### 標識 Marking

The capacitor is marked by laser print or stamp or adhesive label, With following information:

- 1.Rated capacitance value(500 $\mu$ F)
- 2.Rated voltage(1100Vdc)
- 3.Tolerance on rated capacitance(K :  $\pm$ 10%)
- 4.Part number(Code for ordering 507K112D51301)
- 5.Trace code and serial number(MFR-WEEK-SN)

### 提醒和警示 Cautions and Warnings

- (1) The capacitor have not discharge resistors between terminals,so the energy stocked in the capacitor may be lethal,before handle capacitors please discharge through resistor, short-circuit the capacitor is not permit.
- (2) Check thickness of the connections/terminals periodically.
- (3) Do not use or store capacitors in corrosive atmosphere,especially where chloride gas,sulfide gas,acid,alkali,salt or the like are present.In the dusty environment regular maintenance and cleaning especially of the terminals is required to avoid conductive path between phases.
- (4) All the data measured at Room Temperature(R.T. 23 $\pm$ 8°C) unless otherwise specified.
- (5) CABO is not responsible for any damages,which are caused by the improper installation and application.Before using the capacitor in any application,please read carefully this technical data-sheet.
- (6) Specifications are subject to change without prior notice.Don't hesitate to contact us for any doubts and more detail information.
