

## Low Dissipation Operational Amplifier

### PRODUCT DESCRIPTION

The MS321, MS358, MS324 are signal channel, dual channel, four channel amplifiers respectively. It has high unit gain bandwidth and the slew rate could be up to  $0.4V/\mu s$  on specific condition. Each amplifier only has  $430\mu A$  quiescent current at 5V. The input common-mode range could be grounded. In addition, the device supports single or dual power operation, and easily drive large capacitance load.

The MS321, MS358, MS324 have lead SOT23-5, SOP8, SOP14/TSSOP14 and QFN16 packages respectively. The device is featured by low dissipation, wide power supply range and economical price, allowing it to be applied widely.

### FEATURES

- Gain BandWidth: 1MHz@25°C
- Low Power Supply Current:  $430\mu A$
- Low Input Bias Current:  $30nA$
- Power Supply Range: 2.5V to 36V
- Maintain Stable in Large Capacitance Load

### APPLICATIONS

- Charger
- Power Supply
- Industrial Control Tools
- Desktop Computer
- Communication

### PRODUCT SPECIFICATION

Part Number	Package	Marking
MS321	SOT23-5	321
MS358	SOP8	MS358
MS324	SOP14	MS324
MS324T	TSSOP14	MS324T
*MS324N	QFN16	MS324N

\* The package is not available temporarily. If necessary, please contact Hangzhou RuiMeng Sales Department Center.

8	2IN+	I	Positive Input (Channel 2)
9	3IN+	I	Positive Input (Channel 3)
10	3IN-	I	Negative Input (Channel 3)
11	3OUT	O	Channel 3 Output
12	V+	-	Positive Power Supply
13	V-	-	Negative Power Supply
14	4OUT	O	Channel 4 Output
15	4IN-	I	Negative Input (Channel 4)
16	4IN+	I	Positive Input (Channel 4)

**ABSOLUTE MAXIMUM RATINGS**

Any exceeding absolute maximum rating application causes permanent damage to device. Because long-time absolute operation state affects device reliability. Absolute ratings just conclude from a series of extreme tests. It doesn't represent chip can operate normally in these extreme conditions.

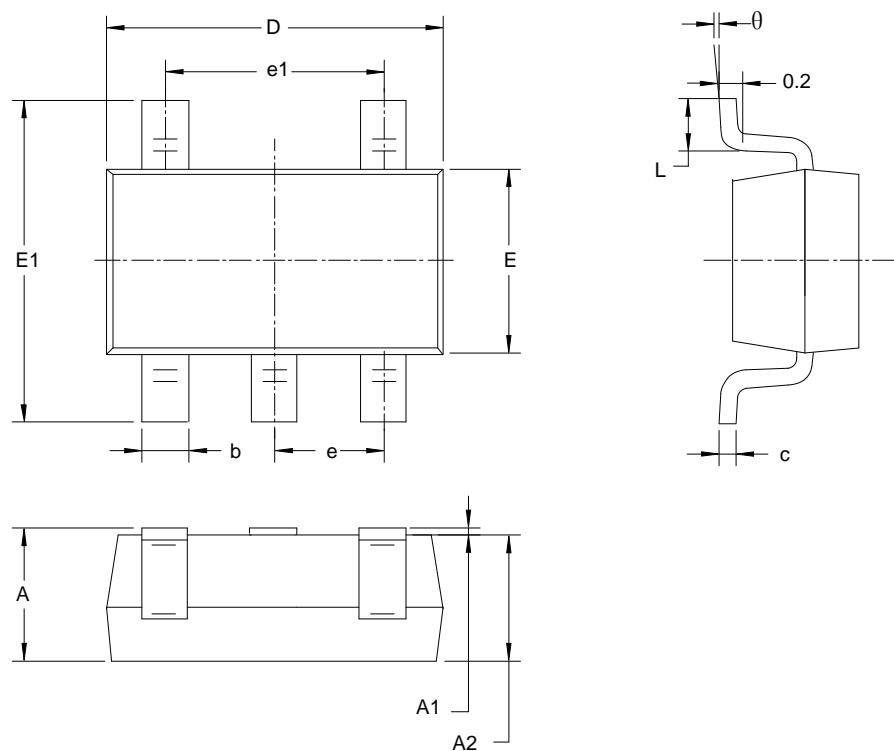

Parameter	Ratings	Unit
Differential Input Voltage	± Power Supply	
Input Current (VIN < -0.3V)	50	mA
Power Supply (V+ - V-)	40	V
Input Voltage	-0.3 ~ 40	V
Junction Temperature	150	°C
Operating Temperature	-40 ~ 125	°C
Soldering Temperature (10s)	260	°C
Storage Temperature,Tstg	-65 ~ 150	°C

**ELECTRICAL CHARACTERISTICS**

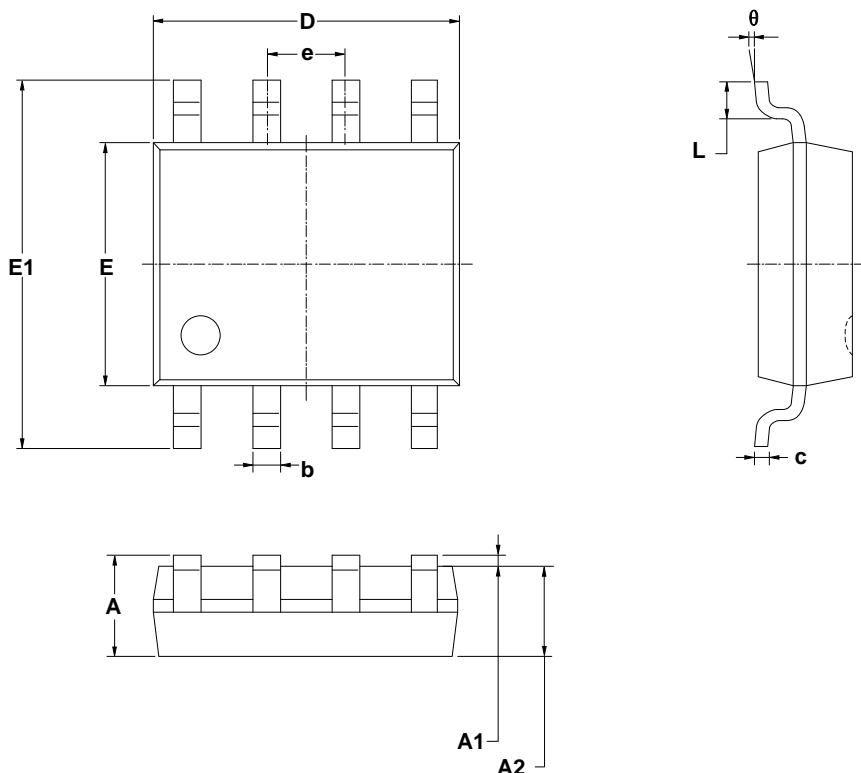

Unless otherwise noted, TA=25°C, V+=5V, V-=0V, VO=1.4V.

Parameter	Symbol	Condition	Min	Typ	Max	Unit
<b>Input Characteristics</b>						
Input Offset Voltage	Vos	A	TA=25°C		2	3
			-40°C ≤ TA ≤ 125°C		5	mV
Input Bias Current	IB		TA=25°C		30	250
			-40°C ≤ TA ≤ 125°C		500	nA
Input Offset Current	IOS		TA=25°C		5	50

**STATEMENT**

- All Revision Rights of Datasheets Reserved for Ruimeng. Don't release additional notice.  
Customer should get latest version information and verify the integrity before placing order.
- When using Ruimeng products to design and produce, purchaser has the responsibility to observe safety standard and adopt corresponding precautions, in order to avoid personal injury and property loss caused by potential failure risk.
- The process of improving product is endless. And our company would sincerely provide more excellent product for customer.

**MOS CIRCUIT OPERATION PRECAUTIONS**

Static electricity can be generated in many places. The following precautions can be taken to effectively prevent the damage of MOS circuit caused by electrostatic discharge:

1. The operator shall ground through the anti-static wristband.
2. The equipment shell must be grounded.
3. The tools used in the assembly process must be grounded.
4. Must use conductor packaging or anti-static materials packaging or transportation.
