#### **DESCRIPTION**

Third generation MOSFETs from Vishay provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The D<sup>2</sup>PAK (TO-263) package is universially preferred for all commercial-industrial applications at power dissipation levels to approximately 50 W. The low thermal resistance and low package cost of the D2PAK (TO-263) contribute to its wide acceptance throughout the industry.
