Interface IC of data serial transfer with one supply voltage

Interface transceivers of serial data as per RS - 232 MAX208 standard with one supply voltage and transmitter bipolar output voltage formed by the embedded voltage multiplication oscillator on 4 external capacitances equal to 0,1mkF, corresponding to EIA/TIA-232E, V.28 standards, are purposed for application in up-to-date high-performance calculating systems, high-speed electronic devices with high reliability of information exchange between remote objects.

Functions:

4 transmitters and 4 receivers of serial data as per RS – 232 standards

Packaged IC marking

ILX208DW SOIC

T_A = from -40 to 85 °C
