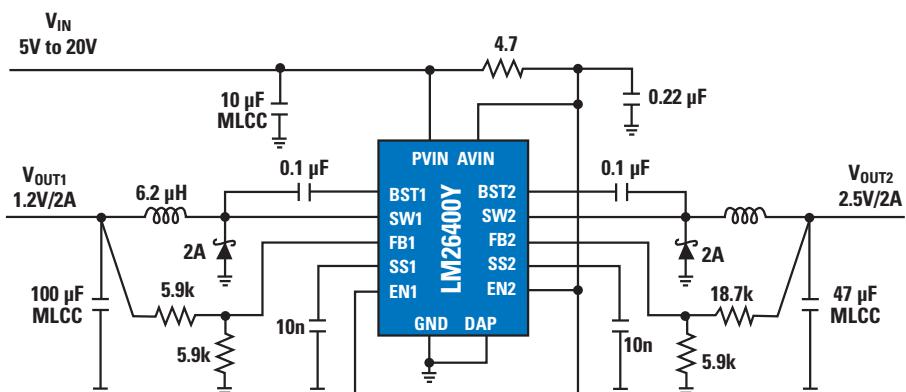

Applications:

Ideal for use in low-power FPGAs, CPLDs, and application processors

LM26400Y – Dual 2A Wide Input Range Buck Regulator

Features

- Input voltage range of 3V to 20V
- Dual 2A output
- Output voltage down to 0.6V
- Internal compensation
- 500 kHz PWM frequency
- Separate enable and soft-start pins
- Frequency foldback protection
- Available in eTSSOP-16 and LLP-16 packaging

Applications:

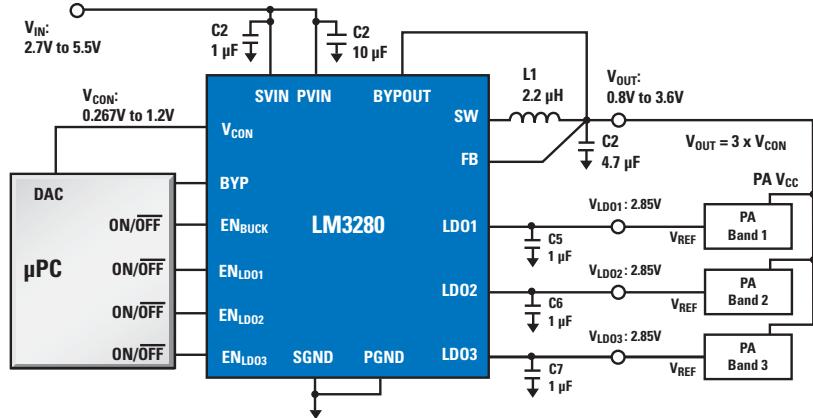

Ideal for use in powering point-of-loads in broadband modems/routers, POS terminals/scanners, security/surveillance systems, set-top boxes, DTV-LCD displays, computing peripherals, and industrial controls

Multi-Output Switching Regulators

LM3280 – Adjustable Buck DC-DC Converter and 3 LDOs for RF Power Management

Features

- 2 MHz PWM switching frequency
- Operates from a single Li-Ion cell (2.7V to 5.5V)
- Adjustable output voltage (0.8V to 3.6V) DC-DC
- High-efficiency synchronous buck converter
- 300 mA maximum load capability (PWM mode)
- 500 mA maximum load capability (bypass mode)
- PWM, forced and automatic bypass mode
- 3 low-dropout and fast transient response LDOs
- Current overload protection
- Thermal overload protection
- Available in micro SMD-16 packaging

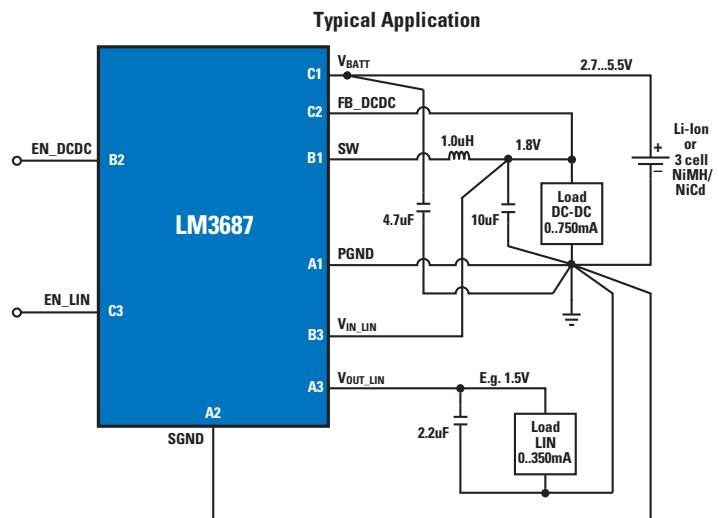

Applications:

Ideal for use in handset multi-band PA chipset power, handheld radio, and other battery operated RF devices

LM3687 – PowerWise® DC-DC Converter with Integrated Linear Regulator in Tiny Package

Features

- Combined load current of 750 mA
- Dual output voltage rails (DC-DC converter: 1.8V, linear regulator: 1.5V)
- Automatic PFM/PWM mode switching maximizes battery life
- Design flexibility for independent or combined operation
- Fast 1.8 MHz switching frequency decreases solution size
- Low quiescent current prevents excessive current loss in standby mode
- Startup mode option when input voltage for linear regulator is not sufficiently high
- Available in tiny micro SMD-9 packaging for optimizing solution size

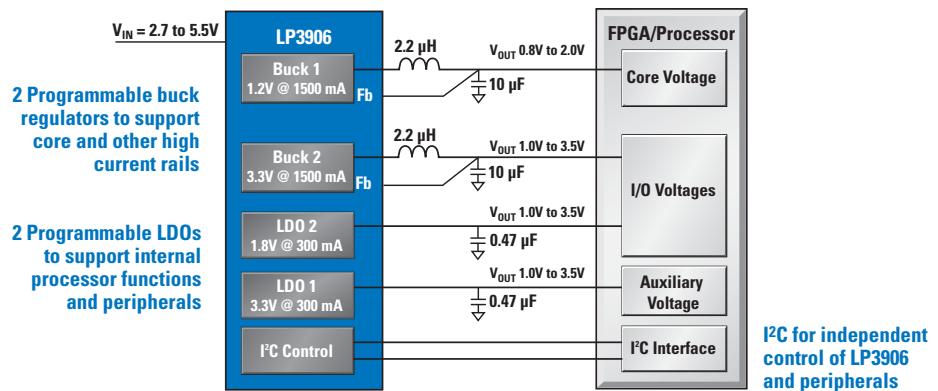

Applications:

Ideal for use in mobile phones, handheld radios, PDAs, Palm-top PCs, portable instruments, and battery-powered devices

LP3906 – PowerWise® Dual High-Current Buck Regulator and Dual Linear Regulator with I²C-Compatible Interface

Features

- Compatible with advanced applications processors and FPGAs
- Low input, low output voltage LDOs
- Additional external enables for each regulator output and a separate enable for the built-in sequence
- I²C-compatible interface for independent control of device functions and settings
- Thermal overload protection
- Current overload protection
- Spread spectrum reduces noise
- Available in LLP-24 packaging

Applications:

Ideal for use in powering application processors, DSPs and FPGAs: Altera Cyclone Series, and Xilinx Spartan series

LP3907 – PowerWise® Dual High-Current Buck Regulator and Dual Linear Regulator with I²C-Compatible Interface

Features

Buck DC-DC Converter

- 1A/600 mA output current
- Programmable V_{OUT} from:
 - Buck1 : 0.8V to 2.0V at 1A
 - Buck2 : 1.0V to 3.5V at 600 mA

Linear Regulators (LDO)

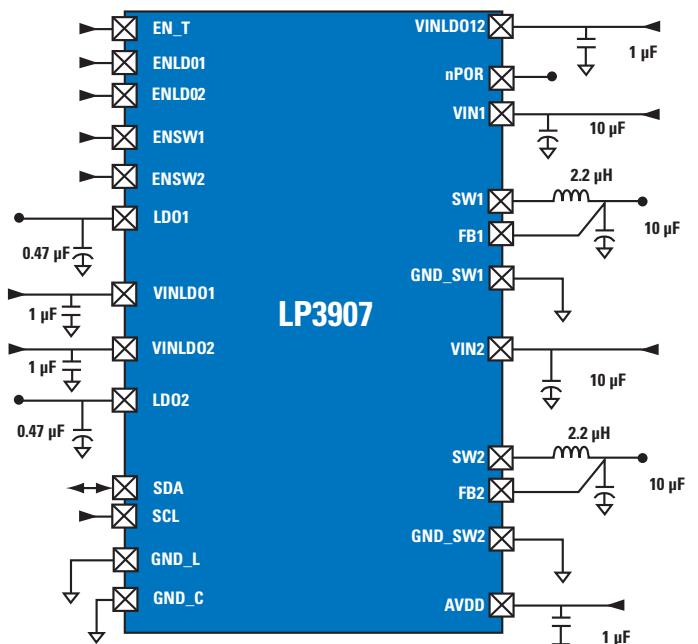

- Programmable V_{OUT} of 1.0V to 3.5V
- 300 mA output current
- Low input, low output

Features

- External power-on-reset function for Buck1 and Buck2
- Compatible with advanced applications processors and FPGAs
- I²C-compatible interface for independent control of device functions and settings
- Available in LLP-24 and µSMD packaging

Applications:

Ideal for use in WiFi chipset power, mobile-TV chipset power, WiMax chipset power, handset sub-system power, and FPGA power

Multi-Output Switching Regulators

LM26480 – Dual High-Current Buck Regulator and Dual Linear Regulator with Externally Controlled Voltage Outputs

Features

- 1.5A output current
- V_{OUT} from:
 - Buck1 : 0.8V to 2.0V at 1.5A
 - Buck2 : 1.0V to 3.3V at 1.5A
- Up to 96% efficiency
- $\pm 3\%$ FB voltage accuracy
- 2 MHz PWM switching frequency
- PWM - PFM automatic mode change under low loads
- Automatic soft-start

Linear Regulators (LDO)

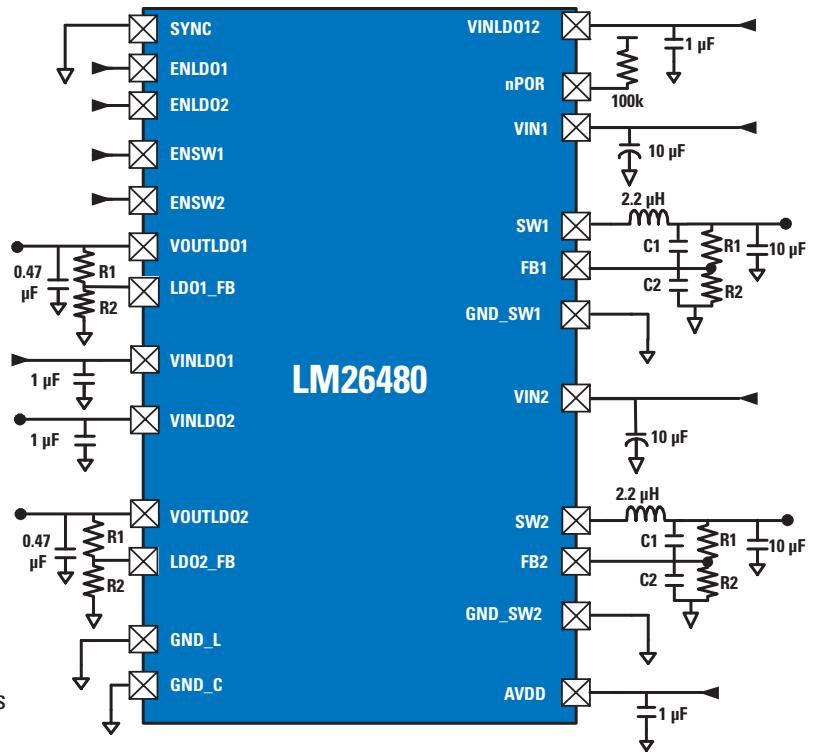

- V_{OUT} of 1.0V to 3.5V
- $\pm 3\%$ FB voltage accuracy
- 300 mA output current
- 25 mV (typ) dropout

Features

- Compatible with advanced applications processors and FPGAs
- 2 LDOs for powering internal processor functions and I/Os
- Precision internal reference
- Thermal overload protection
- Current overload protection
- External Power-On-Reset function for Buck1 and Buck 2
- Undervoltage lock-out detector to monitor input supply voltage
- Available in LLP-24 packaging (4 x 4 x 0.8 mm)

Applications

Ideal for use in core digital power, applications processors, and peripheral I/O power

LP3910/13 – PowerWise® Power Management ICs for Portable Media Players

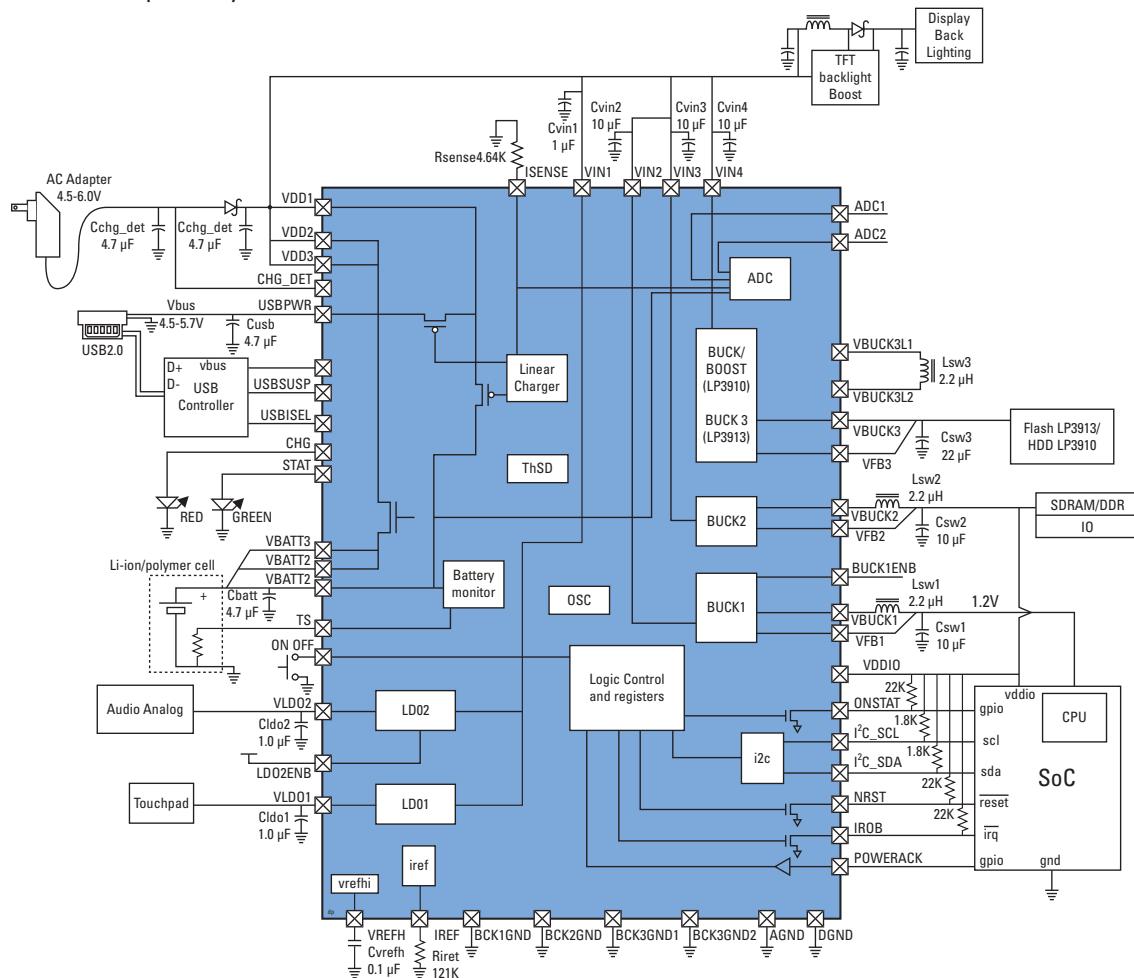

Features

- Wide load range buck-boost DC-DC converter (LP3910) targeting hard disk drive power management to maintain a constant 3.3V output with a varying battery input voltage
- Linear constant-current/constant-voltage charger for single cell Li-Ion batteries
- Green and red LED charger status Indicators
- 4-channel 8-bit dual slope A/D converter
- High-efficiency DVS buck converters: 2 (LP3910) and 3 (LP3913)
- 400 kHz I²C-compatible interface
- USB and adapter charging
- System power supply management including power routing
- Voltage and thermal supervisory circuits

- Continuous battery voltage monitoring
- Interrupt request output with 8 sources
- LP3913 is pin-for-pin compatible with the LP3910 hard drive based PMIC
- Available in 6 x 6 x 0.8 mm LLP-48 packaging

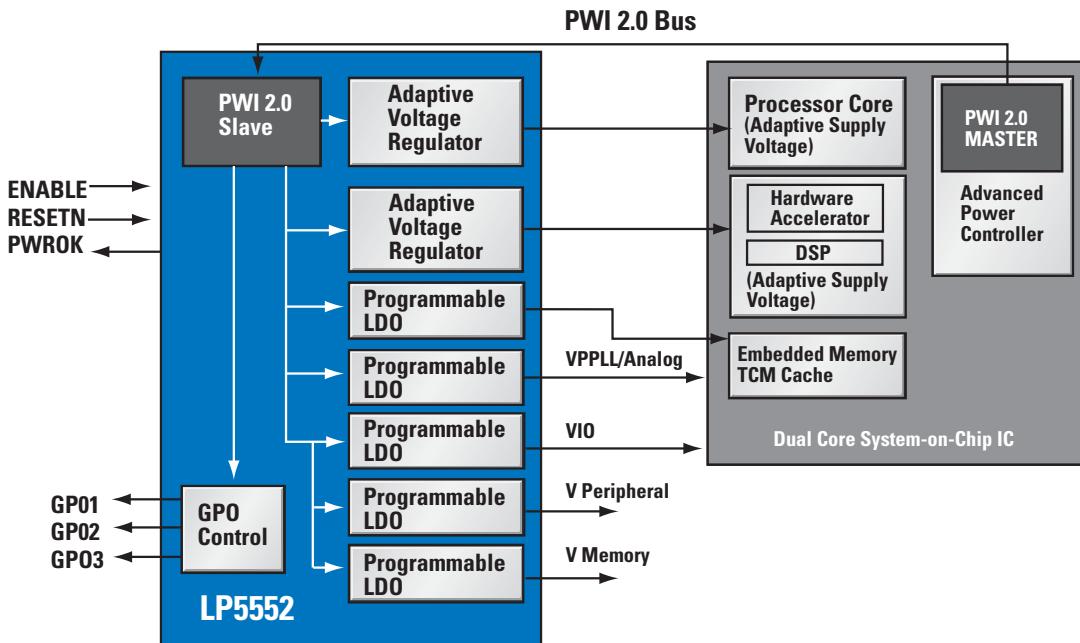

Applications

Ideal for use in powering portable gaming devices, portable media players, hard drive-based MP3 players (LP3910), flash-based portable media players (LP3913), portable navigation systems (LP3913)

PowerWise® AVS Energy Management Units

LP5552 – Energy Management Unit Extends Battery Life and Enables New Features

Applications:

Ideal for use in dual core processors, cellular handsets, handheld radios, PDAs, battery-powered devices, and portable instruments

Product ID	Number of Outputs	Output Voltages and Current	V _{IN} Range (V)	Interface	Packaging
LP5550	4	1 Buck: 0.6V to 1.2V, 300 mA 3 LDOs: 0.6V to 3.3V, up to 250 mA	3 to 5.5	PWI 1.0	LLP-16
LP5551	8	2 Bucks: 0.6V to 1.2V, 300 mA 4 LDOs: 0.6V to 3.3V, up to 250 mA N-well bias: -0.3 to +1V (to supply) P-well bias: -1V to +0.3V (to GND)	2.7 to 5.5	PWI 1.0	LLP-36
LP5552	7	2 Bucks: 0.6V to 1.235V, 800 mA 5 LDOs: 0.6V to 3.3V, up to 250 mA	2.7 to 4.8	PWI 2.0	micro SMD-36

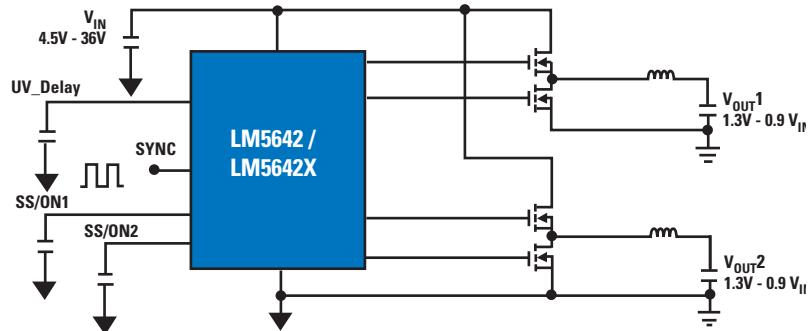

PowerWise product

Multi-Output Switching Controllers

LM5642x – PowerWise® High-Voltage, Dual Synchronous Buck Converter with Oscillator Synchronization

Features

- Two synchronous buck regulators
- 180° out-of-phase operation
- 200 kHz fixed nominal frequency: LM5642
- 375 kHz fixed nominal frequency: LM5642x
- Synchronizable switching frequency from 150 kHz to 250 kHz for the LM5642, and 200 kHz to 500 kHz for the LM5642x
- Available in TSSOP-28 packaging

Applications:

Ideal for use in embedded computer, navigation systems, telecommunications, set-top boxes, and Point-of-Load (POL) architecture

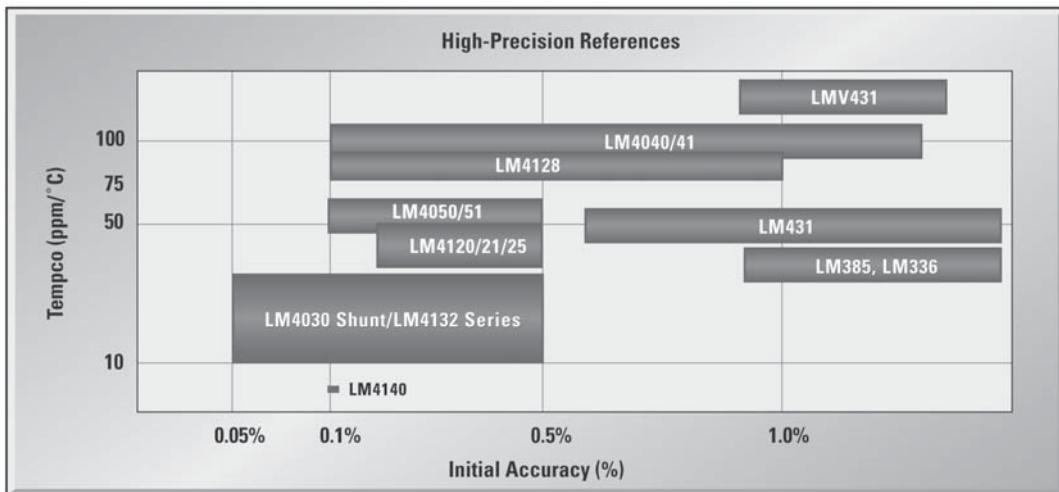

Multi-Output Switching Controllers

Product ID	Input Max Voltage (V)	Input Min Voltage (V)	Output Min (V)	Output Max (V)	Feedback Tolerance %	Frequency Range & Sync (Hz)	On/Off Pin	Error Flag	Channels	Topology, PWM mode	Packaging
LM2647	28	5.5	0.6	5	1.5	200 to 500	—	—	2	Voltage with V _{IN} Feedforward	LLP-28, TSSOP-28
LM2642	30	4.5	1.3	13.5	2	300	✓	✓	2	Buck	TSSOP-28
LM5642	36	4.5	1.3	34.5	1.5	150 to 250, Sync	—	—	2	Current	TSSOP-28
LM5642X	36	4.5	1.3	34.5	1.5	200 to 500, Sync	—	—	2	Current	TSSOP28-EP, TSSOP-28

Power Sequencers and Supervisors

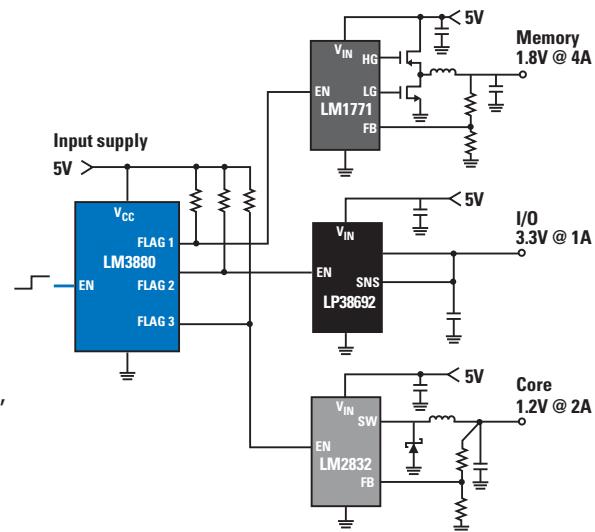

LM3880 – Industry's Easiest and Smallest Solution for Multiple-Rail Power Sequencing

Features

- Easiest method to sequence rails
- Input voltage range of 2.7V to 5.5V
- Standard timing options: 10 ms, 30 ms, 60 ms, 120 ms
- 1-2-3 powerup and reverse-power down 3-2-1 control
- Customization of timing and sequence available through factory programming
- Available in tiny SOT23-6 packaging

Applications:

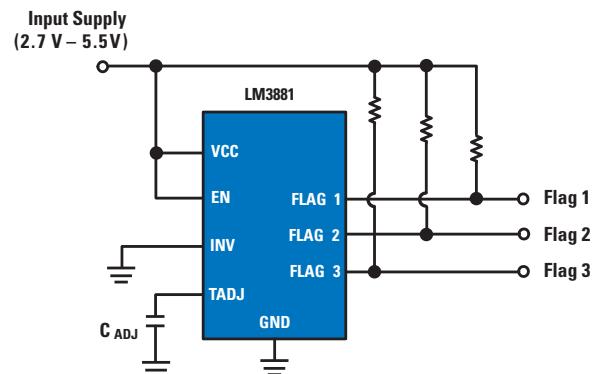

Ideal for use in sequencing power rails of digital logic devices (ASICs, FPGAs, DSPs, microcontrollers) to avoid latch-up conditions, and systems with multiple rails

LM3881 – Adjustable Power Sequencer

Features

- Input voltage: 2.7V to 5.5V
- 20 μ A quiescent current
- 3 output flags
- Master sequence enable pin
- Powerup and powerdown control
- Digital logic invert pin
- Adjustable timing pin
- Available in MSOP-8 packaging

Supervisors

Product ID	Active Reset	Voltage Rails Supervised ¹	Reset Timeout Period (ms)	I _q (μ A)	Manual Reset	Low Line Output	PFI Comparator	Watchdog	Temp Range (°C)	Packaging
LM3722	Low	2.5, 3.3, 5.0	190	6	✓	—	—	—	-40 to 125	SOT23-5

LM3713	High	3.3	1.4, 28, 200, 1600	28	✓	—	✓	✓	-40 to 85	micro SMD-9

¹Most parts can monitor additional voltage rails in the 0.5V to 2.0V or the 2.2V to 5.0V range. For these custom threshold voltages, contact your National sales representative.

WEBENCH® LED Designer

WEBENCH® LED Tool for the Optimal LED and a Complete Power Supply Design in Minutes

1. Choose an LED at national.com/led

Enter your requirements and receive a list of LEDs from the leading manufacturers

2. Design Your Power Supply

Select a PowerWise® LED driver from the optimized short list provided

3. Complete Your Design

Optimize between efficiency and size

4. Verify Your Design

Use the electrical simulator to verify circuit stability and operation

5. Order a Customized Prototype Kit

Guaranteed to ship in just one business day

The screenshot displays two main windows of the WEBENCH LED Designer tool.

Top Window: LED Reference Guide Selector

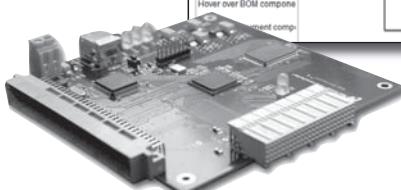

- Step 1: Choose your LED(s)**
 - Manufacturer dropdown: Avago, Cree, Nichia, OSRAM, Philips Lumileds.
 - Color dropdown: All, red, green, amber, red-orange, orange, white, yellow, royal blue, blue, cyan.
 - Desired LED Operating Current: $I_L = 0.35$ Amps.
 - Or Define Your Custom LED: $V_L = 3.0$ V, $R_L = 1$ Ohms.
- Step 2: Configuration and Options**
 - V_{in} Min: 22 V, V_{in} Max: 28 V.
 - Number of LEDs: -Series 5, -Parallel 2.
 - Total LED Load: V_{LED} 15 V, I_{out} 0.7 Amps.
- Bottom Panel:** Show Recommended Power LED ICs, Back to power supply design page, LED Reference Designs Library, Browse LED reference design library.

Bottom Window: Electrical Simulator

- Step 1: Select Simulation Type**: PWM Dimming.
- Step 2: Start New Simul.**
- Circuit Diagram:** Shows a power supply circuit with components like LM3402, diodes, capacitors, and inductors.
- Analysis Results:** Efficiency: 93 %, Footprint: 169.9 mm².
- Components Table:**

Part	Manufacturer	Part#	Attributes	Top View
C _b	Vishay-Vitramon	V11209Y103KBBAT4X0.01	0.01 uF	[Select Alternate Part]
C _{byp}	TDK	C3216X7R2A104C	0.1 uF	[Select Alternate Part]
C _{in}	Murata	GRM31MR12E105K	1 uF	[Select Alternate Part]

Applications for High-Brightness LED Drivers

National Offers a Diverse Portfolio of Constant-Current Regulators for Driving LEDs

Features

- PowerWise® energy-efficient solutions
 - Providing the best power-to-performance ratios
 - Enabling reliable and robust solutions
- Cutting-edge features including dimming, thermal management, fault protection, and more
- Low external component count and small solution sizes
- Easy-to-use tools and resources:
 - WEBENCH® LED Designer online design tool
 - Reference designs
 - Application notes

LED Drivers

Inductive-Boost Backlight LED Drivers

Product ID	Input Voltage Range (V)	Maximum Output Voltage (V)	Max LED Current (mA)	Number of LEDs	Switching Frequency (MHz)	Dimming Control Type	Key Features	Packaging
LM3519	2.7 to 5.5	18	20	4	2 to 8	PWM	Variable switching frequency	SOT23-6
LM3500	2.7 to 7	16, 21	30	5	1	PWM	Low feedback voltage; no external Schottky diode	micro SMD-8
LM3501	2.7 to 7	16, 21	30	5	1	Analog	No external Schottky diode	micro SMD-8
LM3502	2.5 to 5.5	16, 25, 35, 44	30	10	1	PWM	2 LED banks for dual-display backlighting	micro SMD-10, LLP-16
LM3503	2.5 to 5.5	16, 25, 35, 44	30	10	1	Analog	2 LED banks for dual-display backlighting	micro SMD-10, LLP-16
LM3508	2.7 to 5.5	17.5	30	4	0.85	PWM	Adjustable PWM signal up to 100 kHz; no external Schottky diode	micro SMD-9
LM3557	2.7 to 7.5	26	30	5	1.25	PWM	Input under-voltage protection; cycle-by-cycle current limit	LLP-8
LM3509	2.7 to 5.5	21.2	30 per string	10	1.27	I ² C	Dual-current sinks; 32 exponential dimming steps; 800:1 dimming ratio	LLP-10
LM3528	2.7 to 5.5	20	30 per string	10	1.27	I ² C	Dual-current sinks, 128 logarithmic dimming steps; 800:1 dimming ratio	micro SMD-12
LM3430/32	6 to 40	80+	40 per string	100+	Adjustable up to 2 MHz	Analog, PWM	Dynamic headroom control for balanced current through up to 6 strings of LEDs	LLP-12, eTSSOP-28, LLP-24
LP8541	6 to 22	40	60	—	1.25	PWM	PWM phase shift control, two-wire, SMBus/I ² C-compatible control interface	LLP-24
LM3431	5 to 36	40+	150 per string	30	Adjustable up to 1 MHz	Analog, PWM	Balances current through 3 strings of LEDs	TSSOP-28, LLP-28
LM4510	2.7 to 5.5	18	280	—	1	—	Power Supply for OLED display; no external Schottky diode	LLP-10
LM2731/33	2.7 to 14	Adj up to 20/40	1A/1.5A	9	600 kHz	PWM	Internal compensation, cycle-by-cycle current limit	SOT23-5

Switched-Capacitor Boost Backlight LED Drivers

Product ID	Input Voltage Range (V)	Output Voltage (V)	Max LED Current (mA)	Number of LEDs	Switching Frequency (MHz)	Dimming Type	Key Features	Packaging
LM2755	3 to 5.5	5	90	3	1.25	I ² C	Independently controlled RGB outputs; programmable trapezoidal waveforms	micro SMD-18
LM2750	2.9 to 5.6	5, Adj (3.8 to 5.2)	120	10	1.7	PWM	Pre-regulation minimizes input ripple	LLP-10
LM27951/52	3 to 5.5	5	120	4	0.75	PWM	Regulated current sources with 0.2% matching	LLP-14
LM2751	2.8 to 5.5	4.5, 5	150	10	0.01 to 0.725	PWM	Programmable switching frequencies	LLP-10
LM2756	2.7 to 5.5	4.6	180	8	1.3	I ² C	3 independent LED banks with 2 variable drivers; 32 exponential dimming steps; 800:1 dimming ratio	micro SMD-20
LM27964	2.7 to 5.5	5	180	7 (3 banks)	0.7	I ² C	3 independent LED banks (Group A = 4 LEDs, Group B = 2 LEDs, Group C up to 80mA) ; Dedicated Keypad LED Driver	LLP-24
LM27965	2.7 to 5.6	5	180	9 (3 banks)	1.27	I ² C	3 independent LED banks (Group A = 5 LEDs, Group B = 3 LEDs, Group C = 1 LED)	LLP-24
LM27966	2.7 to 5.7	5	180	6 (2 banks)	1.27	I ² C	2 independent LED banks (Group A = 5 LEDs, Group B = 1 LEDs)	LLP-24
LM2757	2.7 to 5.5	4.1, 4.5, 5	180	10	1.25	No Dimming	Pre-regulation minimizes input ripple; true input-output and output-input disconnect; high impedance output in shutdown	micro SMD-12

Flash LED Drivers

Product ID	Input Voltage Range (V)	Output Voltage (V)	Max LED Current (mA)	Number of LEDs	Switching Frequency (MHz)	Topology	Key Features	Packaging
LM2754	2.8 to 5.5	5	800	4	1	Switched capacitor	TX input ensures synchronization with RF power amplifier pulse	LLP-24
LM2758/59	2.7 to 5.5	5	700/1000	1	1.2/1.0	Switched capacitor	Indicator, torch, and flash modes; Flash timeout protection	micro SMD-12/ LLP-12
LM3551/52	2.7 to 5.5	11	1000	4	1.25	Inductive boost	Flash timeout protection; Shutdown mode via SD pin (LM3551) or EN pin (LM3552)	LLP-14
LM3553	2.7 to 5.5	19	1200	2	1.3	Inductive boost	Indicator, torch, flash modes, and voltage mode; 128 current levels	LLP-12

 PowerWise product

High-Brightness LED Drivers

Product ID	Input Voltage Range (V)	Maximum Output Voltage (V)	Max LED Current (mA)	Maximum Number of LEDs in Series	Switching Frequency (MHz)	Topology	Key Features			Packaging
LM3407	4.5 to 30	27	350	7	Adjustable up to 1 MHz	Buck	Fast PWM dimming, low external component count, constant frequency			eMSOP-8
LM3402/02HV	6 to 42 / 6 to 75	40/70	500	9 / 15	Adjustable up to 1 MHz	Buck	Fast PWM dimming, no control loop compensation, supports ceramic capacitor and capacitor-less outputs			MSOP-8, PSOP-8
LM3404/04HV	6 to 42 / 6 to 75	40/70	1000	9/15	Adjustable up to 1 MHz	Buck	Fast PWM dimming, no control loop compensation, supports ceramic capacitor and capacitor-less outputs			SOIC-8, PSOP-8
LM3405/05A	3 to 15 / 3 to 22	14/20	1000	4	1.6	Buck	205 mV feedback voltage, PWM dimming			TSOT-6
LM3410	2.7 to 5.5	24	1000	6	525 kHz / 1.6 MHz	Boost, SEPIC	PWM dimming, small footprint, low external component count			SOT23-5, LLP-6
LM5022	6 to 60	80+	1000+	20+	Adjustable up to 2 MHz	Boost, Flyback	PWM dimming, current-mode control, precision enable			MSOP-10, LLP-10
LM3406/06HV	6 to 42/ 6 to 75	40/70	1500	1-10/20	Adjustable to 1 MHz	Buck	Fast PWM dimming, no control loop compensation, supports ceramic capacitor and capacitor-less outputs			eTSSOP-14
LM3421/23	4.5 to 75	75	>2000	20	Adjustable to 2 MH	Boost, SEPIC	Fast PWM dimming, LED ready, broken open check overvoltage protection, FLT, cycle by cycle current limit			eTSSOP-16/20
LM3401	4.5 to 35	35	3000	9	1.5	Buck	Adjustable hysteresis, 100% duty cycle, PWM dimming			MSOP-8
LM3433	-9 to -14	-6	6000+	1	Adjustable up to 1 MHz	Buck	Drives common anode LEDs, analog and fast PWM dimming			LLP-24

Lighting Management Units

Product ID	Description	V _{IN} Range	Drive Current for All	Current for Flash Mode	Current Matching	Temp Range (°C)	Packaging
LP5522	Autonomous single LED controller with one wire interface	2.7 to 5.5	20 mA	—	—	-30 to +85	micro SMD-6
LP3943	LED controller for RGB/white/blue LEDs	2.3 to 5.5	25 mA/LED	—	—	-40 to +125	LLP-24
LP3944	LED controller for RGB/white/blue LEDs	2.3 to 5.5	25 mA/LED	—	—	-40 to +125	LLP-24
LP8501	9-channel LED driver with integrated SRAM memory and 3 light engines.	2.7 to 5.5	25.5 mA	—	1%	-30 to +85	micro SMD-25
LM4970	LED controller with LED lighting effects synchronized to audio	2.7 to 5.5	42 mA	—	—	-40 to +85	LLP-14
LP3958	Lighting management unit for controlling 4+2 white LEDs for main and sub display and 3 sets of white LEDs for keypad	3 to 5.5	70 mA total	—	3% (Key)	-30 to +85	micro SMD-25
LP5521	Fully programmable 3-channel color LED driver with advanced power save features	2.7 to 5.5	75 mA	—	1%	-30 to +85	micro SMD-20
LP5524	Parallel LED Driver with PWM brightness control	2.7 to 5.5	100 mA	—	1%	-40 to +85	micro SMD-9
LP5526	Lighting management unit with high-voltage boost converter with up to 150 mA serial flash LED driver	3 to 5.5	150 mA total	150 mA	2% (RGB)	-30 to +85	micro SMD-25
LP5520	RGB backlight driver with white balance compensation	2.9 to 5.5	180 mA	—	0.20%	-30 to +85	micro SMD-25
LP3952	6-channel color LED driver with audio synchronization	3 to 5.5	240 mA	—	5%	-30 to +85	micro SMD-36 or micro SMDxt-36
LP3950	Color-LED driver with audio sync	3 to 7.2	300 mA	—	3%	-40 to +125	Laminate TCSP-32
LP39542	Lighting management unit for 4+2 white LEDs, 2 sets RGB LEDs with audio sync and pattern control, and a flash LED driver	3 to 5.5	400 mA	400 mA	0.2% (White LED), 5% (RGB)	-30 to +85	micro SMD-36 or micro SMDxt-36
LP55281	Quad RGB LED driver with boost converter and LED connectivity test	3 to 5.55	400 mA	—	5%	-30 to +85	micro SMD-36 or micro SMDxt-36S
LP5527	Tiny LED driver for camera flash and 4 LEDs with 12C programmability, connectivity test and audio synchronization from PowerWise family	3 to 5.5	1 A total	—	1%	-30 to +85	micro SMD-30

PowerWise product

Inductive-Boost Backlight LED Drivers

LM2731 – 0.6/1.6 MHz Boost Converter with 22V Internal FET Switch

Features

- 22V DMOS FET switch
- 1.6 MHz ("X"), 0.6 MHz ("Y") switching frequency
- Low RDS(ON) DMOS FET
- Switch current up to 1.8A
- Wide input voltage range (2.7V to 14V)
- Low shutdown current (<1 μ A)
- Uses tiny capacitors and inductors
- Cycle-by-cycle current limiting
- Internally compensated
- Available in SOT23-5 packaging

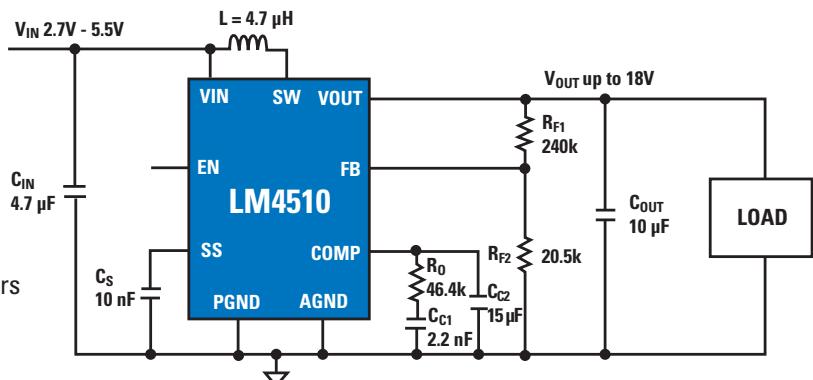

White LED Flash Application

Ideal for use in white LED current source, PDAs and palm-top computers, digital cameras, portable phones and games, local boost regulator

LM4510 – PowerWise® Synchronous Step-Up DC-DC Converter for White LEDs and/or OLED Displays

Features

- 18V at 80 mA from 3.2V input
- 5V at 280 mA from 3.2V input
- No external Schottky diode required
- 85% peak efficiency
- Soft-start
- True shutdown isolation
- Stable with small ceramic or tantalum output capacitors
- Output short-circuit protection
- Feedback fault protection
- Input under-voltage lock out
- Thermal shutdown
- 0.002 μ A shutdown current
- Wide input voltage range: 2.7V to 5.5V
- 1.0 MHz fixed frequency operation
- Available in low-profile LLP-10 packaging (3 x 3 x 0.8mm)

LM4510 Typical Application Circuit

Applications

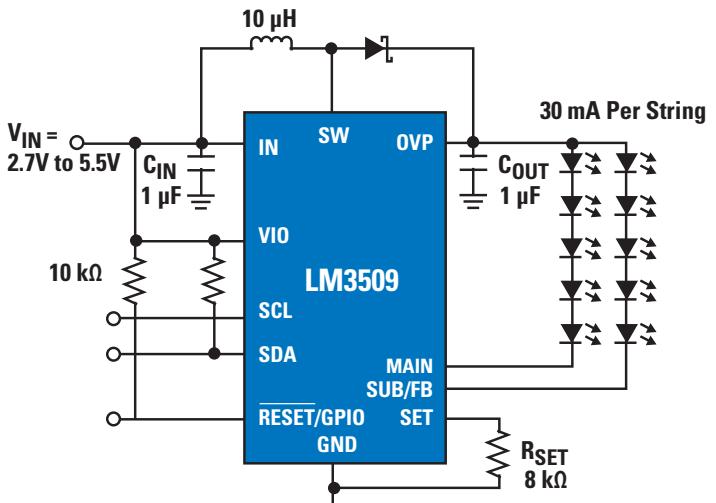

Ideal for use in organic LED panel power supply, charging holster, white LED backlight, USB power supply, class D audio amplifier, camera flash LED driver

LM3509 – PowerWise® High-Efficiency Boost for White LEDs and/or OLED Displays

Features

- Integrated OLED display power supply and LED driver
- Drives up to 10 LEDs at 30 mA
- Drives up to 5 LEDs at 20 mA and delivers up to 21V at 40 mA
- Over 90% efficient
- 32 exponential dimming steps
- 0.15% accurate current matching between strings
- Internal soft-start limits inrush current
- True shutdown isolation for LED's
- Wide 2.7V to 5.5V input voltage range
- 21V over-voltage protection
- 1.27 MHz fixed frequency operation
- General-purpose I/O
- Active low hardware reset
- Available in low-profile LLP-10 packaging (3 x 3 x 0.8 mm)

LM3509 Typical Application Circuit

Dual White LED Bias Supply

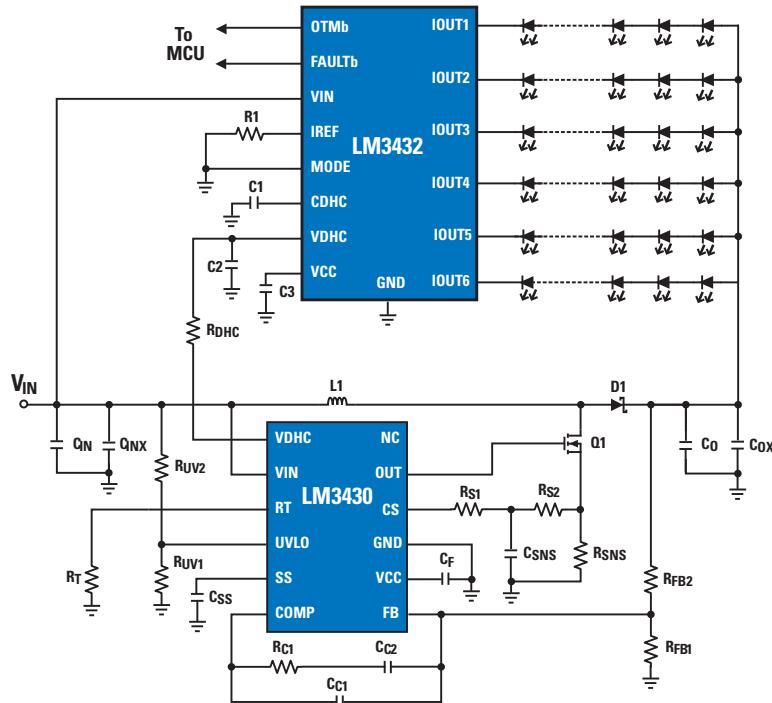

Applications

Ideal for use in dual-display LCD backlighting for portable applications, large format LCD backlighting, OLED panel power supply

Inductive-Boost Backlight LED Drivers

LM3430 and LM3432 – PowerWise® Boost Controller and 6-Channel Current Regulator for LED Backlighting

LM3430/LM3432 Typical Application Circuit

LM3430 Features:

- Internal 40V startup regulator
- 1A peak MOSFET gate driver
- V_{IN} Range 6V to 40V
- Duty cycle limit in excess of 90%
- Programmable UVLO with hysteresis
- Cycle-by-cycle current limit
- External synchronizable (AC-coupled)
- Single resistor oscillator frequency set
- Slope compensation
- Adjustable soft-start
- LLP-12 (3mm x 3mm)

LM3432 Features:

- Dynamic Headroom Control (DHC) output to maximize efficiency when used with an LM3430
- Current sinking adjustable up to 40 mA in each string
- Fast current switching slew rate, tr = 60 ns typical
- Wide dimming ratio, up to 4000:1 with fDIM = 500 Hz
- High LED driving voltage up to 80V
- ±2.0% current matching between strings
- Accepts both digital and analog dimming control
- LED open/short fault indication
- Over-temperature indication
- Internal thermal shutdown with hysteresis
- Available in low profile and thermally enhanced LLP-24 (5 x 4 x 0.8 mm) and eTSSOP-28 (9.7 x 6.4 x 1.1 mm) packaging

LM3431 – 3-Channel Constant-Current LED Driver with Integrated Boost Controller

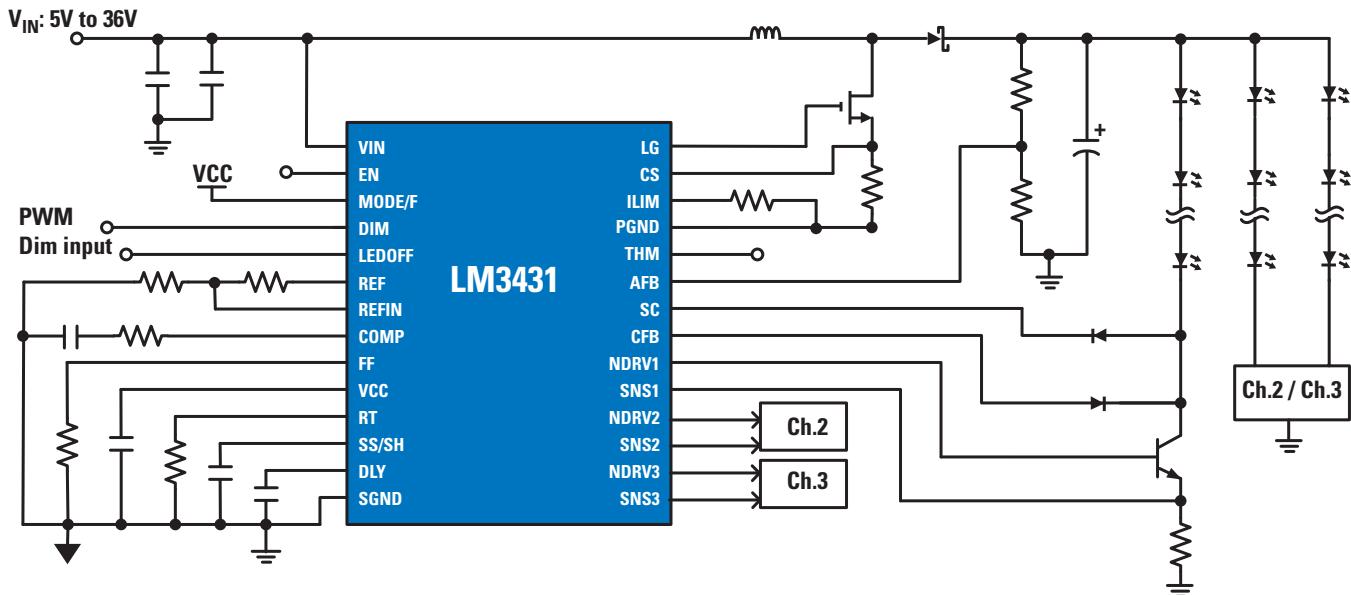

Features

- 3-channel programmable LED current
- High accuracy linear current regulation
- Analog and digital PWM dimming control
- Up to 25 kHz dimming frequency
- >100:1 contrast ratio
- Integrated boost controller
- 5V to 36V input voltage range
- Adjustable switching frequency up to 1 MHz
- LED short and open protection
- Selectable fault shutdown or automatic restart
- Programmable fault delay
- Programmable cycle-by-cycle current limit
- Output over voltage protection
- No audible noise
- Enable pin
- LED over-temperature shutdown input
- Thermal shutdown
- Available in TSSOP-28 exposed pad packaging

Applications

Ideal for use in automotive infotainment displays, small-to-medium format displays

LM3431 Typical Application Circuit

Switched-Capacitor Boost Backlight LED Drivers

LM2756 – Multiple-Display LED Driver with I²C-Compatible Brightness Control

Features

- Drives up to 8 LEDs with up to 30 mA of diode current each
- 32 exponential dimming steps with 800:1 dimming ratio for group A (up to 6 LEDs)
- 8 linear dimming states for groups B (up to 3 LEDs) and D1C (1 LED)
- Programmable auto-dimming function
- 3 independently-controlled LED groups via I²C-compatible interface
- Up to 90% efficiency
- Total solution size < 21 mm
- 0.4% accurate current matching
- Internal soft-start limits inrush current
- True shutdown isolation for LEDs
- Wide input voltage range (2.7V to 5.5V)
- Active high hardware enable
- Available in low-profile, micro SMD-20 packaging (1.615 x 2.015 x 0.6 mm)

Applications

Ideal for use in dual display LCD backlighting for portable applications, large format LCD backlighting, and display backlighting with indicator light

LM2757 – Switched-Capacitor Boost Regulator with High Impedance Output in Shutdown

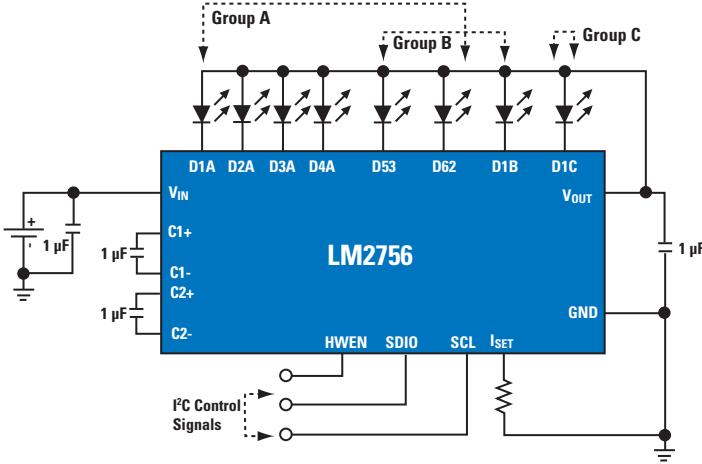

Features

- Dual gain converter (2x, 3/2x) with up to 93% efficiency
- Inductor-less solution uses only 4 small ceramic capacitors
- Total solution area < 12 mm
- True input-output and output-input disconnect
- Up to 180 mA output current capability (5V)
- Selectable 4.1V, 4.5V, or 5.0V output
- Pre-regulation minimizes input current ripple
- 1.24 MHz switching frequency for a low-noise, low-ripple output voltage
- Integrated over current and thermal shutdown protection
- Available in tiny micro SMD-12 packaging (1.2 x 1.6 x 1.6 mm)

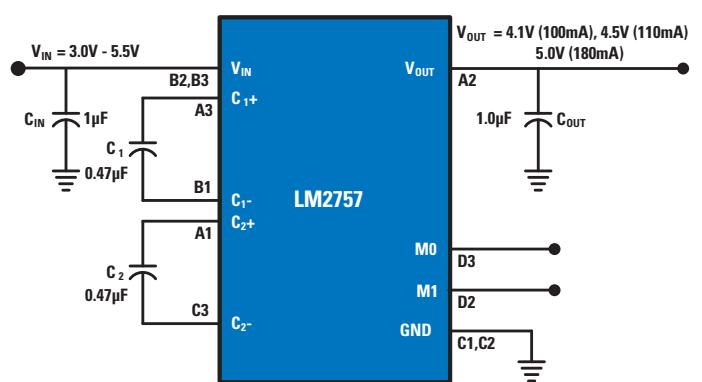

Applications

USB/USB-OTG power, super capacitor charger, keypad LED driver, and audio amplifier power supply

LM2756 Typical Application Circuit

LM2757 Typical Application Circuit

Flash LED Drivers

LM3553 – PowerWise® High-Current Inductive DC-DC Converter for Flash LED Applications

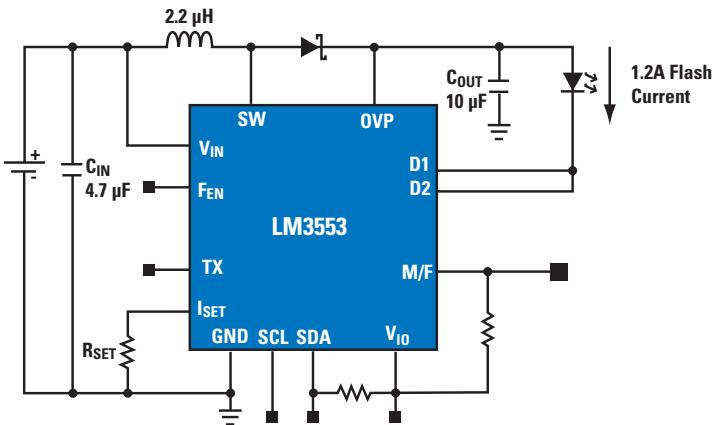

Features

- Accurate and programmable LED current up to 1.2A in 128 steps delivers optimal input current control
- 90% peak efficiency
- Drives 2 LEDs in series with up to 1.2A from 5V input
- Drives 2 LEDs in series with 600 mA from 2.7V input
- Adjustable over-voltage protection allows for a wide range of applications requiring one or more high current LEDs
- Adjustable switch current limit allows for the use of small inductors with lower saturation currents
- Voltage mode offers a 5V rail for backlight LEDs and/or audio amplifiers
- TX pin forces Torch mode allowing for synchronization between RF power amplifier and Flash/Torch modes
- Total solution size < 29 mm² optimizes PCB area occupation
- Available in low-profile LLP-12 packaging

Applications

Ideal for use in mobile phones, smart phones, PDAs, portable scanners, medical strobe lights, and handheld devices

LM3553 Typical Application Circuit

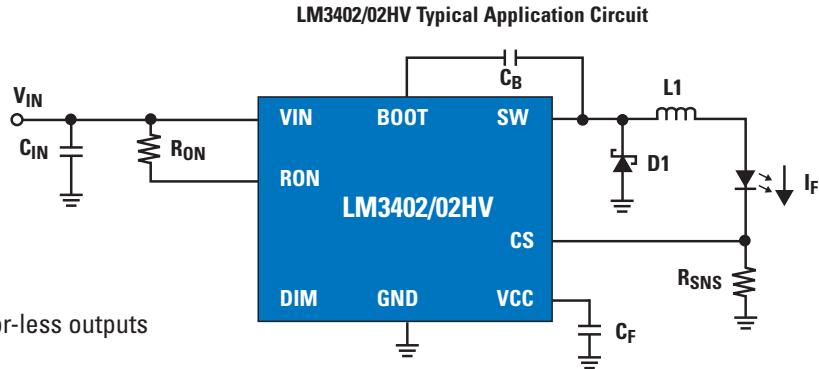

High-Brightness LED Drivers

LM3402/02HV – PowerWise® 0.5A Constant-Current Buck Regulator for Driving High-Power LEDs

Features

- Integrated 0.5A N-channel MOSFET
- V_{IN} Range from 6V to 42V (LM3402)
- V_{IN} Range from 6V to 75V (LM3402HV)
- 500 mA output current over temperature
- Cycle-by-cycle current limit
- No control loop compensation required
- Separate PWM dimming and low power shutdown
- Supports all-ceramic output capacitors and capacitor-less outputs
- Thermal shutdown protection
- Available in MSOP-8, PSOP-8 packaging

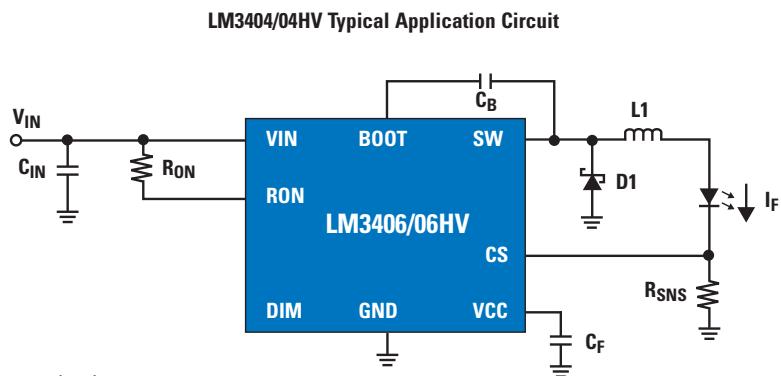

Applications

Ideal for use in LED drivers, constant-current sources, automotive lighting, general illumination, and industrial lighting

LM3406/06HV – PowerWise® 1.5A Constant-Current Buck Regulator for Driving High-Power LEDs

Features

- Integrated 2.0A MOSFET
- V_{IN} Range 6V to 42V (LM3406)
- V_{IN} Range 6V to 75V (LM3406HV)
- 1.7A minimum output current limit over temperature
- Cycle-by-cycle current limit
- PWM dimming with dedicated Logic input
- PWM dimming with Power INput Voltage
- Simple control loop compensation
- Low power shutdown
- Supports all-ceramic output capacitors and capacitor-less outputs
- Thermal shutdown protection
- Available in eTSSOP-14 packaging

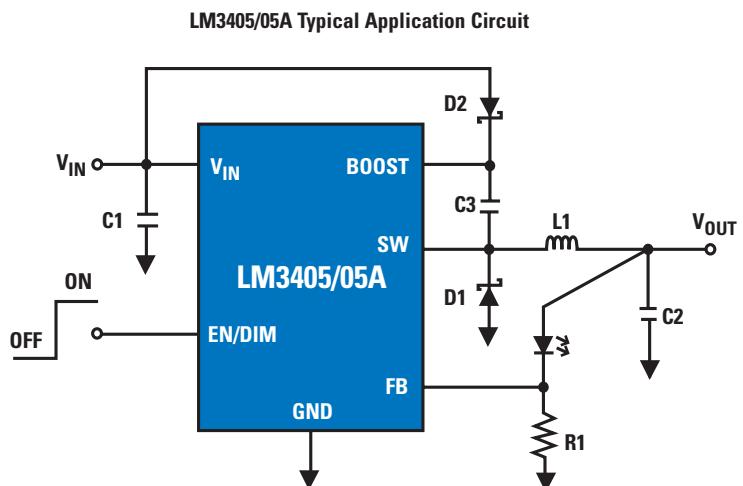

Applications

Ideal for use in LED drivers, constant-current sources, automotive lighting, general illumination, and industrial lighting

LM3405/05A – PowerWise® LED Driver 1A Constant-Current Buck Regulator

Features

- V_{IN} operating range of 3V to 15V
- 1.6 MHz switching frequency
- 300 mΩ NMOS switch
- 40 nA shutdown current at $V_{IN} = 5V$
- EN/DIM input for enabling and PWM dimming of LEDs
- Internally-compensated current-mode control
- Cycle-by-cycle current limit
- Input voltage UVLO
- Over-current protection
- Thermal shutdown
- Available in thin SOT23-6 packaging

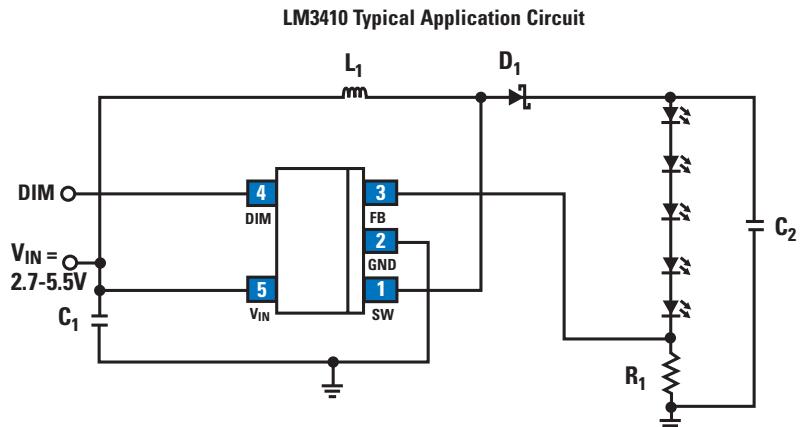

Applications

Ideal for use in LED drivers, constant-current sources, industrial lighting, and LED flashlights

LM3410 – PowerWise 525 kHz/1.6 MHz Constant-Current Boost and SEPIC LED Driver

Features

- Input voltage range of 2.7V to 5.5V
- Output voltage range of 3V to 24V
- 2.8A typical switch current
- High switching frequency
- 525 kHz (LM3410-Y)
- 1.6 MHz (LM3410-X)
- 170 mΩ NMOS switch
- 190 mV internal voltage reference
- Internal soft-start
- Current-mode, PWM operation
- Thermal shutdown
- Available in space-saving SOT23-5 and LLP-6 packaging

Applications

Ideal for use in LED backlight current sources, Li-Ion backlight OLED and HB LED drivers, handheld devices, and LED flash drivers

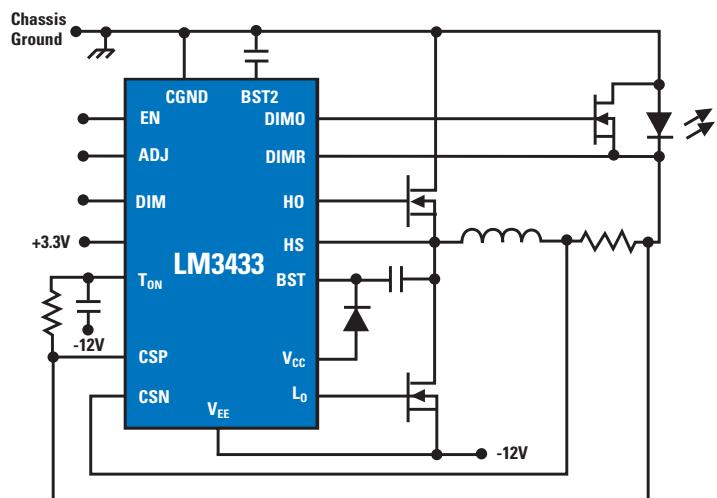

High-Brightness LED Drivers

LM3433 – Common-Anode-Capable, High-Brightness LED Driver with High-Frequency Dimming

Features

- Operating input voltage range of -9V to -14V w.r.t. LED anode
- Control inputs are referenced to the LED anode
- Output current greater than 6A
- Greater than 30 kHz PWM frequency capable
- Negative output voltage capability allows LED anode to be tied directly to chassis for maximum heat sink efficacy
- No output capacitor required
- Up to 1 MHz switching frequency
- Low IQ, 1 mA typical
- Soft-start
- Adaptive programmable ON time allows for constant ripple current
- Available in LLP-24 packaging

LM3433 Typical Application Circuit

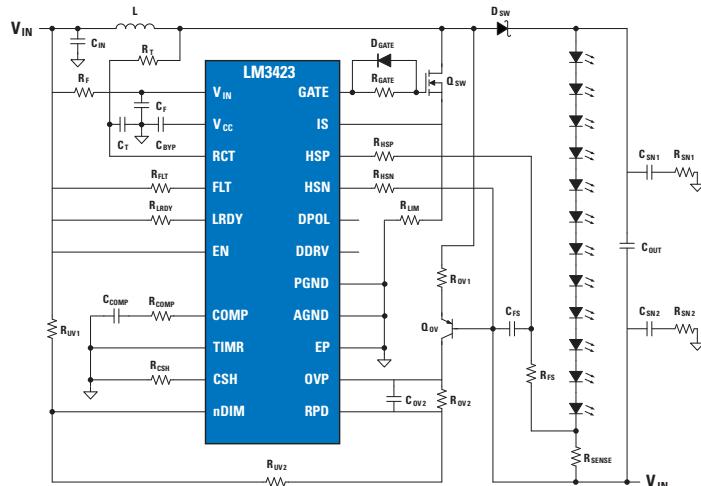

Applications

Ideal for use in LCD backlighting, projection systems, solid state lighting, and automotive lighting

LM3421/23 – PowerWise N-Channel Controllers for Constant-Current LED Drivers

Features:

- Buck, buck/boost, SEPIC topologies
- V_{IN} range 4.5 to 75V
- High-side current sensing
- Fast (50 kHz) PWM dimming input
- Programmable running frequency
- Zero current shutdown
- Input UVLO
- LED-ready flag
- Fault timer pin
- Available in TSSOP-16/20 packaging

Lighting Management Units

LP39542 – PowerWise® Advanced Lighting Management Unit

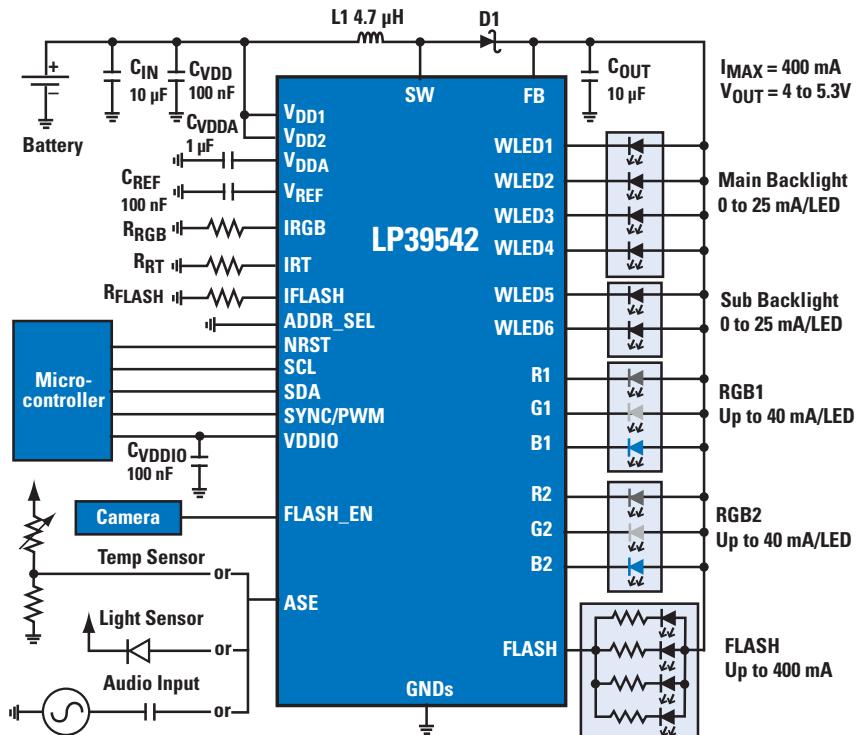

Features

- Audio synchronization for color/RGB LEDs
- Command-based PWM controlled RGB LED drivers
- Programmable ON/OFF blinking sequences for RGB LED
- High current driver for flash LED with built-in timing and safety feature
- 4+2 or 6 low voltage constant current white LED drivers with programmable 8-bit adjustment (0.25 mA/LED)
- High-efficiency boost DC-DC converter
- I²C-compatible interface
- Possibility for external PWM dimming control
- Possibility for clock synchronization for RGB timing
- Ambient light and temperature sensing possibility
- Available in micro SMD-36 packaging (3.0 x 3.0 x 0.6 mm)

Applications

Ideal for use in cellular phones, PDAs, and MP3 players

LP39542 Typical Application Circuit

Lighting Management Units

LP55281 – PowerWise® Quad RGB Driver

Features

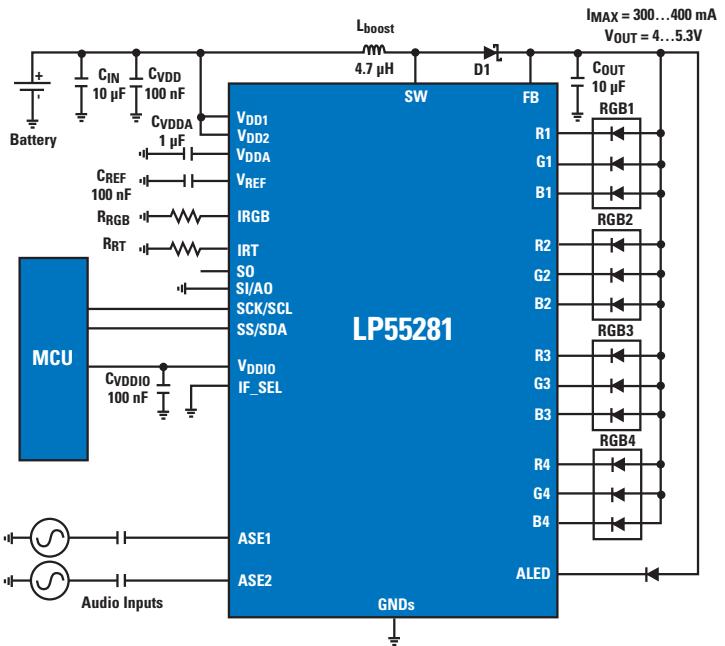

- Audio synchronization for a single fun light LED
- 4 PWM-controlled RGB LED drivers
- High-efficiency boost DC-DC converter
- SPI/I²C-compatible interface
- 2 addresses in I²C-compatible interface
- LED connectivity test through the serial interface
- Available in micro SMD-36 (3 mm x 3 mm x 0.6 mm) or micro SMDxt-36 packaging (3 mm x 3 mm x 0.65 mm)

Applications

Ideal for use in cellular phones, PDAs, and MP3 players

LP55281 Typical Application Circuit

LP3952 – PowerWise 6-Channel Color LED Driver with Audio Synchronization

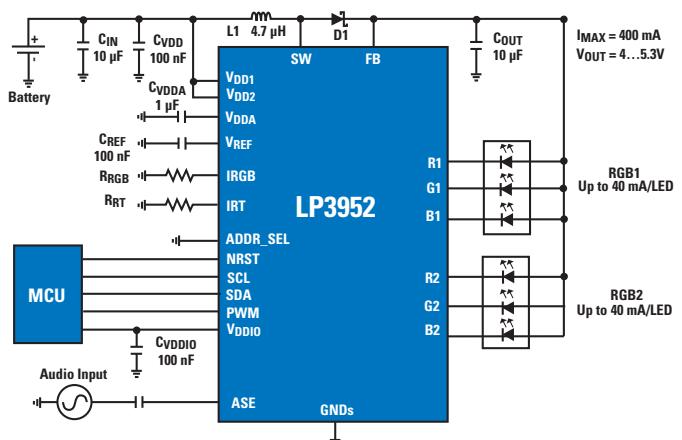

Features

- Constant-current and PWM-controlled color LED drivers
- Maximum current 40 mA / output in constant-current mode, supports also switch mode control with 50 mA maximum current/output
- Complete audio synchronization for color/RGB LEDs with amplitude, frequency, and speed optimization
- Command-based lighting pattern generator for RGB LEDs
- Programmable ON/OFF blinking sequences for RGB1 outputs
- High-efficiency boost DC-DC converter with programmable V_{OUT} and fSW
- I²C-compatible interface
- Possibility for external PWM dimming control
- Available in micro SMDxt -36 packaging (3.0 mm x 3.0 mm x 0.65 mm)

Applications

Ideal for use in cellular phones, PDAs, and MP3 players

LP3952 Typical Application Circuit

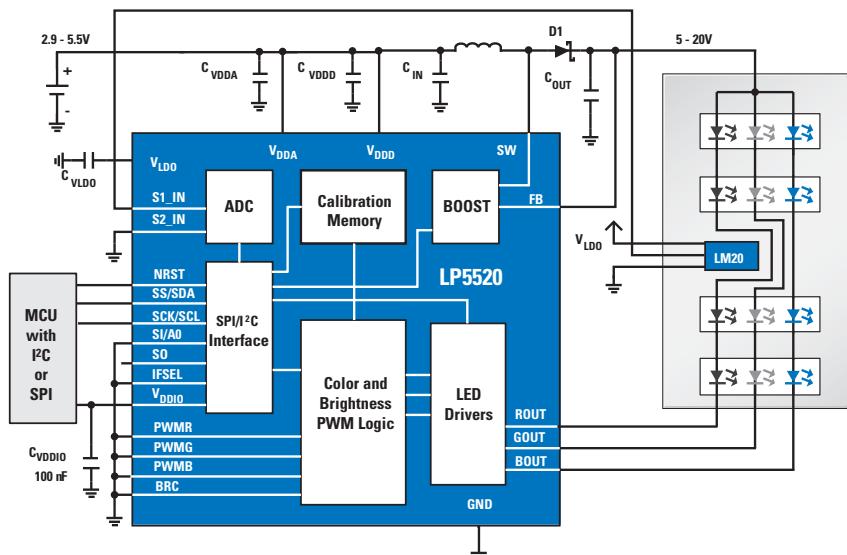

LP5520 – RGB Backlight LED Driver

Features

- Temperature-compensated LED intensity and color
- Individual calibration coefficients for each color
- Color accuracy ΔX and $\Delta Y \leq 0.003$
- 12-bit ADC for measurement of 2 sensors
- Adjustable current outputs for RGB LED
- 0.2% typical LED output current matching
- PWM control inputs for each color
- SPI and I²C-compatible interface
- Stand-alone mode with 1-wire control
- Sequential mode for one color at a time
- Magnetic high-efficiency boost converter
- Available in micro SMD-25 packaging (2.77 x 2.59 x 0.6 mm)

LP5520 Typical Application Circuit

Applications

Ideal for use in color LCD display backlighting, LED lighting applications, non-linear temperature compensation, and ambient light compensation

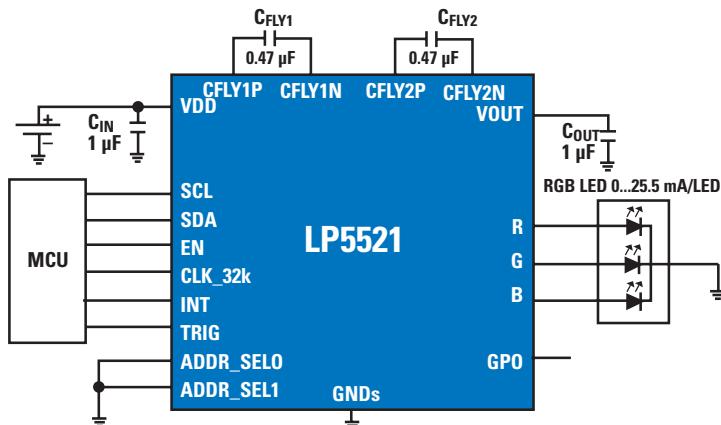

LP5521 – PowerWise® Programmable 3-Channel LED Driver

Features

- Adaptive charge pump with 1x and 1.5x gain provides up to 95% LED drive efficiency
- Charge pump with soft-start and overcurrent/short circuit protection
- Low input ripple and EMI
- Very small solution size, no inductor or resistors required
- 200 nA typical shutdown current
- Automatic power save mode
- I²C-compatible interface
- Independently-programmable constant-current outputs with 8-bit current setting and 8-bit PWM control
- Typical LED output saturation voltage 50 mV and current matching 1%

LP5521 Typical Application Circuit

Applications

Fun/indicator lights, LCD sub-display backlighting, keypad RGB backlighting and phone cosmetics, vibra, speakers, and waveform generators

Linear Regulators for DDR Termination

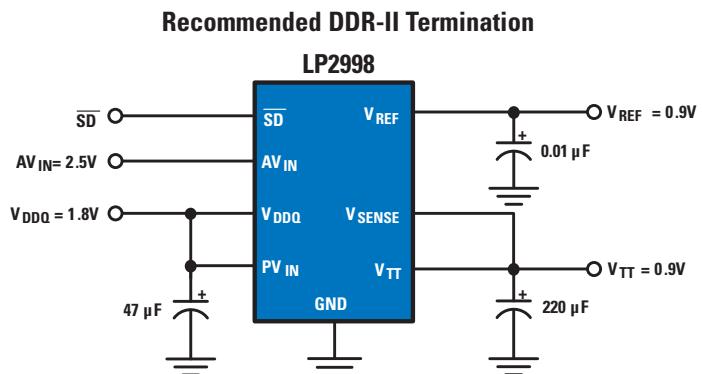

LP2998 – Double Data Rate (DDR) Termination Regulator

Features

- Linear topology
- Load current up to 0.5A (DDR-II) / 1.5A (DDR-I)
- Source and sink current
- Thermal shutdown
- Suspend to Ram (STR) functionality
- Active low shutdown
- -40°C to +125°C operation

Applications:

Ideal for use in DDR-I and DDR-II termination voltage, SSTL-2 and SSTL-3 termination, and HSTL termination

Linear Regulators for DDR Termination

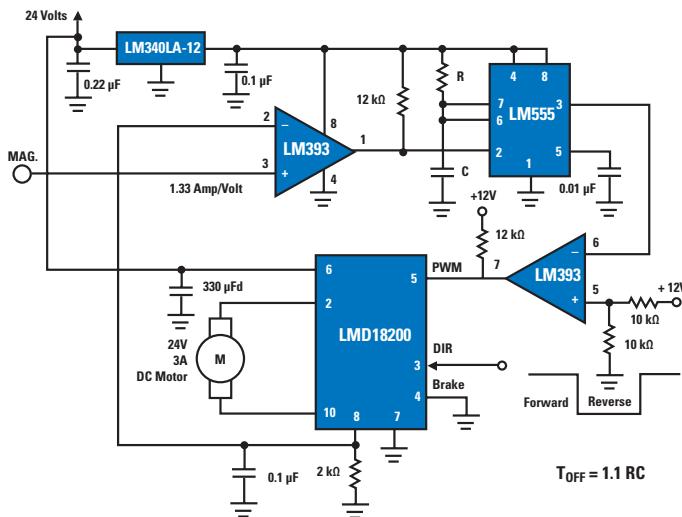

Product ID	Input Max Voltage (V)	Input (PV _{IN}) Min Voltage (V)	Output Current (mA)	Standards	External Components	Quiescent Current	Error Flag	On/Off Pin	Suspend to RAM shutdown	Packaging
LP2997	5.5	1.8	500	DDR-II	3	0.32	—	✓	✓	PSOP-8, SO-8
LP2995	5	2.2	1500	DDR	3	0.25	—	—	—	LLP-16, PSOP-8, SO-8
LP2996	5.5	1.8	1500	DDR, DDR-II	3	0.32	—	✓	✓	LLP-16, PSOP-8, SO-8
LP2998	5.5	1.8	1500	DDR, DDR-II	3	0.32	—	✓	✓	PSOP-8, SO-8

Motor and Motion Controllers

LMD18200 – 3A, 55V H-Bridge Controller

Features

- Delivers up to 3A continuous output
- Operates at supply voltages up to 55V
- Low RDS(ON) typically 0.3Ω per switch
- TTL- and CMOS-compatible inputs
- No “shoot-through” current
- Thermal warning flag output at 145°C
- Thermal shutdown (outputs off) at 170°C
- Internal clamp diodes
- Shorted load protection
- Internal charge pump with external bootstrap capability

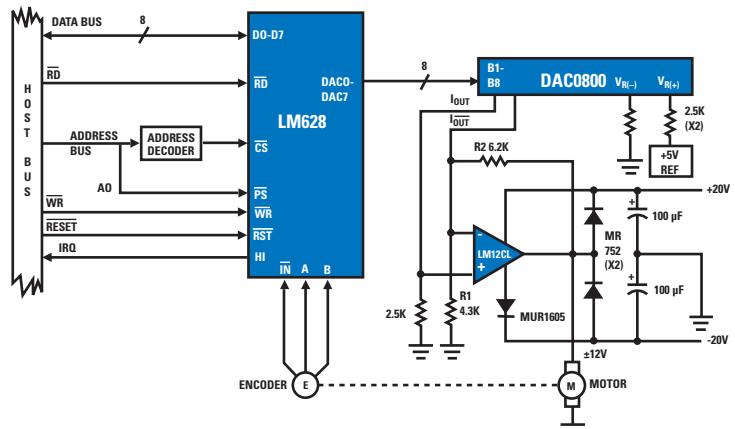

Half-Bridge Drivers for Motor Control

Product ID	Max V _{IN} (V)	Min V _{IN} (V)	I _{OUT} (A)	Thermal Shutdown	Features	Packaging
LMD18200	55	12	3	170°C	Thermal warning flag at 145°C , low-loss internal current sense circuitry, shorted load protection	TO220-11
LMD18201	55	12	3	170°C	Thermal warning flag at 145°C	TO220-11
LMD18245	55	12	3	155°C	Low-loss internal current sense circuitry, 4-bit digital motor current control	TO220-15

LM628 – Precision Motion Controller

Features

- 32-bit position, velocity, and acceleration registers
- Programmable digital PID filter with 16-bit coefficients
- Programmable derivative sampling interval
- 8- or 12-bit DAC output data (LM628)
- 8-bit sign-magnitude PWM output data (LM629)
- Internal trapezoidal velocity profile generator
- Velocity, target position, and filter parameters may be changed during motion
- Available in 28-pin dual in-line packaging or 24-pin surface mount packaging (LM629 only) capability

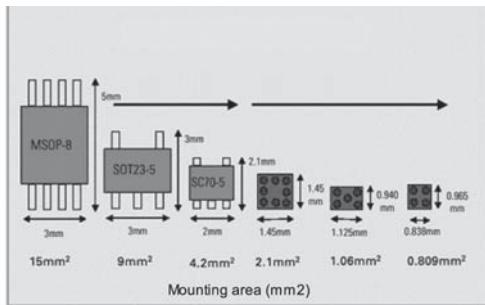

Digital Controllers for Motion Control

Product ID	Max Frequency	Features	Output Data	Packaging
LM628	6 MHz or 8 MHz	Digital PID filter, 32-bit velocity, position, acceleration registers	8-bit or 12-bit DAC	MDIP-28
LM629	6 MHz or 8 MHz	Digital PID filter, 32-bit velocity, position, acceleration registers	8-bit sign-magnitude PWM to drive H-Bridge	DIP-28 or SOIC-24

Advanced Packaging Technologies

National Semiconductor meets the requirements for pin count and size across all standard package types. In addition to providing advanced packages, National has taken steps to reduce or completely eliminate environmentally unfriendly and hazardous substances from its products. National is compliant with the European Union's RoHS Directive (an EU directive restricting the use of specific hazardous substances contained in electronic products). In addition, National has taken the environmental initiative to move to halogen-free products.

Comparison of Packages Sizes

National has led the industry in developing ground-breaking new packages that meet the needs of the mobile era. Typical examples include micro SMD and LLP®.

Features of National's CSP (chip scale package) micro SMD: "The die is the package"

The micro SMD package is ideal for high-performance mobile devices and applications with space-constraint issues.

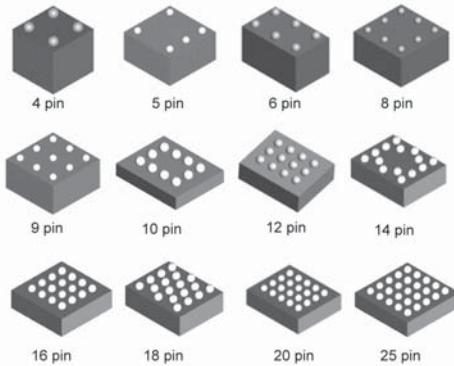

micro-SMD packaging also features the following benefits:

- Minimum mounting area relative to the number of I/O pins
- Excellent electrical characteristics and heat dissipation performance, level 1 moisture resistance, and low noise
- Two different types of solder bump are available (large bump: 300 µm, small bump: 170 µm)
- 0.5 mm pitch pad layout
- Standard (0.85 mm to 1.05 mm) or thin (0.5 mm to 0.6 mm) package thickness
- Supplied as standard embossed taping

National has adopted micro SMD technology for a wide range of products including power management, audio, amplifier, and temperature management ICs.

micro-SMD Package Range

LLP Packages Feature Excellent Heat Dissipation Characteristics:

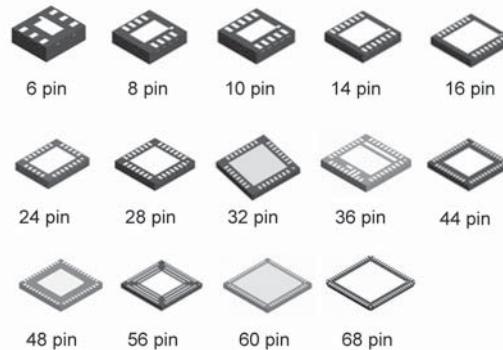

A key feature of the LLP package is that the large heat dissipation area provided by the "die attach pad" reduces thermal resistance and delivers excellent heat dissipation characteristics. At the same time, the package reduces board mounting area and enables high density mounting. The main features of LLP packaging are listed below.

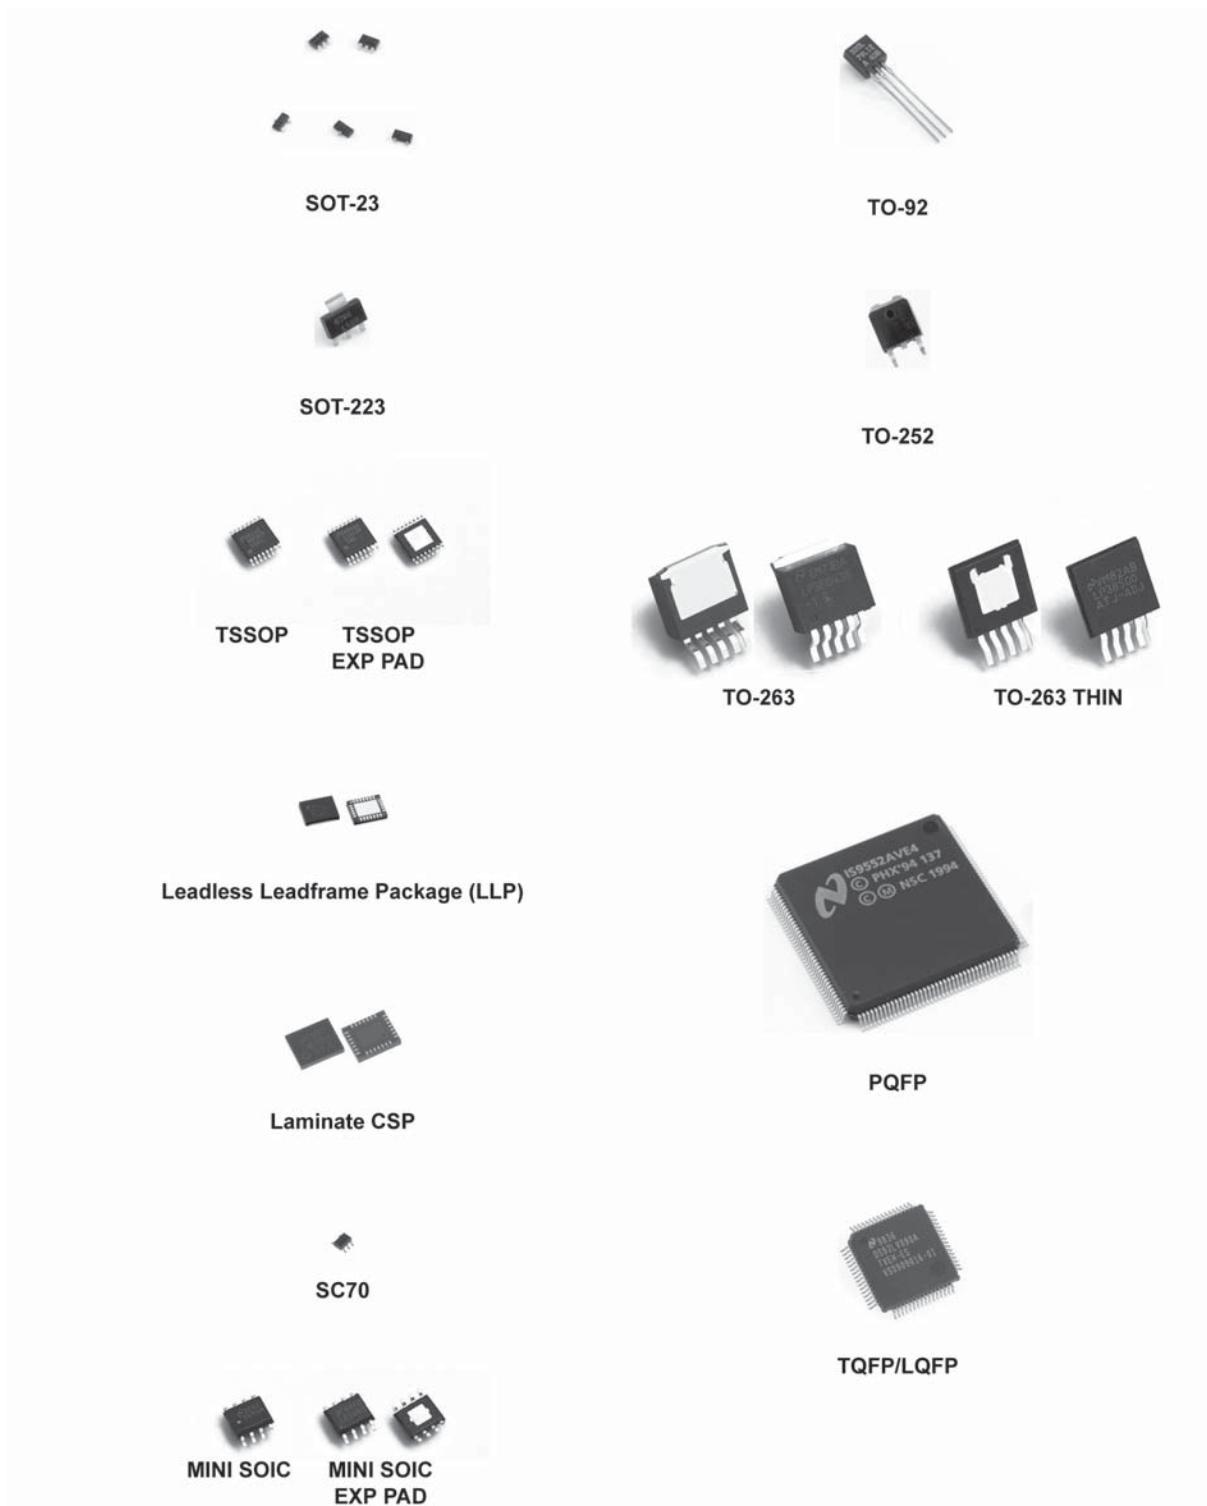

- Provides better heat dissipation characteristics and improves self-alignment of packages during reflow due to the low thermal resistance
- Makes effective use of circuit board area with low package height and weight
- Affords low parasitic capacitance
- Maintains coplanarity
- Delivers faster signal transmission speed with minimal cross-talk and ground balance

The small dimensions and thin profile of the LLP package make it ideal for application in small devices such as mobile phones and PDAs that are heat-sensitive.

Document Library

Find end market solutions and products using National's Solutions Guides.

www.national.com/selguide

National makes design easy no matter where you are in the design process. Explore the latest learning resources and selection tools to help you select the right products. Once you're ready to begin designing, use National's industry award-winning online design tools to guide you through the entire process - from concept, to simulation, to prototyping.

Explore & Learn

Explore "how to" videos, online courses, articles, and the latest design technologies, including:

- Watch "Design Made Easy with New WEBENCH® Power Designer" to learn quick and easy tips and tricks for designing with the enhanced WEBENCH Power Designer tool, LM2267x SIMPLE SWITCHER® regulators and LM315x SIMPLE SWITCHER controllers
- Watch "Design Made Easy with New WEBENCH® Sensor Designer" to learn quick and easy tips and tricks for designing with the new WEBENCH Sensor Designer tool

Compare & Selection

Find the perfect mix of products for your design. Search, select and compare relevant products.

- Find up-to-date information about new products
- Search thousands of products, then sort information (by topology, output voltage range, input voltage and more) using National's online product catalog
- Download the latest materials featuring end-market solutions using National's newest products

Design & Build

Design, build and validate a solution using the WEBENCH® Designer online tools:

- Select it:
 - Input your design and choose a part
- Design It:
 - Adjust components and exercise operating values such as power dissipation, current flow, offset voltage, drift, and frequency response
 - Compare performance, size, and cost
 - Use recommended components or create a BOM
- Analyze It
 - Stimulate your circuit and evaluate performance using electrical and thermal simulations
 - Overlay alternate circuits and compare results
- Build It
 - Request samples and purchase parts or boards
 - Receive your custom prototyping kit
 - Download CAD files, assembly details, test instructions, and complete performance characteristics
- Test It
 - Download your custom test vectors to verify your real board versus virtual results
 - Perform board-level tests
