General Description

The ISL9V5045S3S and ISL9V5045S3 are next generation ignition IGBTs that offer outstanding SCIS capability in the industry standard D²-Pak (TO-263) plastic package. This device is intended for use in automotive ignition circuits, specifically as a coil drivers. Internal diodes provide voltage clamping without the need for external components.

EcoSPARK™ devices can be custom made to specific clamp voltages. Contact your nearest Fairchild sales office for more information.
